**THE EDUCATION SOLUTION
FOR EXAMINATION ROOMS**

✦ Pain Points

It is commonplace that students queue for a long line to enter the examination rooms. Manual verification of each student's identity takes a lot of time and is inefficient for the management staff especially during large-scale examinations. While ensuring students' quick access is one of the top concerns, it is also important to enhance the accuracy of students' identity verification to detect possible proxy examinees, contributing to a fairer education environment for all students.

Inefficient onsite management

Manual identity verification takes a lot of time of the management staff.

Proxy examinees

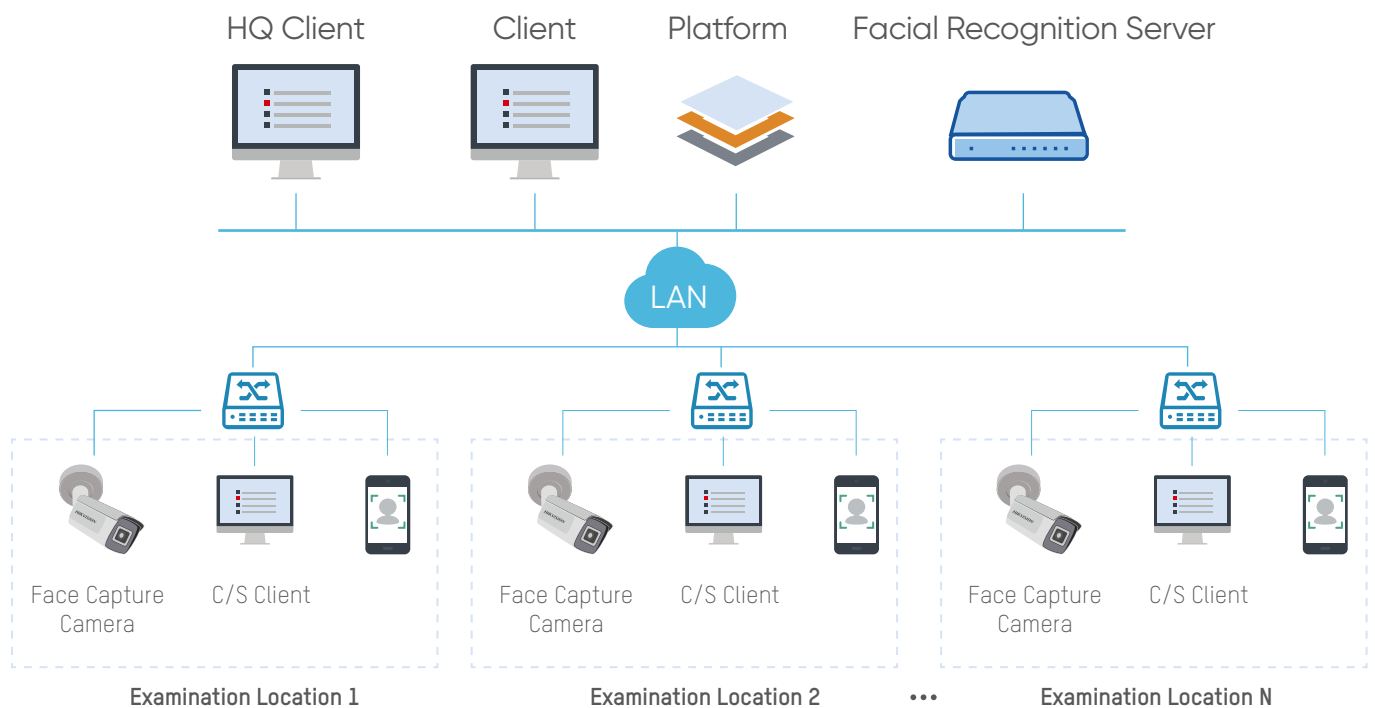

Test-taking proxy destructs the fairness of exams.

