

HIKVISION[®]

**THE SOLUTION FOR
CAMPUS SECURITY**

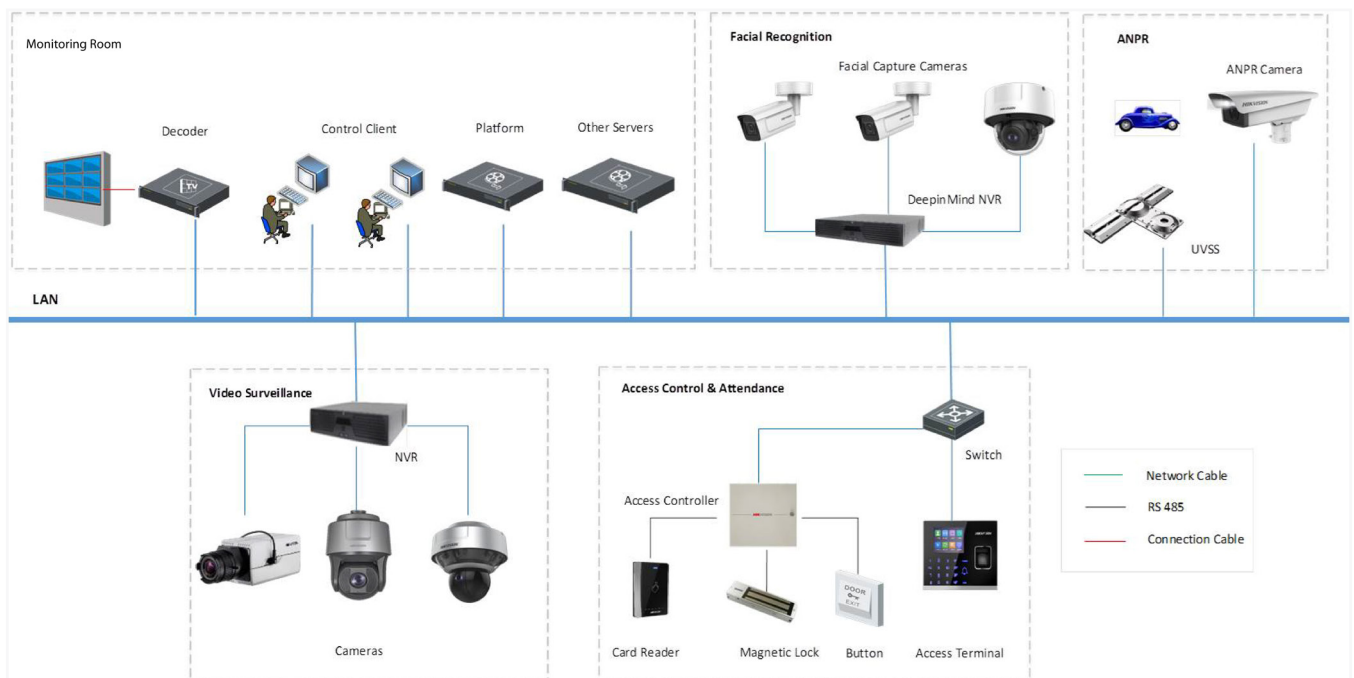

Common Challenges

As students spend the majority of the day in schools, campus security is of paramount importance to every school administrator and every parent. In order to develop an effective security system, all the possible risks - including suspects breaking into campus, stealing, and threatening student safety - must be fully considered. A campus security and protection solution utilizing Hikvision's most advanced network, audio, video, and intelligent recognition technologies, ensures students, parents, and administrators can enjoy a secured and serene learning environment.

System Architecture

People Entrance & Exit Management

School gates are one of the most important places for campus security surveillance. An effective management of persons entering and exiting is the core demand of the school security system.

Access Control

High security level access control by face recognition technology to prevent intruders and warn about blacklist people.

Attendance Check

Smart attendance check based on face recognition technology, with various forms to suit different scenarios.

Visitor Management

A standardized procedure of automatic visiting management.

✕ Student Attendance Check at School Gates and Dormitories

Face recognition terminals and other access control terminals or cameras can be deployed to check students' attendance at school gates and dormitories.

Face Recognition Access Control

It's the most preferred solution, which can in the meantime prevent strangers from intruding into the campus gate or dormitories.

