

ColorVu G2

Full Colour in Complete Darkness with AcuSense Features

2nd Generation (G2) ColorVu Cameras

Hikvision ColorVu G2 cameras deliver the crisp, full colour images and video around the clock you expect with ColorVu technology. Plus, the 2nd generation models are equipped with AcuSense features to provide full colour 24/7 paired with more accurate detection of humans and vehicles to reduce false alarms.

ColorVu technology showcases images in full colour without the need for additional configuration or added devices, even in total darkness. Its larger image sensor and low lux capacity capture brilliant details and clarity that boost safety by illuminating poorly-lit areas where crime or theft could occur. ColorVu G2 cameras are simple to deploy and offer distinctive, detailed images that surpass expectations.

ColorVu G2 Featuring the AcuSense Algorithm: 2 Features, 1 Camera!

ColorVu Generation 2 (G2) camera models feature an enhanced ColorVu algorithm for full colour images in darkness.

G2 ColorVu cameras are equipped with our 2nd Generation AcuSense algorithm for precise human and vehicle filtering that reduces false alarms up to 90 percent, improving productivity and alarm handling efficiency.

G2 models use false alarm filtering to sort out non-human and vehicle events, making it easier and more cost-efficient to find specific targets when searching video footage.

ColorVu G2 Product Showcase

FIXED DOME

DS-2CD2147G2-SU
*No Supplemental Light

Available in 2.8mm & 4mm Lens

2688 x 1520, 30FPS

1/1.8" Image Sensor

0.0005 Lux

F1.0 Aperture

130dB True WDR

Built-in Microphone

Audio In and Out

DOME VARIFOCAL

DS-2CD2747G2-LZS

3.6 - 9mm Varifocal Lens
