

HIKVISION

New DVR Pro Series With AcuSense

Delivering an Easy & Efficient
User Experience

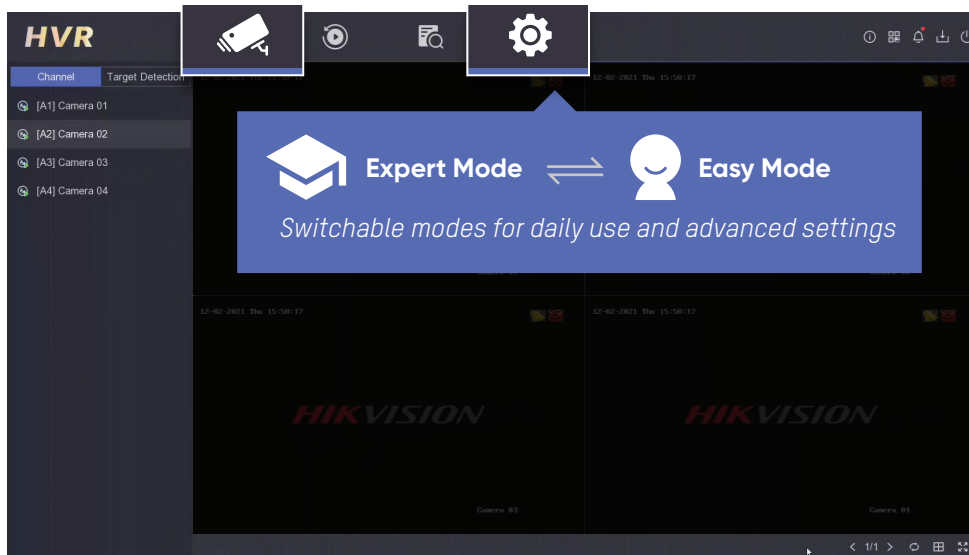

Module Features

User-friendly design and layout

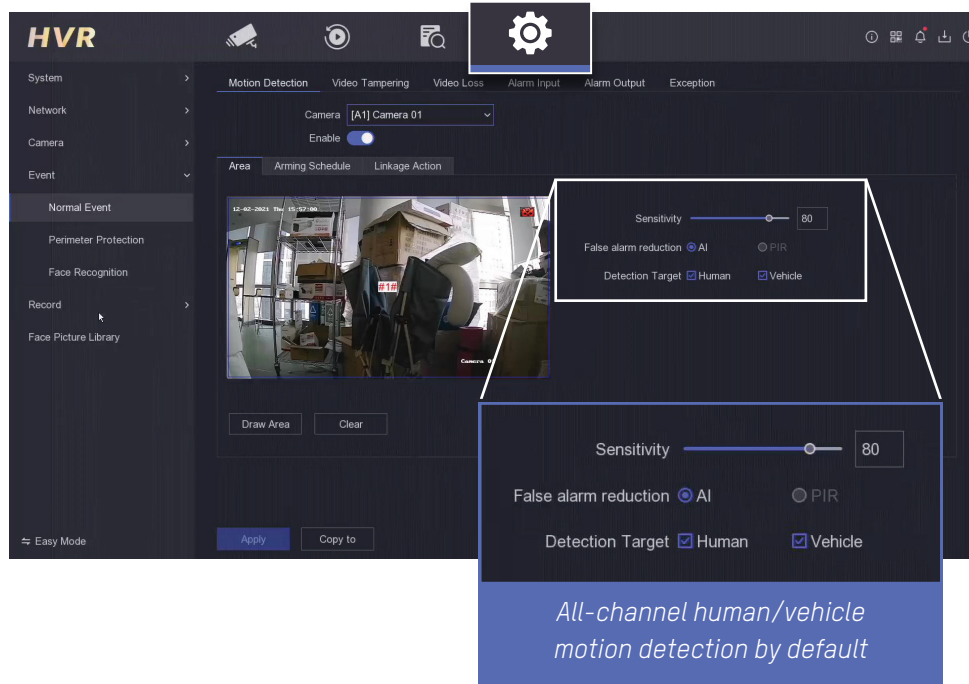

“User-centered” design has become increasingly popular, and Hikvision is right there – creating highly usable and accessible security products. Read on to learn more about how this DVR from Hikvision demonstrates this new trend.

Straight forward column design for intuitive operations, such as Live Viewing, Playback, Search and Configuration

