Regions	Europe

Integrated Hikvision Products

- ✓ IP, PTZ, and Thermal Cameras
- ✓ NVRs / DVRs
- ✓ Traffic Products, Parking
- ✓ Alarm
- ✓ HikCentral

Supported Product Models and Versions

The Mobile Security Box is compatible with all of Hikvision CCTV cameras and is built with enough space inside to store any additional electronic equipment or power to configure solution.

Solution Architecture

The Mobile Security Box is designed to be compatible with all of Hikvision CCTV camera's and is built with enough space inside to store any additional electronic equipment or power to configure your own solution. The Mobile Security Box has a six-meter extendable mast built in, with a pre-fitted dual bracket for cameras on top. Four steel cables fixed to the mast head reduce the camera vibration that can cause false alarms.

Key Benefits

Security Protection

Mobile Security Boxes are used for the protection of unmanned sites and temporary installations. They support on-site, manned guarding, enhancing safety for people, sites, and assets.

Save Costs

Savings of 60% can be made over manned guarding costs and intruders can be detected quickly. And it can effectively minimize damage, loss or delays in ongoing projects.

Flexible CCTV Solution Deployment

The Mobile Security Box is compatible with all Hikvision CCTV surveillance products. It is built with enough space inside to store all your electronic equipment or power, safely inside the vandal resistant box.

This will give you the flexibility to build your own solution, tailoring it to the needs of your market and customer requirements.

Branding Your Mobile Security Box

While the Mobile Security Box is monitoring objects and unsafe situations, it's also an ideal marketing and advertising tool. Whether you are a distributor, a reseller, or an end user, you have four side panels to let your brand or message speak out.

Easy Installation and Transport

The Mobile Security Box is designed for easy installation, for example, a pre-fitted mast top with a dual bracket for cameras. It's also easy to transport to any location that needs to be monitored by remote CCTV.

Key Features

Stable: Reducing vibration and false alarms with the steel cables to the masthead

Easy to transport: Heavy duty forklift slots and mounting points, making it easy for transportation and on-site deployment

Vandal resistant: 100% galvanized steel construction and two lockable top covers that protect the electronic equipment inside

Branding: Easy to brand with your personalized message on all four sides with 2m x 1m panels

Quality: Both ISO and CE (awarded by TÜV Rheinland) certification

Targeted Industries (Verticals)

City

Residential

Banking & Finance
