MinMoe
FACE RECOGNITION
TERMINAL

MinMoe

Industry pioneer

Hikvision's access control products enjoy the largest global market share, with more than 10 million devices sold worldwide from 2017 to 2021. With an R&D team of more than 1,000 engineers, we continually deliver more innovative products for our customers.

10M+

Devices sold from
2017 to 2021

Our products are used in

150+ countries / regions

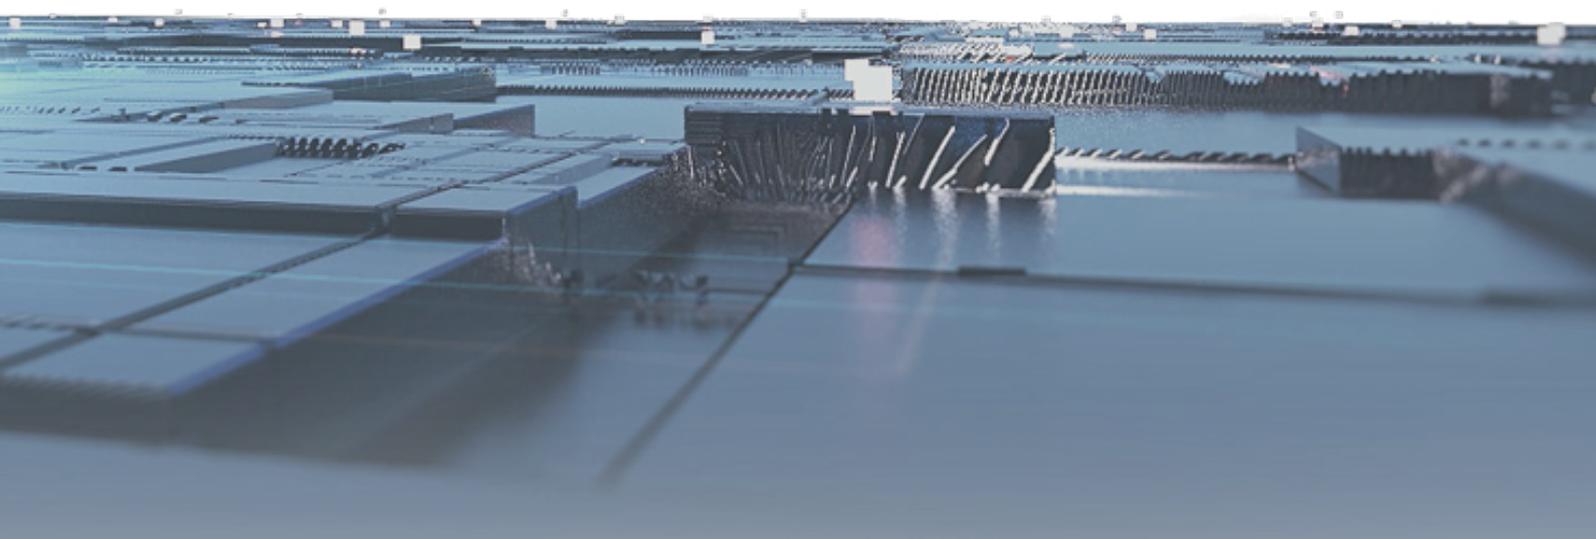

1000+

R&D engineers related to
access control

Subsidiaries and branch
offices globally

Easy, convenient, and tech-savvy for employees

Getting through gates and doors and then taking attendance at the workplace is now faster and simpler with Hikvision's advanced MinMoe Terminals. Users will appreciate the touch-free experience of facial recognition – and even the more tech-savvy iris recognition – every time they use it!

Efficient and safe for management teams

Create a top-notch work environment that features unparalleled security, enhanced efficiency, and advanced technology with Hikvision MinMoe Terminals.

Major functions & applications

Access control

Hikvision's access control solution with MinMoe terminals not only achieves rapid passing through multiple verification technologies, it also provides complete solutions in scenarios requiring higher security levels and a quicker response to emergencies.

Time-attendance

Hikvision's time & attendance solution with MinMoe terminals achieves rapid and flexible record-keeping, with cloud-based and on-premises deployment methods to suit varied business needs. Moreover, it integrates easily with third-party systems.

Visitor management

Hikvision's visitor management solution with MinMoe terminals helps you conveniently manage visitors while providing them with a much better experience, protecting personnel & property and contributing to the building of a comfortable and safe work place.

