Motion detection 2.0
Configuration is easier than motion detection

**Motion Detection 2.0 On by Default** ✔ Human ✔ Vehicle

**or**

Full screen detection by default

You can set detection boxes anywhere you like

# Smart functions by Motion Detection 2.0

Set by default, models with AcuSense technology can detect human/vehicle targets from Turbo HD analog streams, for real-time alert and quick post-event search.

All-channel Human/ vehicle motion detection by default

Sensitivity 80

False alarm reduction ⦿ AI ○ PIR
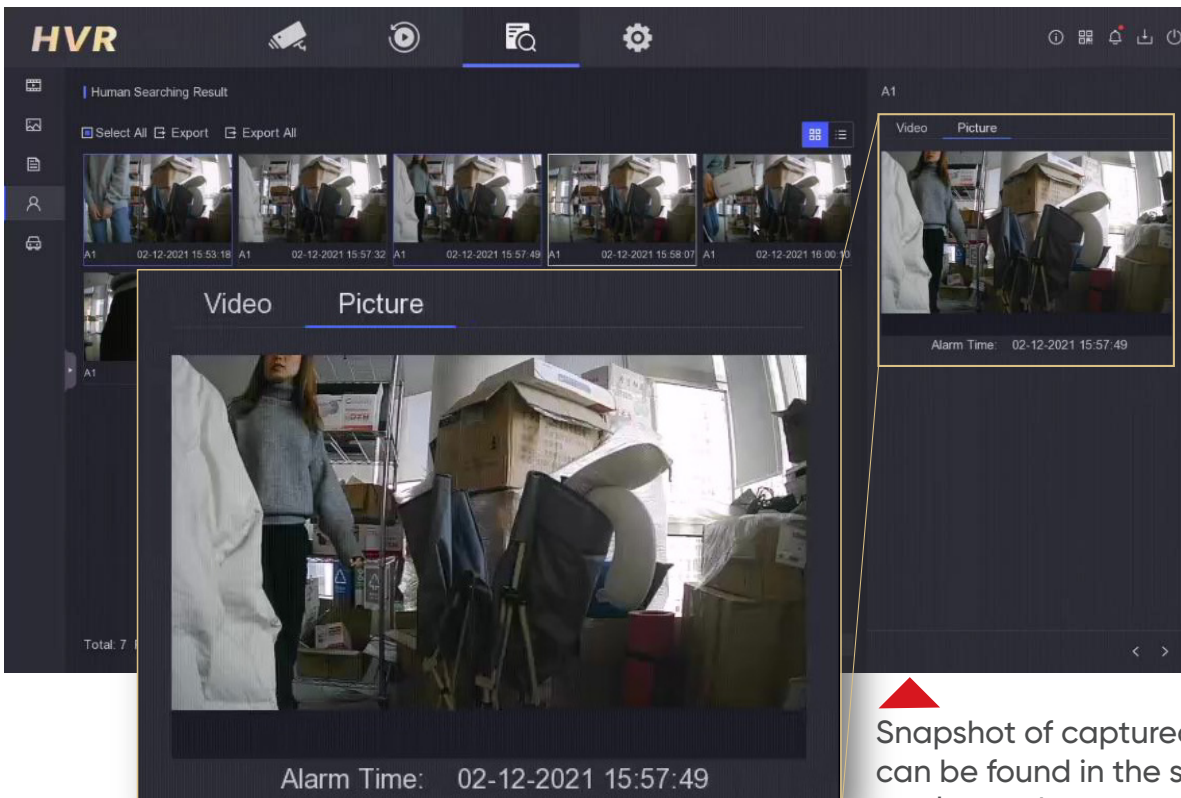

Detection Target ☑ Human ☑ Vehicle

Users may turn to the "target detection" column on the live view window for more obvious notice of detected targets.

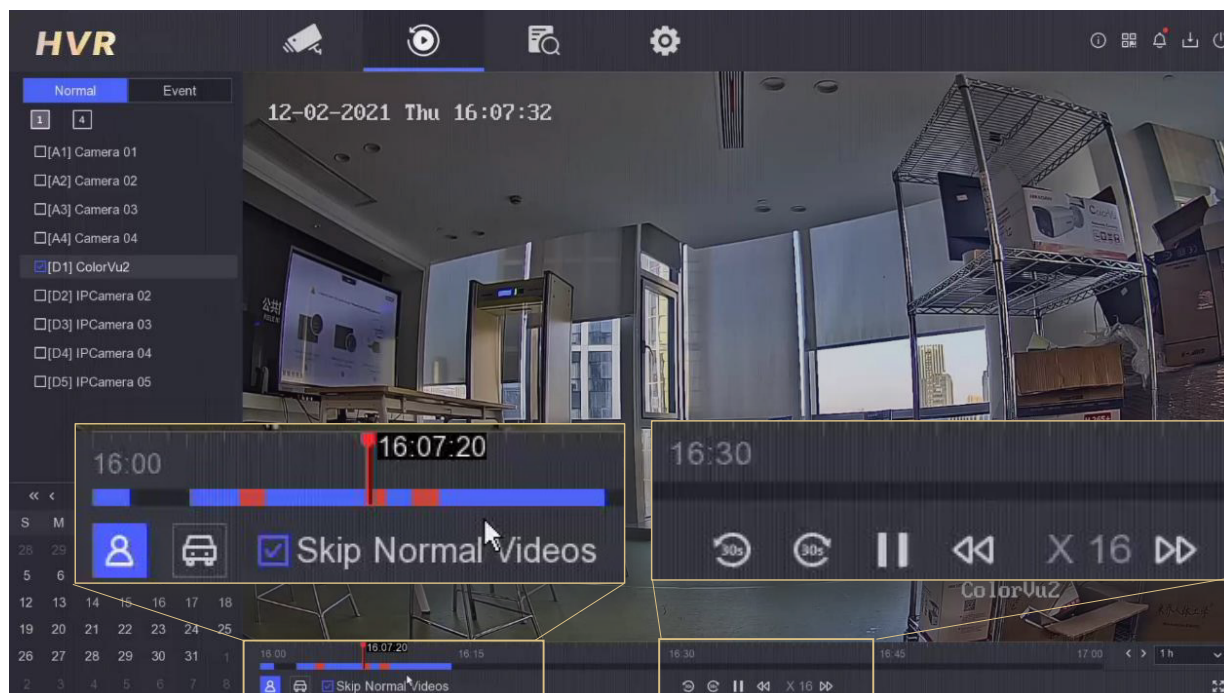

Captured target pictures will pop up on the left.
You can double click to watch the short clip.

Users can easily search for targets and events of the recorded channel.

Snapshot of captured targets can be found in the search results, so that users can easily find the interested targets.

Smart playback is available in case you need to find detailed evidence.

You can skip ordinary footage, or speed it up, and play back events at the speed you like.
Set the playback rule by yourself, and make it as efficient and user-friendly as you wish.
