1 Appearance

2 Installation

Installation Environment:

Indoor and outdoor installation are supported. If installing the device indoors, the device should be at least 2 meters away from the light, and at least 3 meters away from the window or the door. If installing the device outdoors, you should apply Silicone sealant among the cable wiring area to keep the raindrop from entering.

The additional force shall be equal to three times the weight of the equipment but not less than 50N. The equipment and its associated mounting means shall remain secure during the installation. After the installation, the equipment, including any associated mounting plate, shall not be damaged.

Wall Mounting:

1 Make sure the gang box is installed on the wall.

You should purchase the gang box separately.

2 Use 2 supplied screws (SC-K1M4×6-SUS) to secure the base plate on the gang box. Route the cables through the cable hole of the mounting plate, and connect to the corresponding external devices' cables. Use another 4 supplied screws (KA4×22-SUS) to secure the mounting plate on the base plate.

3 Align the device with the mounting plate and hang the terminal on the mounting plate.

4 Use 1 supplied screw (SC-KM3X6-H2-SUS) to secure the device and the mounting plate.

5 Apply Silicone sealant among the joints between the device rear panel and the wall (except the lower side) to keep the raindrop from entering.

You can also install the device on the wall or other places without the gang box. For details, refer to the User Manual.

6 After installation, for the proper use of the device (outdoor use), stick the protection film (parts of models supplied) on the screen.

3 Wiring (Normal)

- When connecting door contact and exit button, the device and the RS-485 card reader should use the same common ground connection.
- The Wiegand terminal here is a Wiegand input terminal. You should set the device's Wiegand direction to "input". If you should connect to an access controller, you should set the Wiegand direction to "Output". For details, see the user manual.
- The suggested external power supply for door lock is 12 V, 1 A.
- The suggested external power supply for Wiegand card reader is 12 V, 1 A.
- For wiring the fire system, see the user manual.
- Do not wire the device to the electric supply directly.
- If the interface for network connection is too large, you can use the supplied cable as shown below.

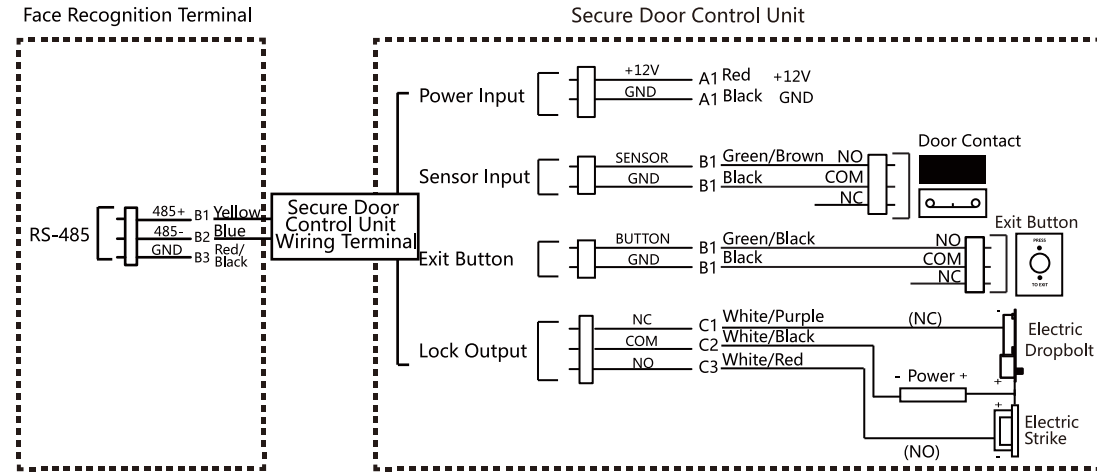

Use only power supplies listed in the user instructions: Make sure the power supply is used indoors, and the working temperature is between 0 and 40 °C.
