

INTRODUCING OUR SMALLEST TANDEM VU PTZ CAMERA

4-inch TandemVu PTZ Camera

Big Picture & Details in One View

The TandemVu PTZ cameras integrate a bullet camera and a PTZ camera in one unit. The overall view remains visible even during the pan, tilt, and zoom maneuvers. Users get to see everything and miss nothing at any given moment, getting unparalleled situational awareness from the moment they set the camera up.

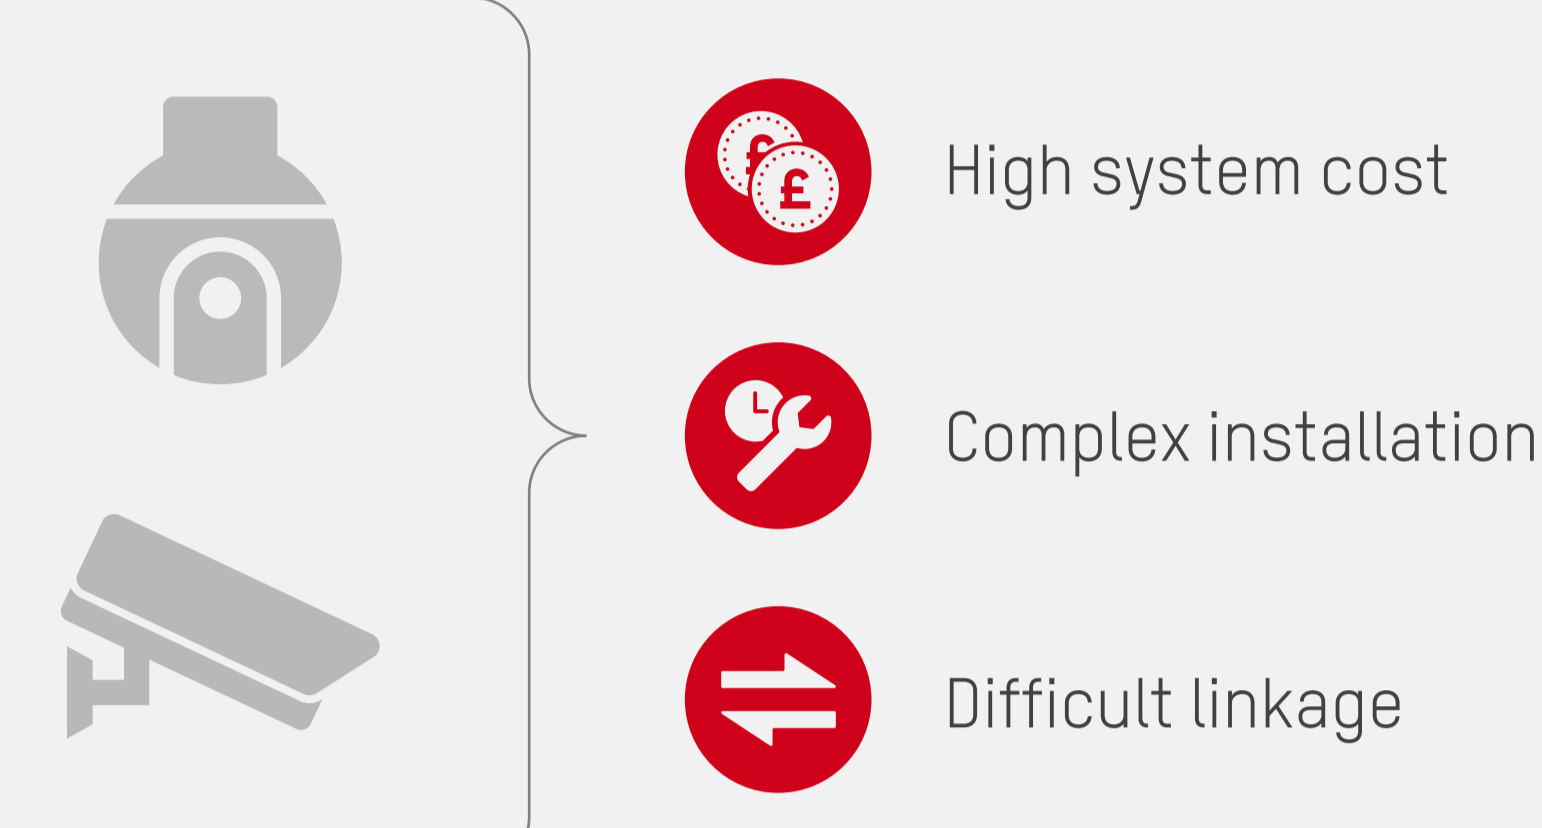

Conventional PTZ Issues

Single PTZ Camera

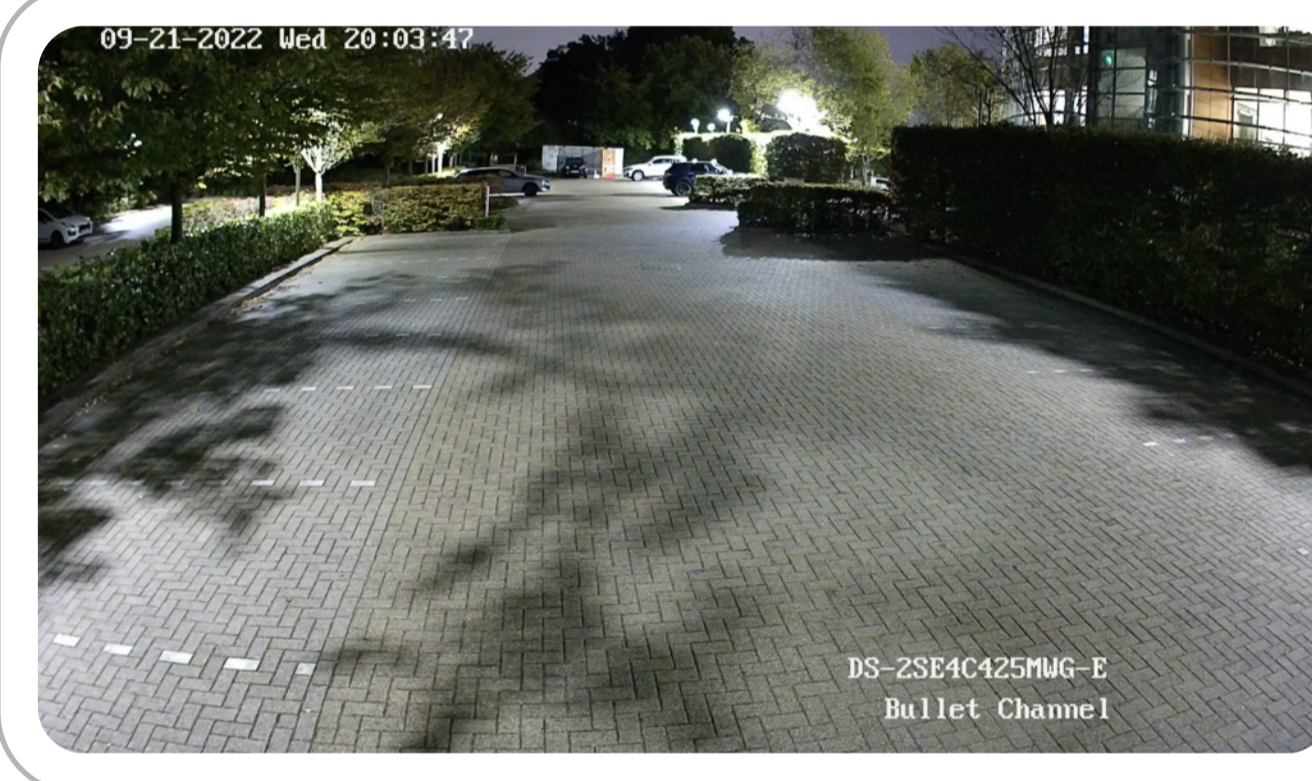

Loses coverage during zoom, pan and tilt manoeuvres

