

SHAPING INTELLIGENCE

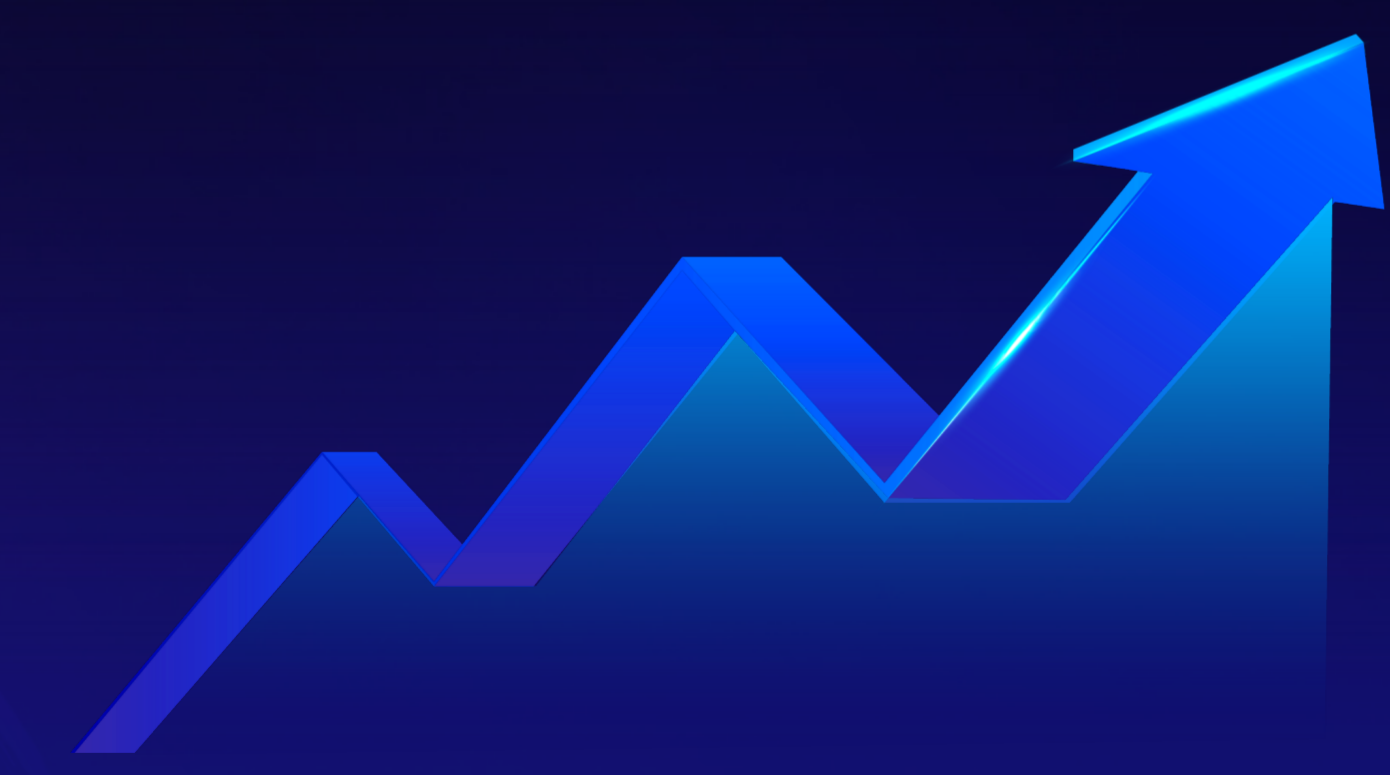

MEET AIOT.
TOUCH THE FUTURE.

AIoT – For Security and Beyond

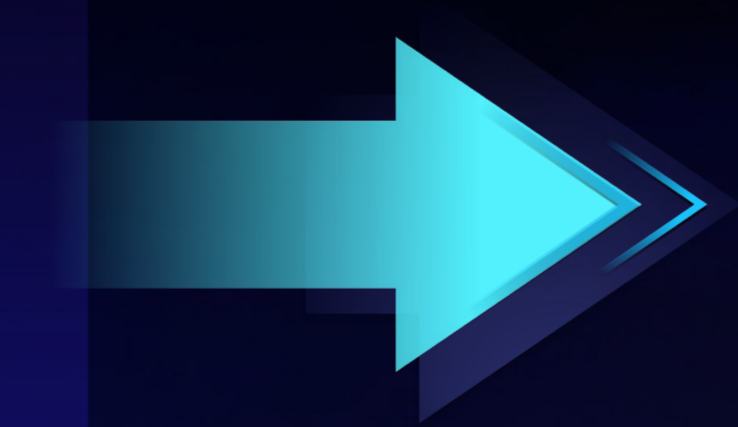

Our Cities Need Smarter Management

More and more urban residents

A 2x3 grid of circular icons representing various urban challenges: traffic (cars), housing (dollar sign and house), energy (plug and dollar sign), climate (thermometer and gear), elderly care (person with cane), and healthcare (mask with plus sign).

New Requirements on Future-ready Cities

Optimized Decision-Making

Resilience to Changes

Increased Efficiency

Leading the Future of Cities with AIoT

AI + IoT = AIoT

**Rich Product
Portfolio**

Creating Intelligent, Digital Infrastructure of Cities

Breaking down Silos with Multidimensional Data

What AIoT enables

- Converging multidimensional data
- Assisting well-informed decision making
- Building an intelligent shield to prevent risks

Building All-encompassing Scenario-centric AIoT Networks Deepening Business Digital Transformation from End to End

Visitor Mgmt.
Access Mgmt.
Parking Mgmt.
Warehouse Mgmt.

Time & Attendance
PPE Mgmt.
Video Security
AR Live View

What AIoT enables

- Converging multidimensional data throughout business processes
- Optimizing efficiency through automation and with overall awareness

Animal Counting
Cold-Chain Transportation
Video Security
Multidimensional Perception

Temperature Measurement
Smart Feeding
Compliance Mgmt.
Food Traceability
