Smart infrastructure for the next level service quality

Digital Implementation for Better Customer Experience

Integrated Data Journey for tracing and control

IN PROGRESS

| With our enormous infrastructure, we are exploring a feasible and effective solutions on managing our infrastructure in a **SMART** way sustainably

| This includes how can we use the existing and future technology on Artificial Intelligence for HSSE risks barrier and mitigation, productivity, operations maintenance, and process improvement opportunity, not only for our MEGAHUB but also for other critical infrastructure for comprehensive actions

| **HIKVISION is exploring this with us**

THANK YOU