Product **highlights**

Superior recognition
in any environment

Top level security

Easy to manage
and operate

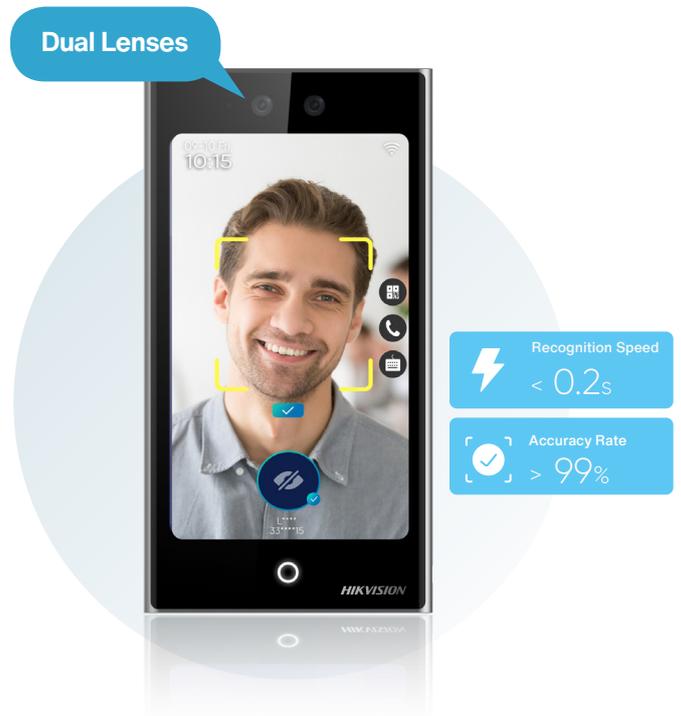

Extensive functionality
via one device

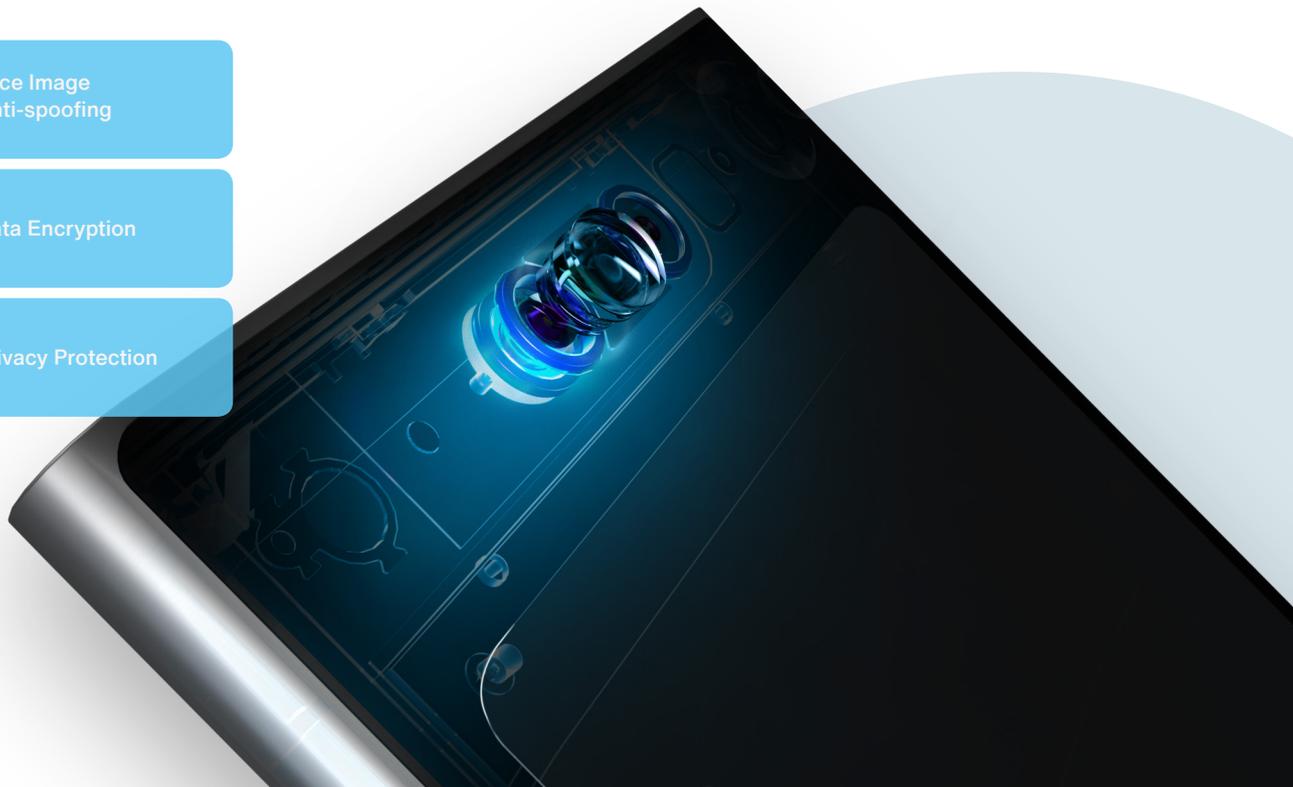

Superior recognition in any environment

Empowered by deep learning algorithms, Hikvision's MinMoe Face Recognition Terminals reach an amazing recognition speed of 0.2 seconds, with an accuracy rate of over 99%. Equipped with dual lenses, the MinMoe terminals perform equally well under low or even zero-light environments.

Top level security

The embedded face image anti-spoofing technology boosts security level at entry points. All user data is encrypted for effective information protection, and the optional privacy protection mode also secures users' personal information.

Easy to manage and operate

Hikvision's MinMoe Face Recognition Terminals support quick and easy registration via multiple access methods, and convenient device configuration via web or GUI as well. More conveniently, users can remotely check live feeds, unlock doors, check event logs, and more via the Hik-Connect App on their smartphone