Face Capture Cameras

Face recognition cameras can be deployed at the main roads and dormitory gates to capture faces for attendance, achieving imperceptible attendance check.

Attendance Reports

Face Recognition Terminal

Suitable for scenarios where only attendance check is required but no access control.

Vehicle Entrance & Exit Management

The vehicle management system can be deployed at the school gates to provide quick pass for internal vehicles and manual pass for external vehicles. Different vehicle management security strategies can be configured to meet different security demands.

01

Passing Vehicle Capture Solution

Captures and records passing vehicles and provides search functions.

02

Barrier Gate Control Solution - Stand-alone Edition

Easy to deploy and cost-effective: no need for platform server.

03

Barrier Gate Control Solution- Full Edition

Acts as a module of the integrated security solution.

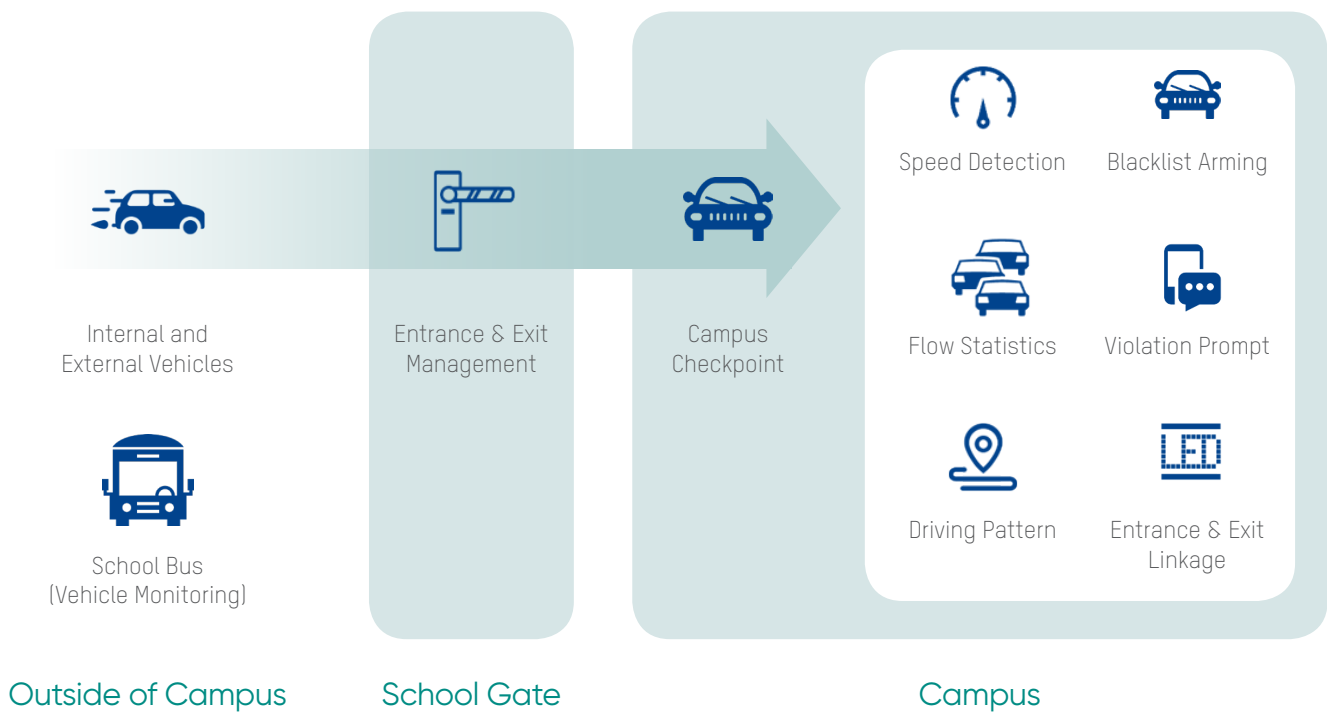

Vehicle Checkpoints

Vehicle checkpoints can be deployed at arterial roads to record passing vehicles, detect speed, and conduct blacklist alarm on unwelcome vehicles.

- Records passing vehicles for search, and provides traffic flow statistics.
- Detects vehicle speed and gives alarm when vehicle speeding detected.
- Supports vehicle pattern analysis, which is useful for vehicle searching.

