4. Click stream now page, then you have the rtmp server address and key.

### Camera Side

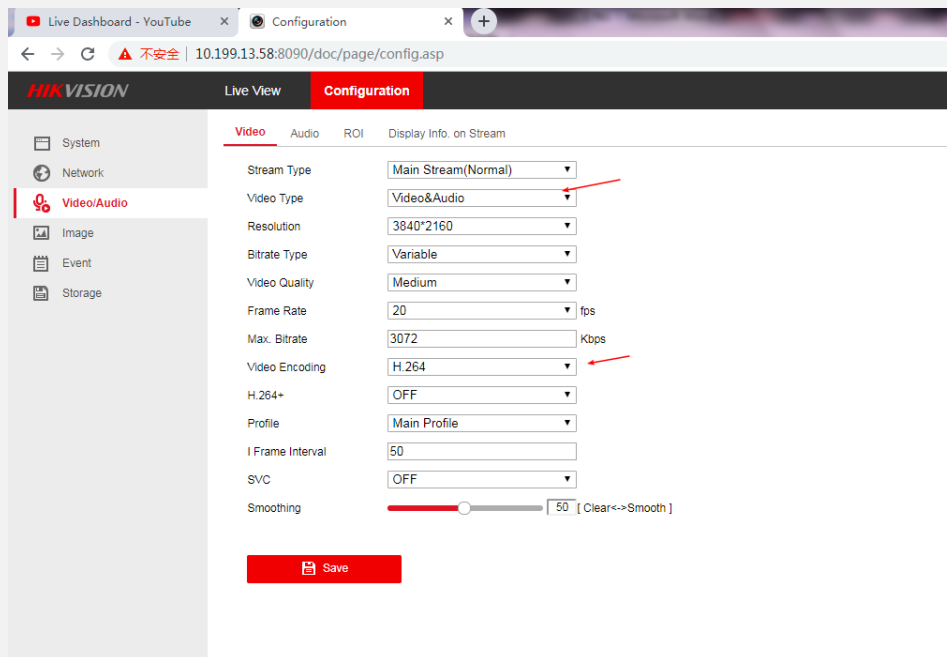

1. Make sure the camera support audio, otherwise the stream can't send to YouTube.
2. Upgrade Hikvision G1 Platform camera to a customer version.

5. At last save the rtmp server address on the camera which you get from YouTube website  
`rtmp://a.rtmp.YouTube.com/live2/yk4x-07m7-51md-8xxb`

If the YouTube still show offline, try to reboot the camera. Then you can get your camera's live stream on the YouTube channel. You can share with your friends the link too. Hope you can be an online influencer by Hikvision camera.
