Hikvision Display Product Development Timeline

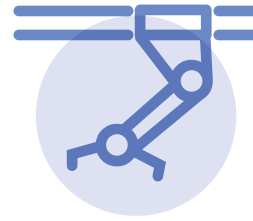

Hikvision LED Production Line

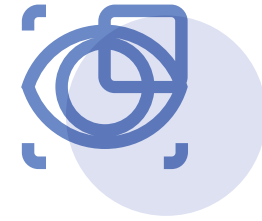

Fully imported ultra-high-speed patch line, capable of patching 64 million lamp beads per day, about 220m² P1.8.

The first in the industry to acquire a fully-automated aging test.

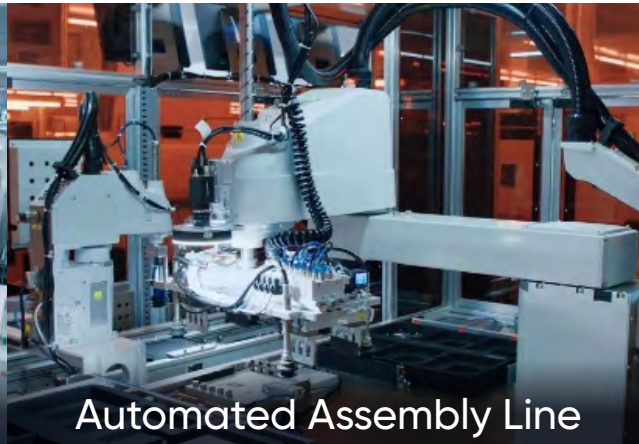

Independently developed an automated LED assembly line, greatly improving production efficiency.

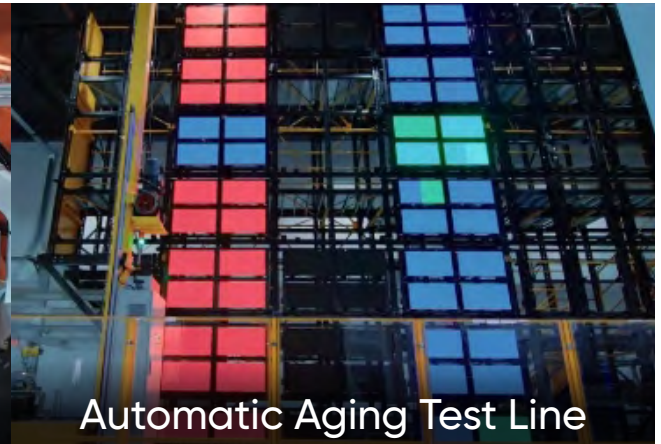

Hikvision's own machine vision technology monitors aging data in real time, and comprehensively improves delivery efficiency and product quality.
