

3rd Gen DeepinView LPR Cameras

Brilliant Clarity and Powerful Analytics Improve Daily Vehicle Access Control Security

Dedicated Automatic License Plate Recognition Powered by Deep Learning

Easy Access Control to Allow Only Authorized Vehicles to Enter and Alerts You When Vehicles Pass

Flexible Third Party Access Control and/or VMS Integration Via Various Interfaces

- Powerful High Light Compensation (HLC) reduces glare that obstructs views and enables you to read license plates clearly; HLC eliminates the need for additional illumination, saving design and equipment costs
- Supports dual license plate recognition mode for multiple applications, reducing misrecognition
- Equipped with vehicle analysis and vehicle attribute identification, such as color, to enhance video search efficiency
- Built-in gravity sensor for Vibration Detection to protect the camera from vandalism
- Ready to perform in harsh weather conditions and demanding environments with IK10 rating and NEMA 4x anti-corrosion coating.
