

HIKVISION[®]

**THE EDUCATION SOLUTION
FOR SMART CLASSROOMS**

✧ Empower a better education

In today's digital age, new technologies are empowering students to learn more easily, effectively and comfortably via remote online classrooms, which are also transforming the ways that teachers organize classes and supervisors evaluate them.

Remote Online Classroom

Records high quality sessions for students to learn online, overcoming limits of time and distance

Open Course and Course Sharing

Resolves imbalances in teaching resources among multiple campuses, and between urban and rural areas

Course Evaluation

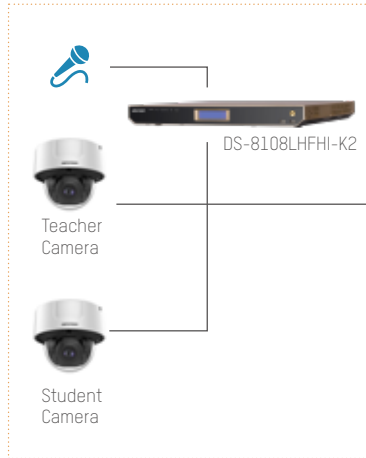

Education departments can use the platform for evaluation of teacher performance and training

✧ Solution workflow

Classroom

- Real-time classroom teaching sharing via data center
- After courses end, the recorded videos will be uploaded to the data center

Clients log into the system on a LAN network or via the internet to watch courses in real-time or play back recorded sessions

Classroom 1

Classroom N

DS-8108LHFHI-K2

H.265/H.264

1080p @ 25/30 fps

8-ch analog video input
5-ch IP video input

2 HDD
Up to 8 TB per disk

3 live view modes
Movie mode
Picture-in-picture mode
Multi-screen mode

✘ Our advantages

Teaching

Online Classrooms

Remote course sharing helps resolve imbalances around teacher and institution resources

Learning

Video Recording and Playback

Increases video resource utilization rates and helps students learn better after classes

Management

Class Observation

Increases observation efficiency and improves the quality of management

Uniform Structure Platform

- Uniform and open structure for multi-system integration
- Easy integration with campus security systems
- Plentiful components and services
- Easy integration with third-party applications

Comprehensive Functions

- Comprehensive functionality covers the whole teaching procedure, including before, during and after classes
- Provides abundant session resources to assist with education information management

Rich High-Quality Educational Resources

- Provides multiple applications, including session live view, playback, interactions, etc.
- Centralized storage and sharing enhances education resource utilization

Deep Learning and AI

- AI system explores diversified applications that improve classroom teaching, based on course videos
- Facial recognition attendance tracking and other intelligent functions lay the foundation for future applications

Classroom-based Security

Combines well with classroom security applications to add value beyond customer requirements

Powerful Configuration and Management

Detailed configurations of classes, semesters, courses, etc., accurately integrate with a school's daily operations
