**(2) Description of retrospective adjustment to prior comparative data for the implementation of the new revenue standard since 2020.**

Applicable Inapplicable

The new revenue standard establishes a new revenue recognition model for regulating revenue from contracts with customers. According to the new revenue standard, the method of revenue recognition should reflect the entity's mode of transferring goods or services to customers, and the amount of revenue should reflect the amount of consideration that the entity expects to be entitled to due to the transfer of such goods and services to customers. At the same time, the new revenue standard also regulates the judgments and estimates required for each step of revenue recognition. The Company only adjusted the cumulative impact of contracts that have not been completed on January 1<sup>st</sup> 2020. For contract changed before or on January 1<sup>st</sup> 2020, the Company adopted a simplified approach to all these contracts based on the final arrangements on contract changes, identified the fulfilled and unfulfilled performance obligations, determined the transaction price, and allocated the transaction price between the fulfilled and unfulfilled performance obligations.

The impact of the implementation of the new revenue standard on January 1<sup>st</sup> 2020 balance sheet items is as follows:
