HikCentral Access Control v2.0
Professional & Lightweight Access Control Made Simple

Highlights

Professional & flexible
Specially designed for access control and time attendance management needs, the platform suits applications and scenarios for small- to medium-sized businesses, bringing flexible solutions for both employees and managers.

Easy to operate
With a clear setup wizard, managers can quickly configure and run HikCentral Access Control based on their actual needs.

Lightweight & convenient
Users can get full functionality even using basic hardware and common web browsers. What's more, users can also manage remotely with an intuitive mobile app.

Benefits for key roles

Easy & convenient
For employees
Employees pass through gates and attendance is taken more efficiently via multiple authentication methods. They can check their own attendance results quickly and apply for exceptions on the portal or mobile app without the need to interrupt their supervisors.

Professional & flexible
For security managers
With the professional and flexible access control management module, security managers can assign various credential methods to employees. What's more, the advanced access strategies can ensure enhanced security for sensitive areas.

Efficient & intuitive
For HR & management staff
User-friendly interfaces and quick setup wizards help supervisors manage employee attendance with great flexibility. They can also arrange shifts and schedules easily. Human resource personnel will enjoy the diverse report template types and automated paper size & orientation when printing.
What is
HikCentral Access Control ?

HikCentral Access Control is Hikvision's lightweight platform for professional and flexible access control, time attendance, and intercom management, making daily operations simpler and more efficient. Small- and medium-sized businesses and those with more complex access control and time-attendance needs can all find the right solution here.

With HikCentral Access Control in hand, it's never been easier to create a top-notch work environment that features unparalleled security, enhanced efficiency for both management personnel and employees.
Core functions
Access control

Flexible access control systems Flexible credential methods, including fingerprint, face, card, QR code, PIN code, Bluetooth, NFC, as well as 512 authentications to choose from to suit hundreds of scenarios

Advanced access strategies for enhanced security Enhanced security with advanced strategies including multi-door interlocking, first person in, anti-passback, multi-factor authentication, and more. Doors can be kept open in emergencies, contributing to safety of personnel.

Interactive E-Maps Dynamic views of multiple sites and access control device status all at the same time, as well as shortcuts to handle events and alarms directly onboard.

Convenient employee badge design and printing Several unique styles and layouts to choose from, with essential information and access permissions.

Employee self-services With intuitive dashboards both via web & mobile app, employees can check by themselves the everyday attendance results and immediately apply for exceptions on their own when needed

Time & attendance

Flexible attendance rule-setting Easy setting and scheduling for normal, man-hour, multiple, or temporary shifts based on specific scenarios for offices, factories, stores, and more.

Diverse set of attendance report styles Provides 30+ of the most common types to choose from. Users can also create personalized report templates based on their needs with exporting in Excel, PDF, and CSV formats, among others.

Easy integration with third-party payroll systems Supports integration with third-party ERPs, HRMS, & payroll systems via database, local files, or SFTP, and support for user-defined fields.