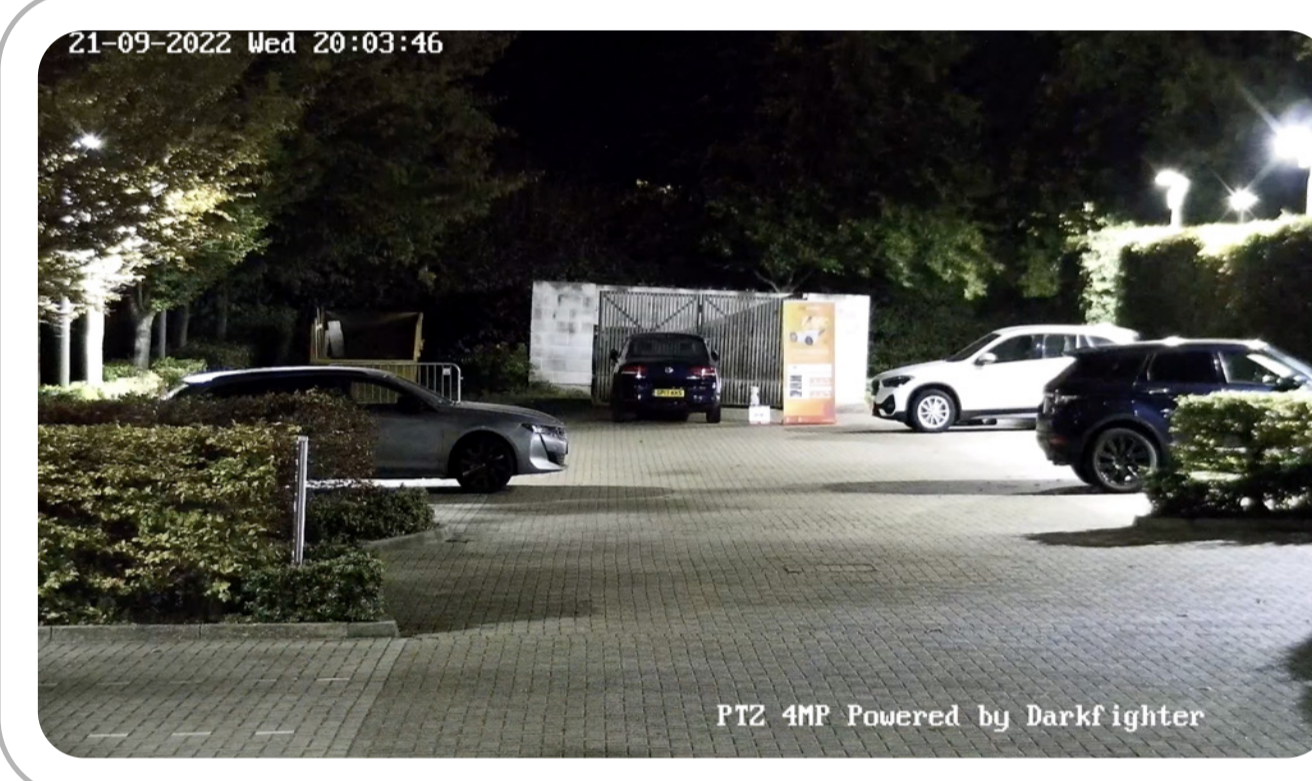

Single PTZ + Fixed Camera

Product Features

Static
ColorVu
Technology

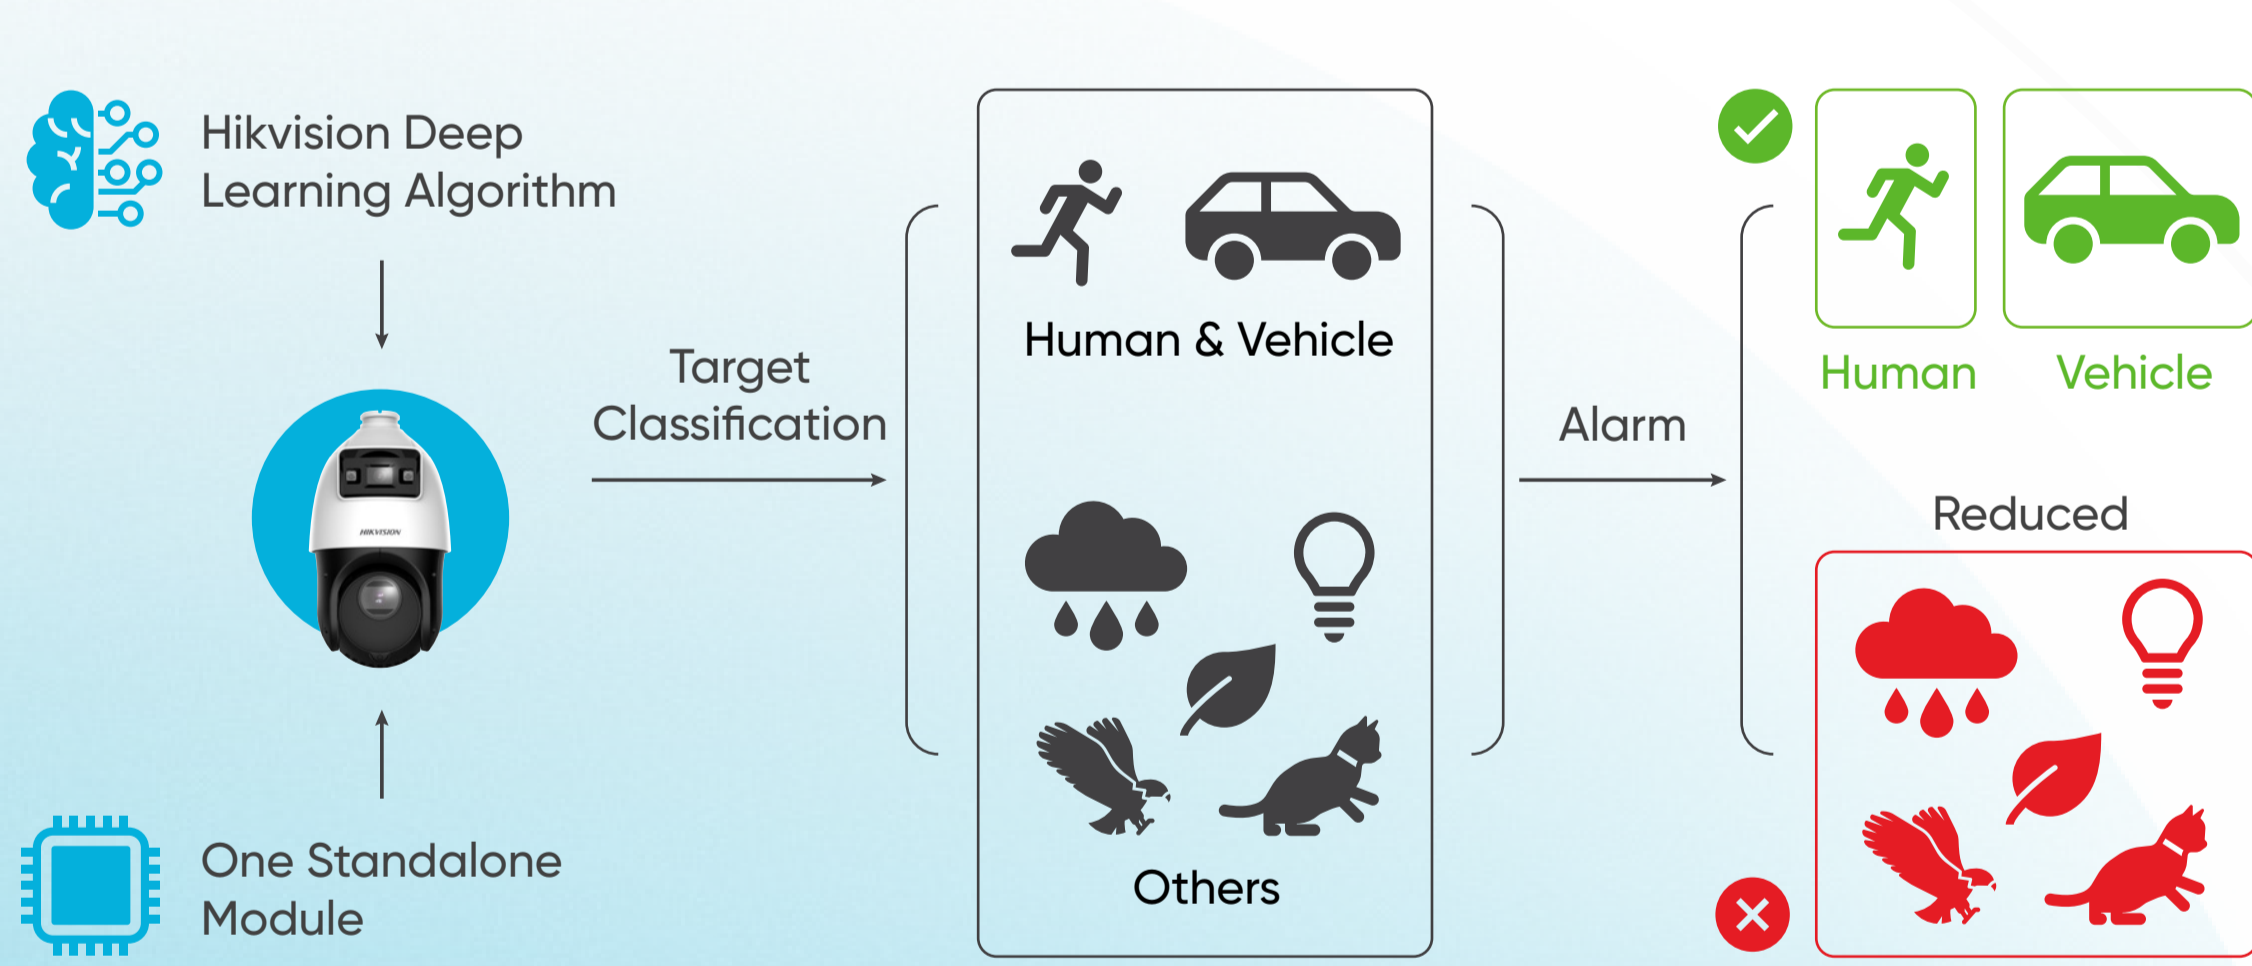

PTZ
Powered by
DarkFighter

3D Positioning improves Live View efficiency

3D Positioning function enables users to view the detailed image from the PTZ channel with high efficiency by marking the target area in the bullet channel. A 3D model is created with automatic calibration results using coordinates and positions of both the bullet and PTZ channels.

AcuSense Technology brings intelligence and efficiency

Accurate Human/Vehicle Classification
AcuSense Technology detects targets and classifies them into human and vehicle categories, while disregarding others.
**AcuSense Technology supported on both channels*

Quick Target Search
Find the video you need faster with classified video footage in Hikvision NVRs.

