

ColorVu
PT (PAN, TILT)
4 MP CAMERA

Vivid Color Images Around the Clock

Hikvision's ColorVu PT Camera DS-2DE3A400BW-DE pairs our unique ColorVu technology with pan and tilt features for greater coverage. ColorVu is a proprietary imaging technology that provides vivid images and video 24/7, even in zero-light environments, by using a large iris, gentle supplemental lighting, and a high-performance sensor.

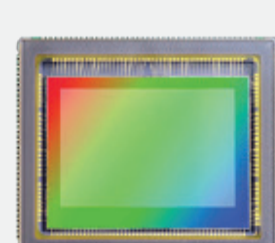

LARGE IRIS

- f/1.0 super aperture (iris) collects more light to produce better images
- 4x the light of conventional cameras

SUPPLEMENTAL LIGHT

- Eco-friendly, warm supplemental lighting adjustable from 0-100 illumination

ADVANCED SENSOR

- Backside illumination (BSI) provides better quality video and images
- Self-adaptive 3D Digital Noise Reduction ensures high quality video and imaging

Conventional camera

ColorVu PT (Pan, Tilt)

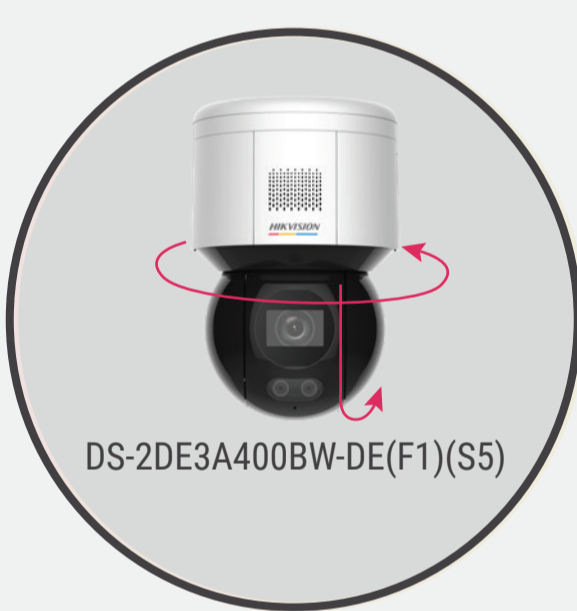

ColorVu PT Camera Features

ColorVu

3-inch 4 mm fixed lens and up to 0.0005 lux

Provides precise detection of objects in any environment by sensing human and vehicle movement versus non-human objects such as rain, animals, and leaves

Real-time alarms provide audible warning and flashing light

Two-way audio to listen and speak using built-in microphone and speaker

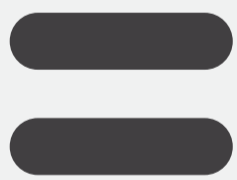

IP-66 outdoor rated for performance in harsh environments

Live Guard: The built-in microphone, speaker and strobe light provide a verbal warning to trespassers or intruders
