

TOUCH-FREE, COMPACT DESIGN, ACCESS IS EASIER THAN EVER

MinMoe

Multi-functional Terminals
DS-K1T342DWX

Hikvision's Value Series MinMoe Touchless Access Terminals: One multi-functional unit for access control, intercom, and time & attendance needs. A highly efficient and cost effective system to improve security and provide real-time visibility into your facility.

**IP65
RATING**

Vibrant 4.3-inch touch screen with 2 MP wide angle lens

Seamless integration with Hikvision recorders for video surveillance
Convenient time and attendance options

Hands-free authentication with face credentials

Clear intercom audio communication with echo and noise cancellation

Supports device management for live view, opening doors, and intercom calling via mobile app

Supports Ethernet and Wi-Fi communications

Hikvision's Value Series MinMoe Touchless Terminals deliver outstanding access control and intercom in one sleekly designed and affordable unit. Registered users can gain access via face authentication and card PIN code and visitors can simply communicate with the receptionist through the intercom feature of the device. The MinMoe terminal can also be used as a video surveillance camera for daily monitoring and clip retrieval (NVR required). The flexible design and functionality makes access control simpler than ever.