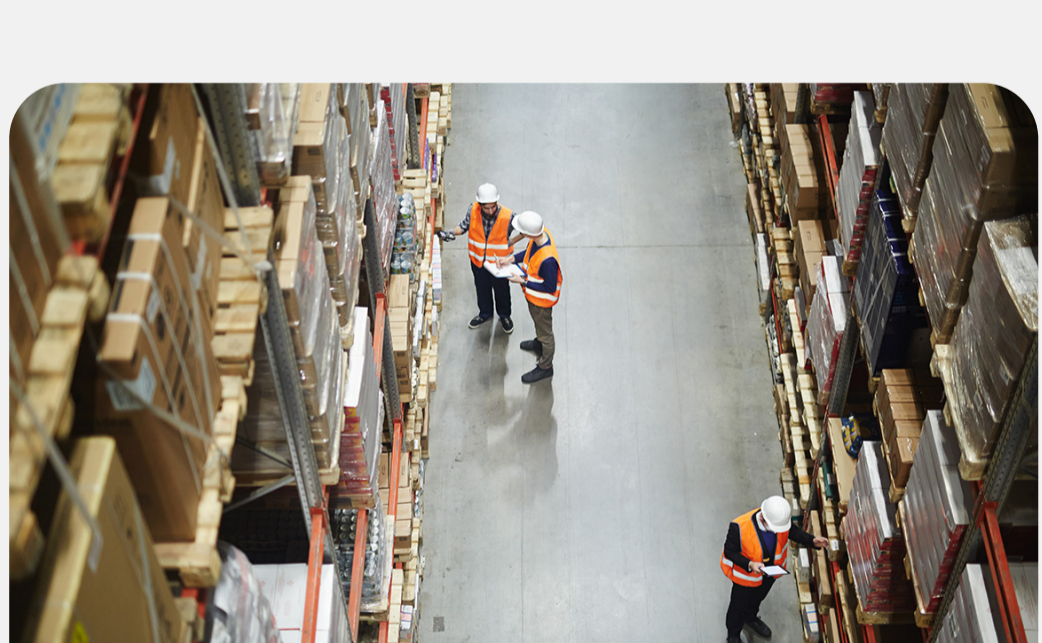

Application Scenarios

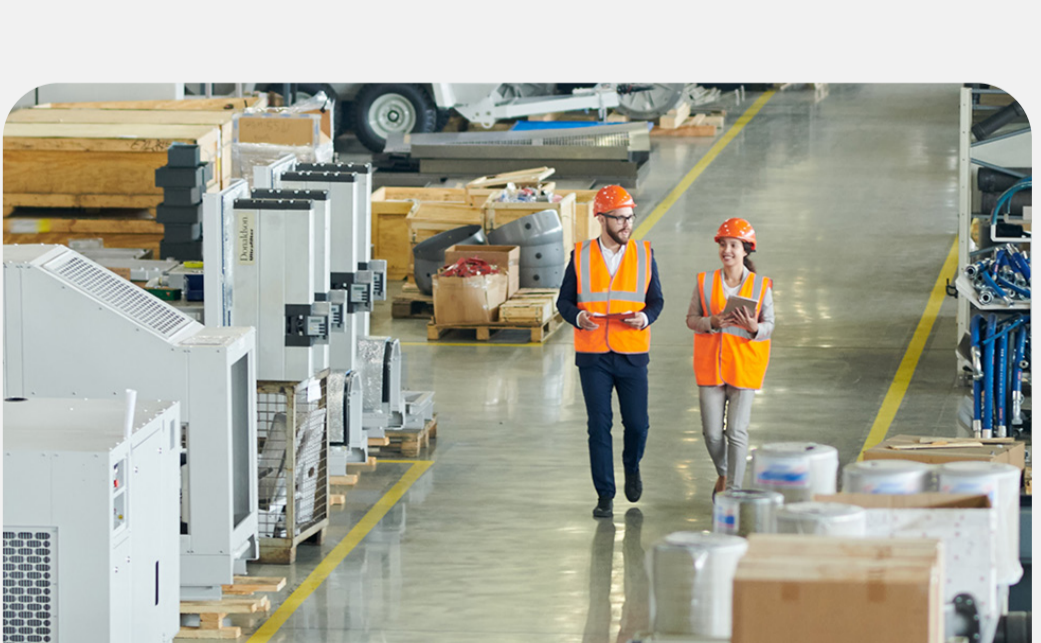

Residences

Shopping Centres

Warehouses

Factories
