

HIKVISION'S INTERCOM

and

ACCESS CONTROL

GO BEYOND VIDEO SECURITY

Why Hikvision?

High Quality Images

Full HD video and images on the intercom door stations are powered by industry leading video imaging technology, giving users a clear view of their front door or entryway.

High System Flexibility and Extension Capability

Hikvision intercom solutions are designed with a high expansion capability, especially on our Two-Wire IP Kit. This enables systems to be easily extended to support more room calling than other market offerings. Power distribution supports cascading which allows you to expand calling capability and gain system flexibility to add more

Easy Setup

Hikvision intercom solutions allow you to select a connection directly from your indoor station or device QR code to setup and connect in seconds, making setup quick and easy.

Access Records with Visual Evidence

Hikvision access control systems can integrate with our video cameras seamlessly on both the NVR and the software platform, bringing an extra layer to access and manage records.

Convenient Mobile Control

Manage intercom devices on the mobile platform. This enables you to open doors and receive calls in a convenient way.
