

Capturing the World as It Really Is Empowering Business with Intelligent Insights

Hikvision Fisheye Cameras

HIKVISION[®]

WHAT CAN FISHEYE CAMERAS DO

Security and prosperity are two fundamental pillars of society. Fisheye cameras protect both.

In the courtroom, they cover every corner and record the judicial process with audio and video. In retail settings, they provide visualized data from customer behavior and inspire changes to promote sales.

With an ultra wide-angle lens and a single sensor, fisheye cameras render a 360-degree "fishbowl" view that can be de-warped on the screen for a completely natural reproduction. With built-in deep learning algorithms, they can count and display numbers of customers. In the end, these cameras offer discreet and cost-effective solutions.

Hikvision Fisheye Cameras are applied in exhibition rooms, law courts, retail stores, and many, many more scenarios. Choose from a wide array of display modes to view a distortion-free scene while being constantly informed with dynamic visualized customer data.

Less Distortion, More Natural Visuals

No Blind Spots

Heat Mapping

Intersection Flow Analysis

Less IR Reflection

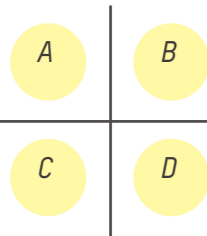

FEATURE HIGHLIGHTS

FEATURE HIGHLIGHTS

Cost Efficiency

Hikvision Fisheye Cameras provide up to 15 view modes to satisfy a multitude of customer requirements, easily covering every corner of a monitored area. The images below are just the beginning.

More Natural Visuals

Hikvision's latest Fisheye Cameras use high-end Immersion lenses and advanced algorithms to reverse the effects of geometric distortions and pixel density loss at the edges of the frame.

Less Distortion

No Blind Spots

Hikvision Fisheye Cameras provide up to 14 view modes to satisfy a multitude of customer requirements, easily covering every corner of a monitored area. The images below are just the beginning.

Cylinder mode

Half Sphere mode

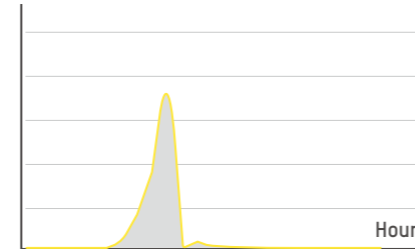

Heat Mapping

With deep-learning-based heat mapping technology, customer movements are visualized intuitively, which reveals the most-visited shelves to store owners so that they can reorganize merchandise displays in a strategic manner.

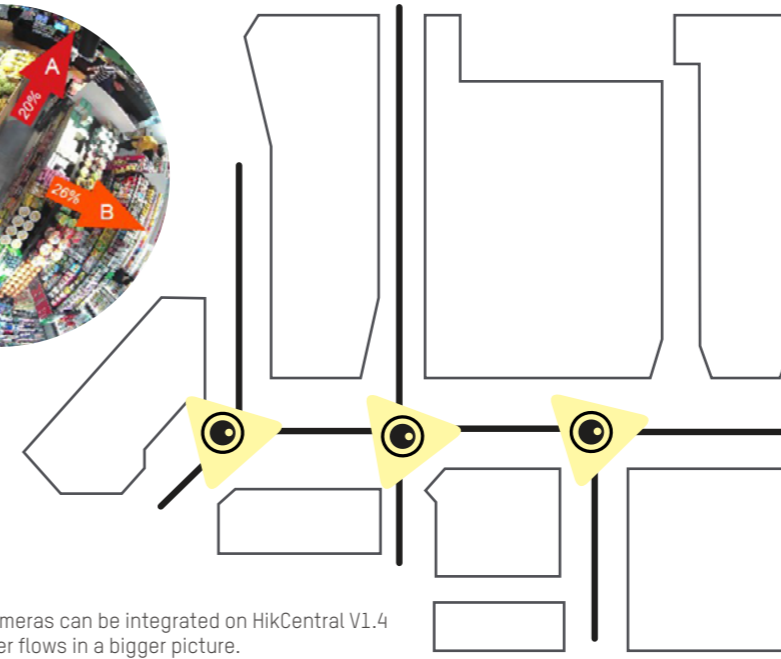

Number of people

Intersection Flow Analysis

Customer flow at intersections can be mapped for analysis by store owners or operators. Customer movement throughout a store or a mall informs marketing strategies, providing the insight needed to attract more eyes and increase revenues.

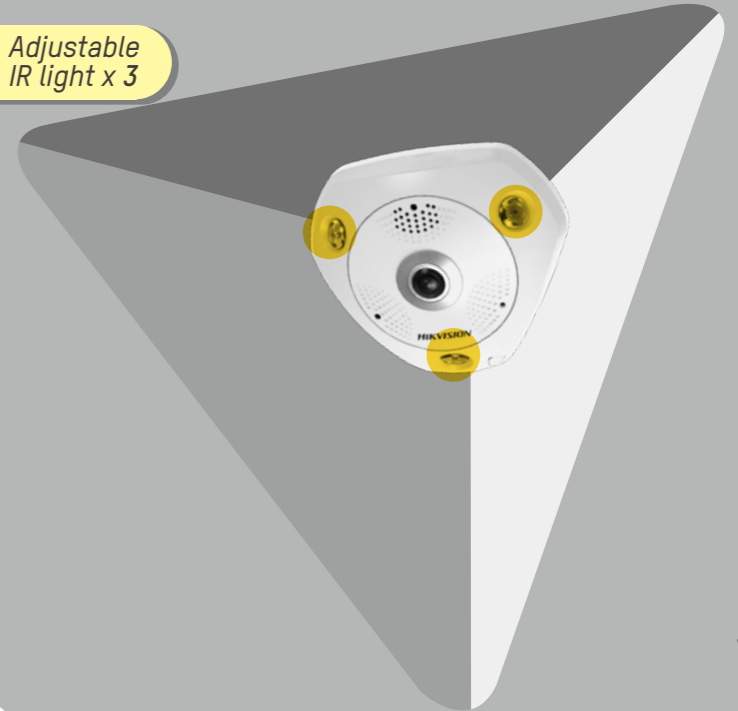

Multiple fisheye cameras can be integrated on HikCentral V1.4 to analyze customer flows in a bigger picture.

Less IR Reflection

Most Hikvision Fisheye Camera models feature three infrared (IR) lights that are individually adjustable. By tweaking the brightness of these lights, IR reflections can be largely reduced for optimal night-time images.

Adjustable IR light x 3

PRODUCT SHOWCASE

- ▶ Enterprise
- ▶ Medium-sized Business

DS-2CD63C5G0-I(V)(S)
DS-2CD6365G0-I(V)(S)

Immersion lens, less distortion
Deep learning algorithms
Visualized business data

Enterprise

Immersion Lens *
Superb imaging & wide angle
(DS-2CD63C5G0 only)

Compatible with Hik-Connect
& HikCentral & I-Series NVRs

Three-Way IR Lights
Individually adjustable

15 view modes, with the Half
Sphere, AR Half Sphere,
and Cylinder modes added

Deep Learning
Heat mapping, people counting,
exportable original data

Two-Way Audio

DS-2CD63C5G0E-I(V)(S)
DS-2CD6365G0E-I(V)(S)

Multiple display modes
Reduced license and
installation costs

Enterprise, Medium-sized Business

15 view modes, with the Half
Sphere, AR Half Sphere,
and Cylinder modes added

Compatible with Hik-Connect
& HikCentral & I-Series NVR

Three-Way IR Lights
Individually adjustable

Two-Way Audio
