DYNDNS Setup Instructions

On the DVR you have:

1. checked the DDNS box to enable DDNS
2. Selected DynDNS as the DDNS service provider from the drop down menu
3. Entered 'members.dyndns.org' as the server address.
4. Entered your DynDNS account Username
5. Entered your DynDNS account Password.
6. Enter the Domain name created on your DYNDNS account

Troubleshooting:

1. Make sure that you have a public perfered DNS server on the network configuration page.
2. Make sure your DynDNS username and password are current and still valid. Log in directly to the DynDNS account to verify this.
3. Make sure your DVR domain name is input properly. Do not need add HTTP://
   i.e. hikvisiontest.dyndns.org
