AR Live Interaction Solution

Reality, above & beyond
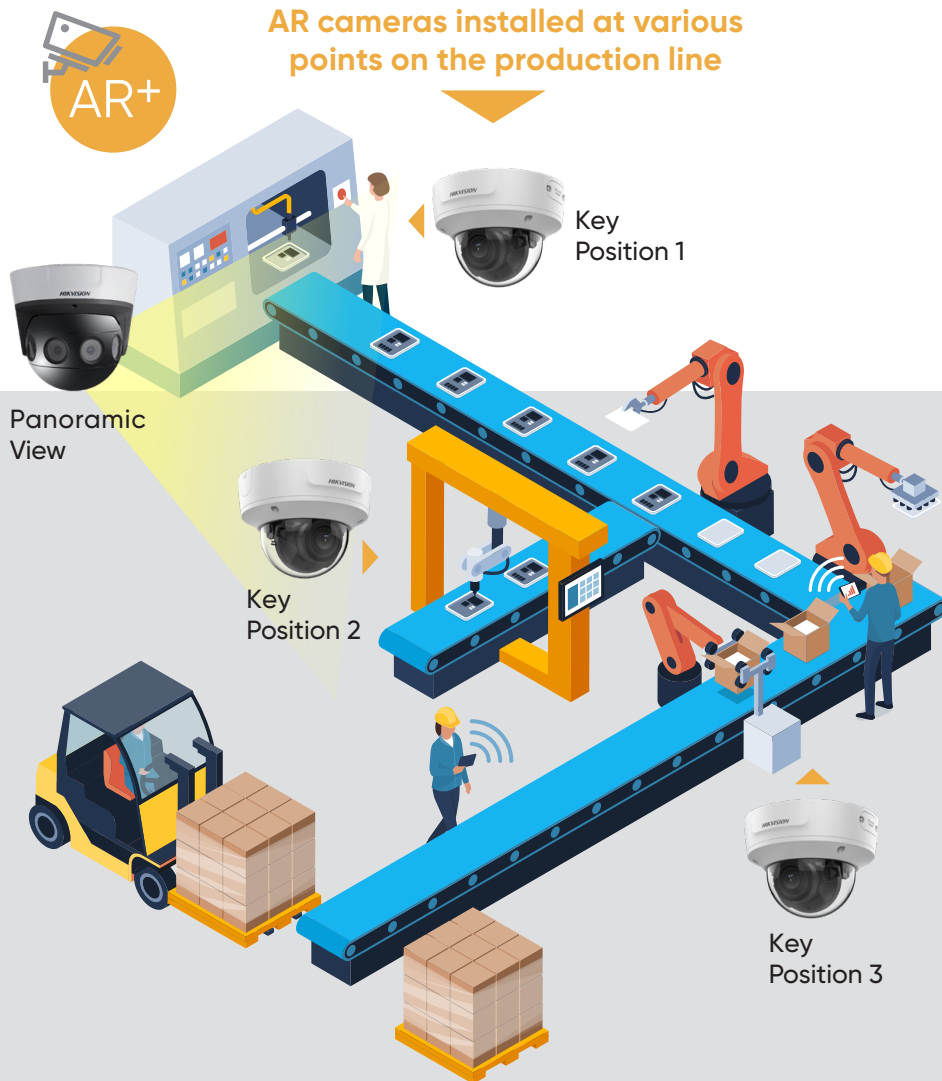

AR LIVE MAP

Managing large-scale scenarios and production process is difficult. That's why Hikvision's Live Interaction Solution, boosted by Augmented-Reality technology, was created.
This AR Live Solution offers an immersive management experience for users with high interactivity and excellent visibility. It takes user's awareness above and beyond the senses, which helps operational efficiency step up to new levels.
Welcome to the augmented digital world. Let's take a closer look...

① Large-scale scenario management, at your fingertips!

- Get a bird's-eye view of the whole physical sit via the intuitive live map with the help of AR.
- Easily filter and click on specific locations for more details as you track through picture-in-picture mode.
- Handle security events almost instantly with easy-to-manage, easy-to-operate control.

AR+

AR cameras installed at various points on the production line

Key Position 3

② Visualize the production process, just as if you were on-site

- The AR production board splits among four screens to give you the complete, on-site situation in real time
- Remote check and instant recovery actions via AR cameras enhance the operational efficiency and minimize down time
- Integrate with existing industrial control systems seamlessly, adding an extra layer of visibility over assets and production processes

Recommended **Products**

TandemVu PTZ

- Captures large areas and sharp details at the same time
- High quality imaging in both bullet and PTZ channels

PanoVu Network Camera

- 180° image splicing to present all scenes covered by the camera
- Built-in heater, ultra-low temperature initializing down to -40° C (-40° F)

Panoramic & PTZ Camera

- High quality imaging with 32 MP resolution, up to two panoramic channels of 5520 × 2400 @ 30 fps
- Excellent low-light performance with DarkFighter technology

HikCentral Professional

- Flexible screen switching among multiple AR cameras
- Multiple AR label functions: Display, management, automatic sync
- Open structure to enable integration with third-party systems