Passing Vehicle Record

- License plate
- Vehicle type
- Time
- Location
- Direction

Speed Detection

- Real-time speed detection
- Segment speed detection

Vehicle Blacklist Management

- Vehicle blacklist management and alarm

✦ Video Surveillance in Important Scenes

▶ Public Areas

PanoVu Cameras provide a comprehensive view for large open areas as well as clear close-up video surveillance when needed.

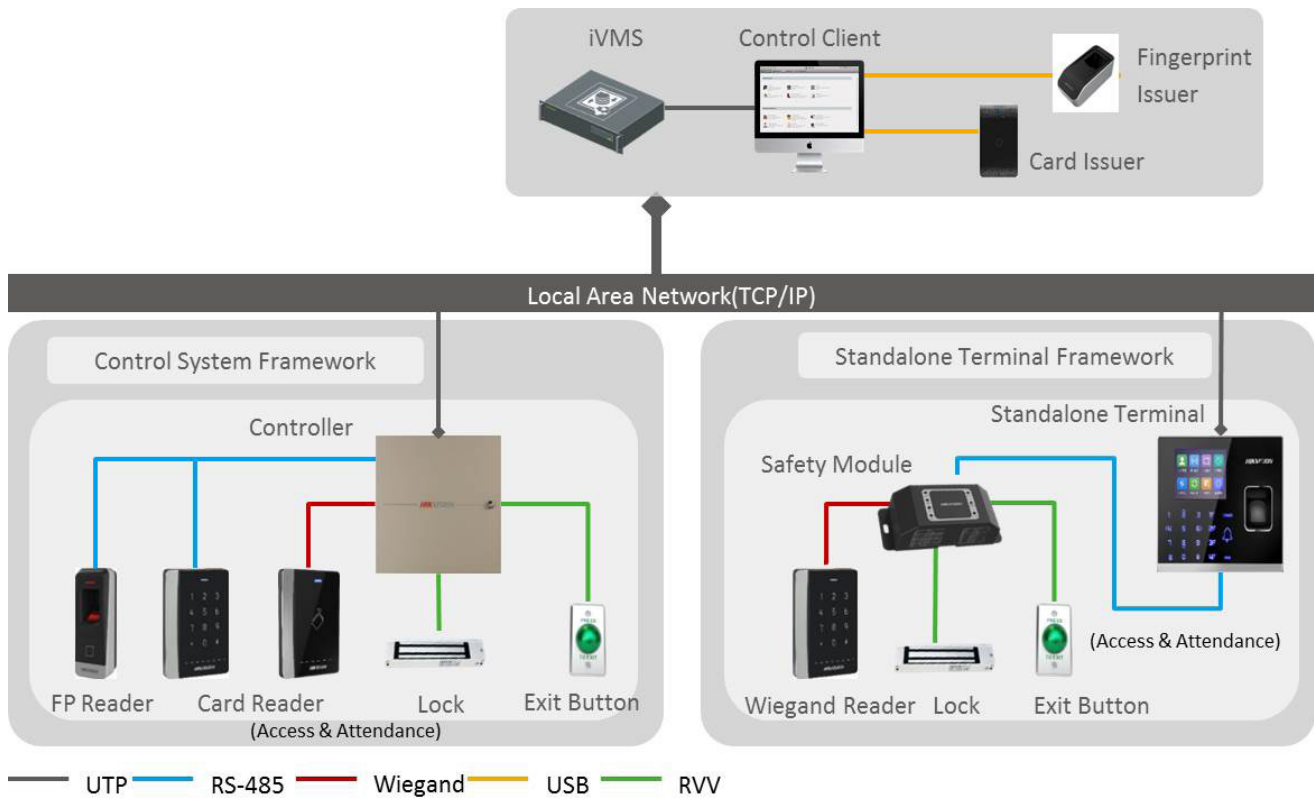

▶ Main Roads

DarkFighter cameras ensure video surveillance of the main roads is clear day and night.

Access Control for Office Areas

For other indoor areas such as meeting rooms, offices, financial offices, and laboratories, access control devices can be used to unlock doors. Users can customize various combinations of cards, fingerprints, or facial information for access credentials.