Long queuing line

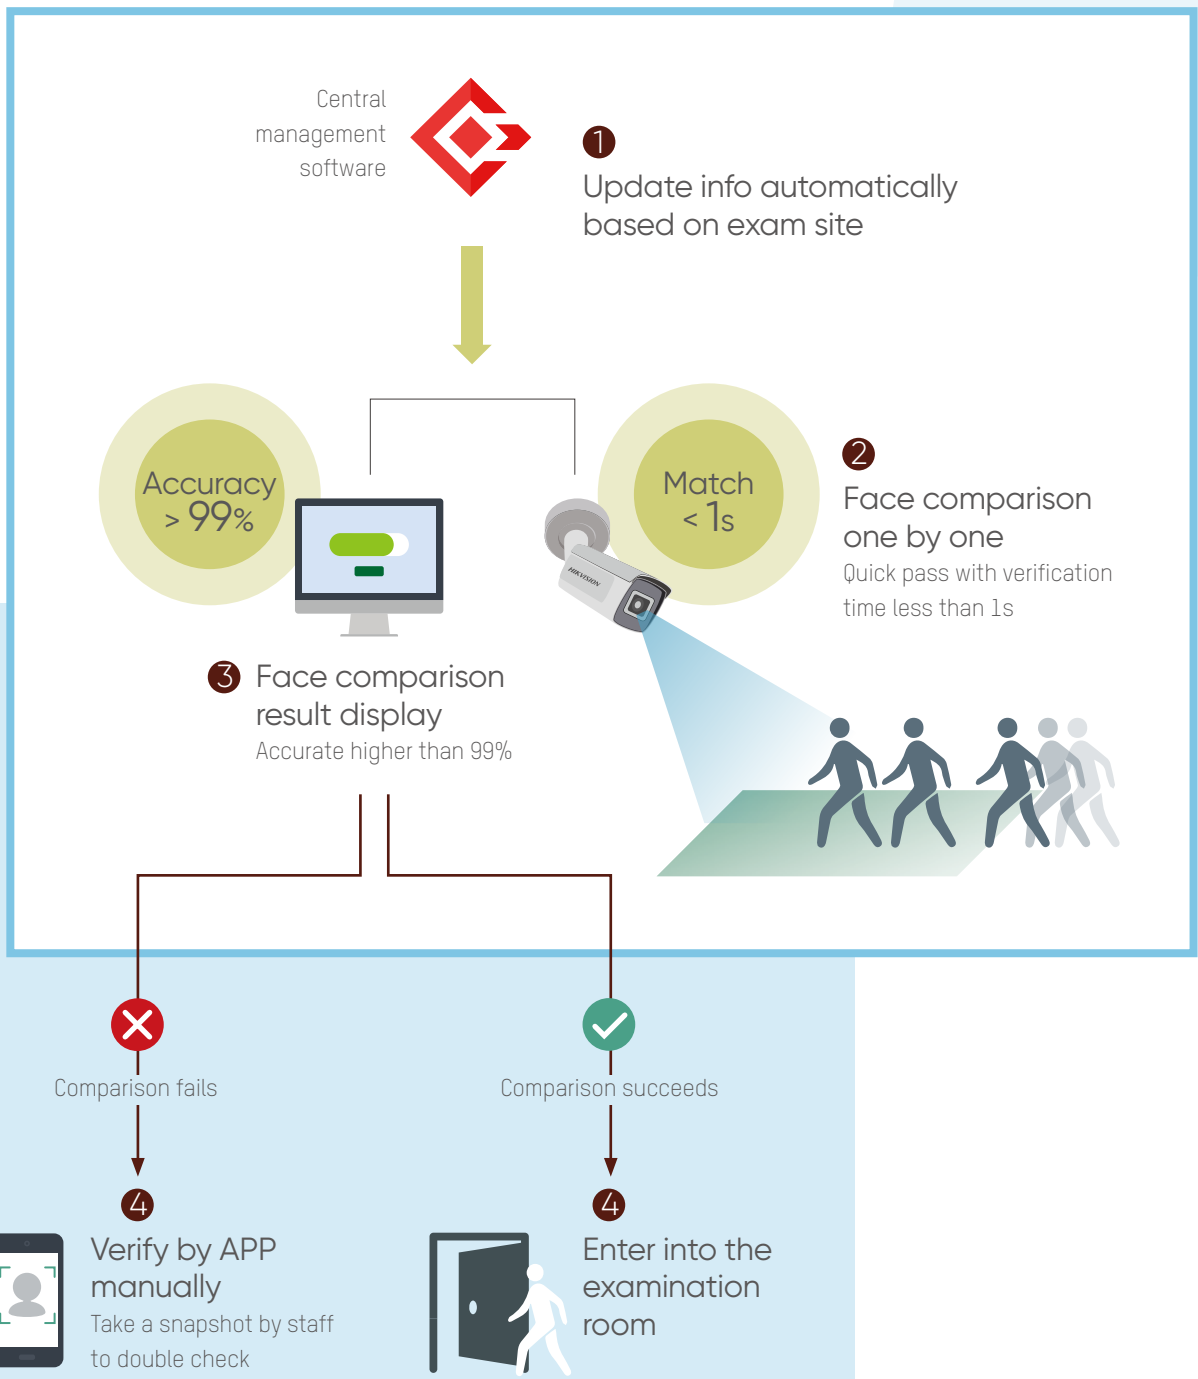

Students queue for a long time when checking in for exams.

✦ System architecture

✦ Higher accuracy & quicker access

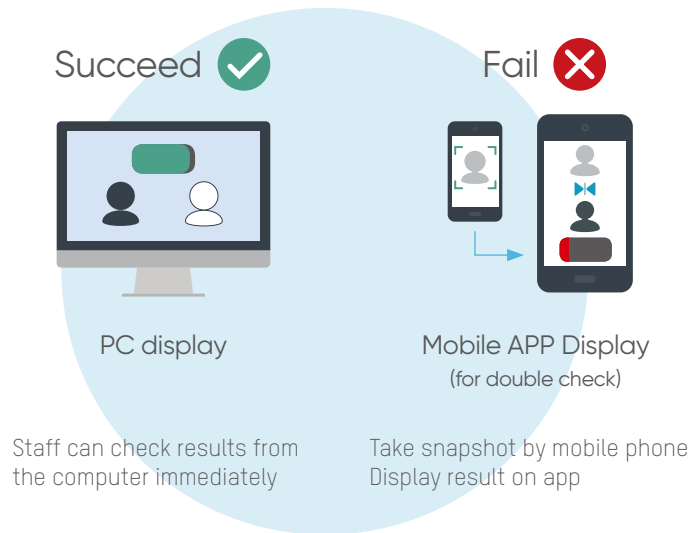

It is one of the top priorities to improve the accuracy of identity verification and contribute to quicker access so as to save students' time.

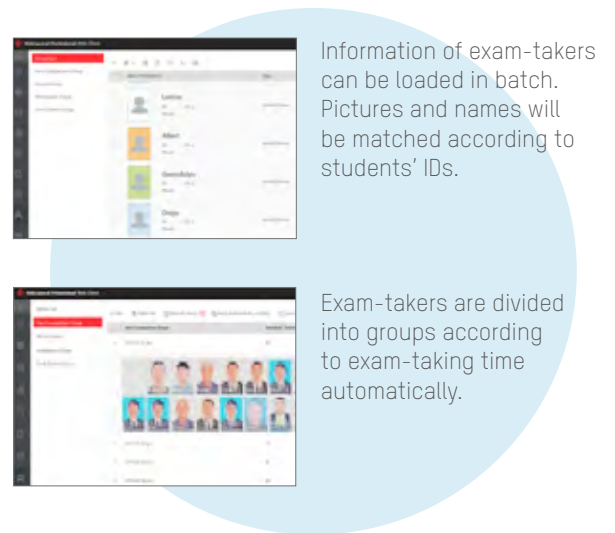

✦ Ease of use

The management staff of the exams can check the verification results quickly via computers and the mobile App HikCentral. The straight-forward result display and automatic file management also lifts their efficiency.

—— Straight forward result display ——

—— Automatic file management ——

✦ Centralized management

Data of multiple exam sites from different cities can be managed in one central station with small bandwidth requirement, *supporting up to 150 million student registration and contributing to more centralized and efficient management.*

Up to **150 million** people can be registered
