

Entry-Level TandemVu PTZ Cameras

Big Picture and Details, in One View

The **TandemVu PTZ** cameras integrate a bullet camera and a PTZ camera into one affordable unit, the 4-inch entry-level model (7- and 8-inch TandemVu models are also available). The overall view remains the same even during the pan, tilt, and zoom maneuvers, so that users will see everything and miss nothing at any given instant. It improves situational awareness from the moment you set up the camera.

Shortcomings of Conventional PTZs

- Single PTZ
 - ☹️ **Loses original scene** when it pans and tilts
 - ☹️ **Loses global view** when it zooms
- Single PTZ + Fixed Camera
 - 💰 **High system cost**
 - ⚙️ **Complex installation**
 - 🔗 **Difficult linkage**

Why TandemVu PTZ Cameras?

Big Picture and Details, In One View

360°
-15° - 90°
Powered by **DarkFighter**

Bullet

PTZ

Fast Linkage in Two Channels Improves Live View Efficiency

Automatic calibration matches coordinates of positions on the bullet channel and PTZ channel.

Bullet

PTZ

Matching in two channels

3D **3D Positioning** function enables users to view the detailed image in PTZ channel with high efficiency by marking the interested area in the bullet channel.

Manual Tracking function allows users to select a target manually and the PTZ channel will track the target.

AcuSense Technology Brings Intelligence and Efficiency

- **Focus on Human and Vehicle**
Only humans or vehicles will trigger alarms while other targets are disregarded.
- **Quick Target Search**
Find the video you need more quickly with categorized video footage in Hikvision NVRs.

Enjoy Multiple Advantages of the Integrated Design

- **Cost Savings**
- **Easy Installation**