Extensive functionality via one device

The MinMoe Terminal features extensive functionality with centralized management. Users will enjoy:

- Flexible access control management with multiple authentication methods to choose from, such as face, card, PIN code, and fingerprint
- Convenient video intercom via indoor station or mobile Hik-Connect App
- Remotely check live feeds via the indoor station, Hik-Connect mobile App, or HikCentral Access Control platform

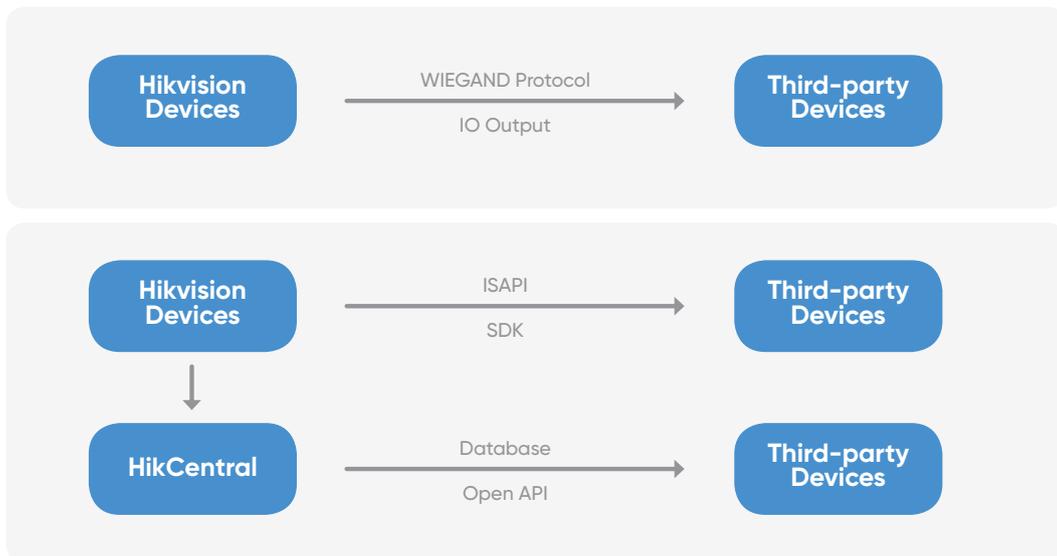

Unparalleled extensibility

The MinMoe Terminal can link with virtually all of Hikvision's devices, including NVRs, indoor stations, alarm devices, network cameras, etc., along with centralized management via Hikvision VMS platforms.

MinMoe terminals can also easily integrate with third-party hardware and software to cater to various scenarios and needs.

