# HIKVISION SCHEDULED VIRTUAL GUARD SOLUTION

Pain Points

No focus on the security in the important period as actual needs.
E.g., security in the non-working hours of the offices must be highly focused.

Alarm events may occur (e.g., fire accident in office) due to the ARC operator's being absent-minded in alarm processing task.

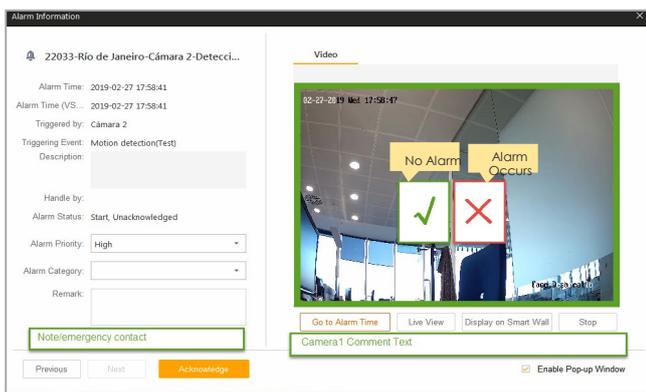

It causes low efficiency and high workload to monitor all connected sites all-day through. Lack of effective working process
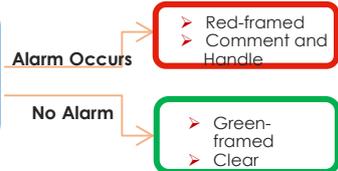

Solution Highlights

Remote Patrol

Camera 01

Scheduled Remote Patrol of site cameras and alarm triggering

Emergency Contact linked to each object (connection area)

Mandatory View Camera action with countdown to check each alarm item

Alarm Occurs →
➢ Red-framed
➢ Comment and Handle

No Alarm →
➢ Green-framed
➢ Clear

Product Showcase

HikCentral (Customized)

- Central management of devices
- Multiple object alarm types configurable
