- Temporary:** Constructions, Special Events
- Other sites:** Mining, Dam, City Roads, etc.

Camera: DS-2XS6A87G1-L  
Battery: DS-2FSCH30

## FAQ

**Q: How long will the battery last?**

**A: It will not run out of power in most occasions!**

The battery should be fully charged with an external 12VDC power adapter prior to installation. Once installed, the solar panel will continue to charge the battery whenever there is sunlight. The camera also includes a 'standby mode' which is activated when the battery level falls below 20%.