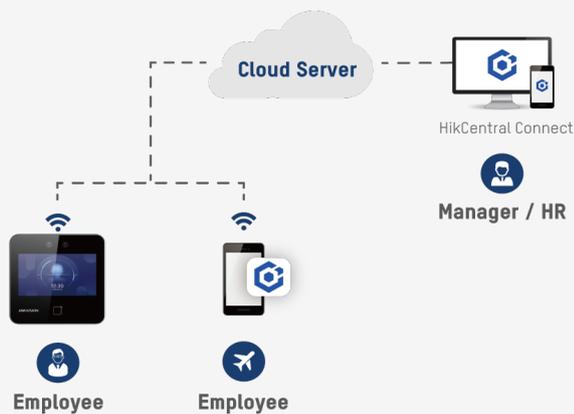

Flexible on-site & cloud-based solutions

The MinMoe terminal comes with flexible deployment solutions for access control and time-attendance tracking. You can either choose a cloud-based or on-site solution based on your needs.

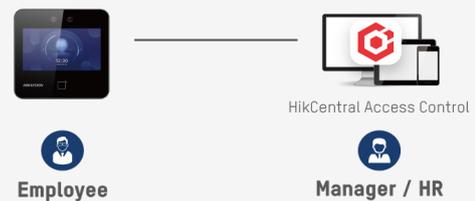

1 *Cloud-based solution*

- Cloud deployment with no server needs
- Flexible access control & time attendance

2 *On-premise solution*

- Lightweight local deployment
- Professional access control & time attendance management

HikCentral Connect is Hikvision's VSaaS platform for unified security management of multiple sites on the cloud, including video security and on-board monitoring, with more to come.

Android

IOS

HikCentral is Hikvision's security management software that helps professionals integrate and manage security, access control, attendance systems and more.

HikCentral Access Control is a lightweight software program for professional access control and time-attendance management.

Value Series for Distribution Markets

DS-K1T341C series

- 2 MP camera
- 4.3-inch touch screen
- 3,000 face capacity
- 3,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485, USB interface
- IP65
- 3,000 fingerprints (optional)

DS-K1T342 series

- 2 MP camera
- 4.3-inch touch screen
- 1,500 face capacity
- 3,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485, USB interface
- IP65
- 3,000 fingerprints (optional)

DS-K1T343 series

- 2 MP camera
- 4.3-inch touch screen
- 1,500 face capacity
- 3,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485 USB interface
- 3,000 fingerprints (optional)

DS-K1A340 series

- 2 MP camera
- 4.3-inch touch screen
- 1,500 face capacity
- 300,000 event capacity
- TCP/IP, Wi-Fi, USB interface
- 3,000 fingerprints (optional)
- On-device time-attendance

DS-K1T320 series

- 2 MP camera
- 2.4-inch non-touch screen
- 500 face capacity
- 1,000 card capacity
- 100,000 event capacity
- TCP/IP, Wi-Fi, USB interface
- 1,000 fingerprints (optional)

Pro Series for Project Markets

DS-K1T673 series

- 2 MP camera
- 7-inch touch screen
- 10,000 face capacity
- 50,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485, USB interface
- IP65
- 10,000 fingerprints (optional)

DS-K1T642 series

- 2 MP camera
- 4.3-inch touch screen
- 6,000 face capacity
- 10,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485, USB interface
- 5,000 fingerprints (optional)

Ultra Series for Project Markets

DS-K1T981 series Iris Recognition Terminal

- 2 MP camera
- 8-inch touch screen
- 10,000 iris capacity
- 100,000 face capacity
- 100,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485,USB interface
- IP65
- 5,000 fingerprints (optional)

DS-K1T690 series

- 2 MP camera
- 15.6-inch touch screen
- 100,000 face capacity
- 150,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485,USB interface
- IP65
- 10,000 fingerprints (optional)

DS-K1T680 series

- 2 MP camera
- 8-inch touch screen
- 100,000 face capacity
- 100,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485,USB interface
- IP65
- 10,000 fingerprints (optional)

DS-K1T673T series

- 2 MP camera
- 7-inch touch screen
- 100,000 face capacity
- 500,000 card capacity
- 150,000 event capacity
- TCP/IP, Wi-Fi, RS-485,USB interface
- IP65
- 10,000 fingerprints (optional)

Face Recognition Modules for Turnstiles

DS-K5671-ZH/ZV/ZU

- 2 MP WDR dual camera
- 7-inch touch screen
- 50,000 face capacity
- 20,000 event capacity
- TCP/IP, RS-485
- IP65 for ZV and ZU
- Supports IO output and Wiegand out
