

Title:	Accessing Cameras Web GUI From DS-7716NI-SP/16				
Date:	06/06/2014	Version:	1.0	Pages	6
Product:	DS-7716NI-SP/16				
Action Required:	Information only				

When cameras are connected to the built-in POE switch of the DS-7716NI-SP/16 NVR, the cameras are on a separate network which is not accessible from a computer. In various situations there is a need to access the cameras directly. Before, the only way to access the cameras was to plug in the computer directly to the built-in POE switch, change the computer's IP address to match the camera network, and only then access the cameras.

Now there is a much easier way. The new firmware version V 3.1.0 allows direct access to the cameras without all the steps described above.

First, upgrade the firmware of the NVR to version v3.1.0. Connect the NVR to the network. Then log in to the NVR with a web browser..

Go to **“Configuration”** (Figure 1).

Figure 1

Action Required:	Information only				

From “Configuration” go to “Network Settings” (Figure 2).

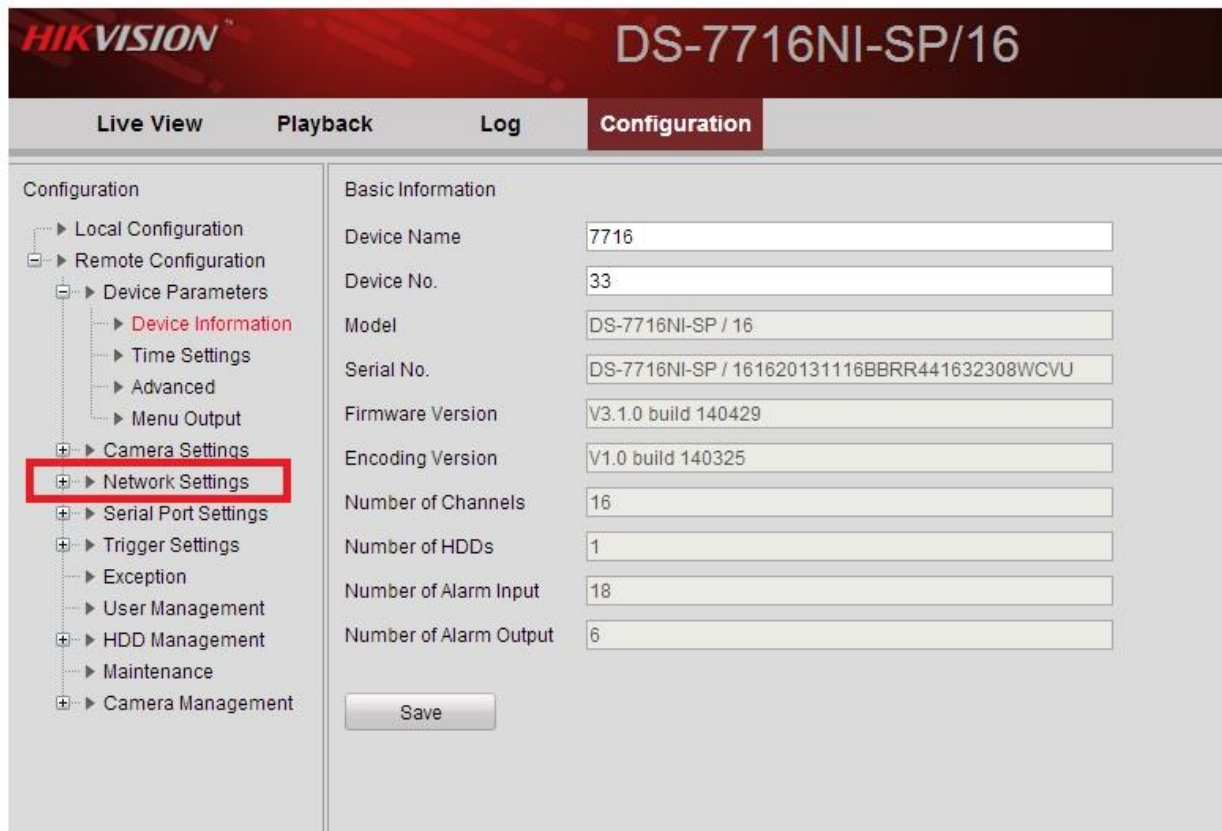

Figure 2

In network settings click on “Advanced” (Figure 3).

Enabling the “**Virtual Server**” will create a NAT (Network Address Translation) policy within the NVR to translate the “internal” 192.168.254.XXX IP addresses to the NVR’s LAN IP with a port number reference. Ports begin at 65001 in an ascending order. So if the IP of camera #4 is 192.168.254.5, and the NVR’s LAN IP address is 10.0.10.74, then after enabling the “**Virtual Server**” the camera’s web GUI is accessible via <http://10.0.10.74:65004>.

All the camera addresses can be found under the “**Camera Management**” menu in the Configuration. (**Figure 5 and 6**).

The screenshot shows the Hikvision web interface for the DS-7716NI-SP/16 device. The 'Configuration' tab is active, and the 'IP Camera' section is selected in the left-hand menu. The main area displays a table of IP camera configurations with columns for Channel No., IP Camera Address, Channel No., Management Port, Status, Protocol, and Connect. Buttons for 'Add', 'Modify', 'Delete', 'Quick Add', and 'Custom Protocol' are visible above the table.

<input type="checkbox"/>	Channel No.	IP Camera Address	Channel No.	Management Port	Status	Protocol	Connect
