Action Required:	Information only	Information only					

Arecont 180 degree (AV8185) cameras have 4 imagers, yet only 1 IP address. The camera outputs 4 in dependent streams- one stream per imager. This creates a question: "How to add an Arecont 180 degree camera to a HikVision NVR?" Here are two ways for adding: Web Browser and Local Menu.

#### **Web Browser**

From the configurations go to the "Camera Management" (Figure 1)

Figure 1

This will populate the list of the cameras currently connected to the NVR -Online or Offline (Figure 2).

Figure 2

Action Required:	Information only	Information only					

We need to repeat these steps for the second, third and fourth streams (Figure 6)

Figure (6)

After adding each stream, we need to manually change the stream number. For this, click on the second stream and press "MODIFY" (Figure 7).

Figure 7

#### **Local Menu**

From the configurations go to the "Cameras Setup" (Figure 1)

Figure 1

Now, we are going to manually add the Arecont camera. Press "Customer Adding" (Figure 2). After that, enter the camera's information into the respective fields (Figures 3). You will see the information and click them all (Figure 4).
