# Automatic Number Plate Recognition

The ANPR camera has wide application scenarios, such as car park management, roads in industrial parks, public transportation monitoring etc. With HikCentral Professional system, Hikvision provides an end-to-end solution with an easy-to-use and powerful vehicle management solution.

# Core Technology

Our ANPR camera utilises deep-learning algorithm to accurately capture and identify license plate numbers, even in extremely dark environment or bad weather conditions.

## Edge computing

## High-performance image sensor

# Innovative Applications

ANPR technology is already being rolled out across the world with many applications you may already be experiencing in business or day-to-day life. Here are just a few innovative ANPR applications we've created at Hikvision that are currently used in Australia and New Zealand that could benefit your business or organisation.

## Industrial Parks

### 1. Gate Control

Greatly reduce costs and save on labour and maintenance expenses when compared with call button or card access gate solutions.

### 3. Loading Docks

Maximise operation efficiency and avoid parcel mismatch and congestion. Perfect for a busy logistic distribution centre.

### 2. Weighbridges

Remove all complexity with a fully automated weighbridge process eliminating the need for manual operated weighbridges.

### 4. Speed Limit

Maintain workplace safety with a powerful system that helps combine vehicle REGO with driving speed.

## Retail Stores

### 1. Drive-thru

Transform the traditional drive-thru experience. Our ANPR cameras streamline the process of ordering through the drive-thru with online orders and in-store pickup services.

### 2. Petrol Pumps

Protect your pumps with our theft prevention system. Lock pumps so they're only released with payment. Ward off criminals with an alarm warning and help the police identify criminals with video footage.

### 3. Ticketless Parking

Greatly reduce maintenance costs with a ticketless parking system. Also promotes a safe and contactless system that's simple to manage.

## Smart City

### 1. Public Car Parks

Our ANPR camera and smart parking system can greatly help Australia councils improve the efficiency of public parking.

### 2. City Streets

Installing ANPR cameras on roadsides can help councils build smarter and safer city streets. Retrieve statistics, trends, real-time alert for vehicles of interest and massively reduce time when searching for specific vehicles.

### 3. Residential Areas

Reduce speed in residential areas. City councils can use our speed camera technology to detect and display vehicle speeds that can help control the speeding and reduce incidents.
