

HIKVISION[®]

**THE SOLUTION FOR
SCHOOL BUS SURVEILLANCE**

Common Challenges

A school bus system is one of the most important transportation methods for students all over the world. But the potential safety risks associated with them often go overlooked. A school bus security system should be able to:

- Supervise drivers to prevent unsafe driving
- Capture the bus's interior and exterior for comprehensive monitoring
- Monitor the entire vehicle and ensure students remain safe to and from school

Occupancy control

Driver monitoring

Accident response

Purpose of The System

System Stability & Reliability
Maintain a smooth & reliable system at all times

HD Video
Ensure video quality for real-time monitoring & review

SMS Linkage
Parents receive notification after student swipes ID card on bus

Accurate GPS Location
To locate & track vehicles in real-time

Data Analysis
Using data analysis to improve management

Effective Detection
Take precautionary measures in a timely manner

System Architecture

Mobile Video Surveillance System

System Components for Mobile Surveillance Systems

Mobile Video Surveillance System for Multiple School Buses

Students Attendance Check

Features

1. Receiving the real-time tapping card record via iVMS
2. Searching the history tapping card record
3. Sending the SMS to the student's parents
4. Supporting exporting bus attendance report

System Components and Highlights

Onboard Video Management With Front End Devices

Accurate GPS location information is sent to the center in real-time and is stored for playback

High quality video footage is recorded locally. Remote access to video facilitates review and forensic evidence gathering

Two-way audio between driver and command center provides convenient communication when needed

When local alarm is triggered, real-time notifications will be sent to command center

Transmission Network

Data stream and messaging transmit entirely across a wireless network

- Device registration data
- Device "heartbeat" signal for backup
- Live view & playback stream
- GPS data
- Alarm data

**The ability to perform certain functions at a command center depends on local wireless network coverage, bandwidth, and quality. Hikvision engineers will assist in examining and/or creating the necessary parameters during installation process.*

iVMS Management

✦ Additional Features

Optional Wi-Fi backup

With high transmission speeds (over 30 Mbps per device), users can backup and secure all video footage of an entire day rapidly.

Log rides with student ID cards

ID cards equipped with parent contact information send text messages as students board the bus. Information on a card also transmits to the command center for recording, reviewing, or exporting reports.

✦ Typical Application Scenario

Bus interior

Driver's seat

Bus exterior

Camera placement suggestion

- 1 Monitors driver seat and the entrance
- 2 Monitors the inside of the bus without blind spots
- 3 Monitors the inside of the bus without blind spots
- 4 Monitors the areas in front of the bus
- 5 Monitors entrance from the outside
- 6 Monitors the side traffic and exterior of the bus
- 7 Rear-facing security and traffic camera
