

EUI OTA Upgrade Strategy and Plan

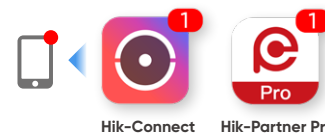

Upgrade push strategy

The first upgrade push is carried out in batches and will cover all versions of the corresponding devices (V4.3.000 or above). Subsequent pushes will cover the first three software versions, and the validity of the upgrade package is one year.

Requirements for receiving the upgrade push

The device needs to be connected to the server to receive the push.

If the device is bundled with Hik-Connect or Hik-Partner Pro, the APP will also receive the upgrade reminder.