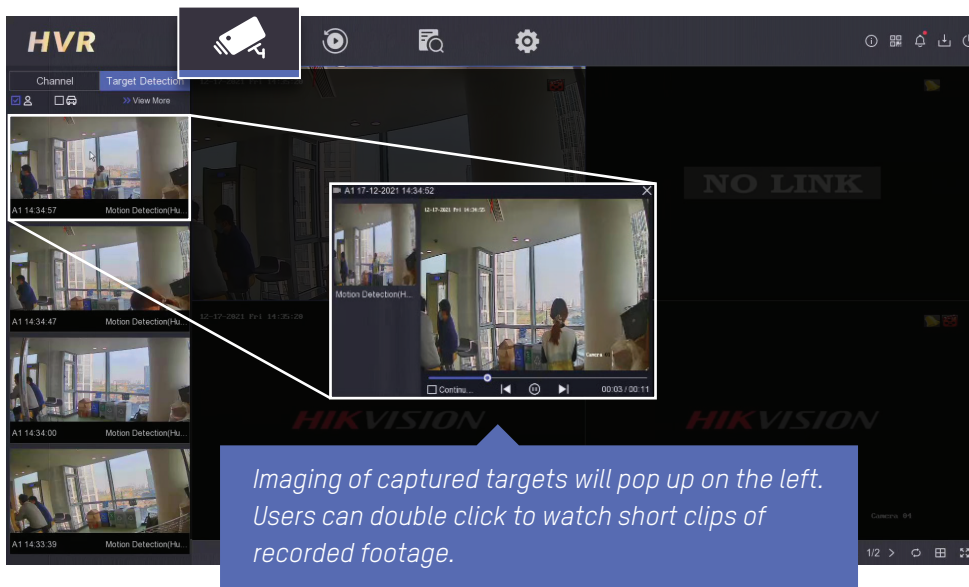

Smart Functions with Motion Detection 2.0

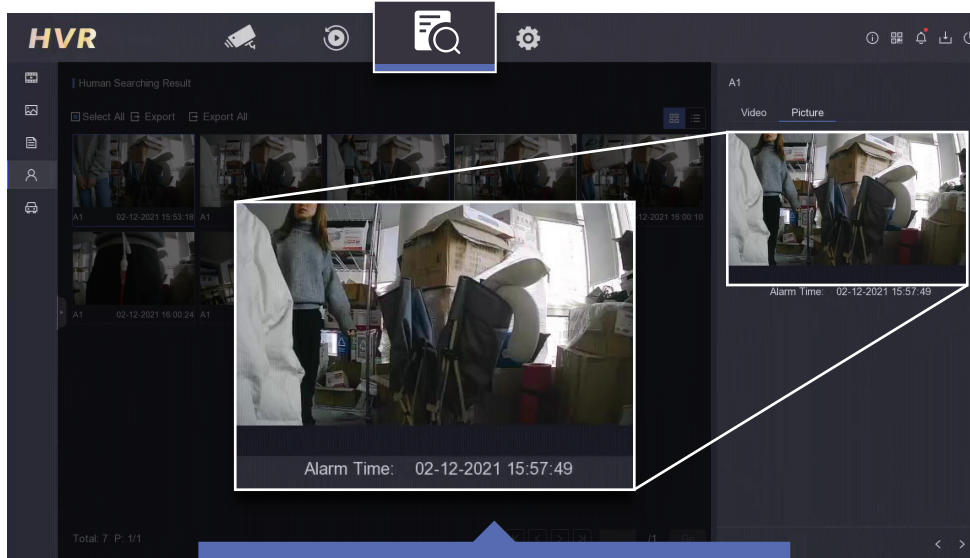

Set by default, models with AcuSense technology detect human/vehicle targets from Turbo HD analog streams, providing real-time alerts and **quick post-event searches**.

Users may turn to the **Target Detection** column in the live view window for more enhanced imaging of detected targets.

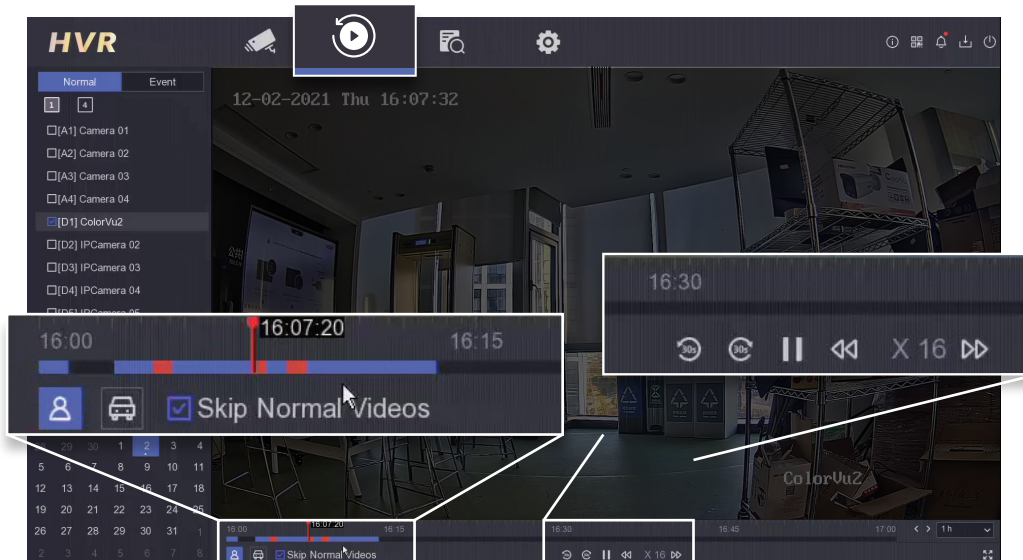

Users can easily **search for targets and events** on the recorded channel.

Captured target snapshots can be found in the search results, so that users can easily find targets of interest.

Smart Playback is available in case you need to find detailed evidence.

Captured target snapshots can be found in the search results, so that users can easily find targets of interest.
