How to Enable ONVIF Protocol on IP Camera

1. Go to [configuration]-[Network]-[Advanced Settings]-[Integration Protocol], check the checkbox of Enable ONVIF

2. Click Add to create ONVIF user
3. Create ONVIF user and use this username and password to login camera via ONVIF protocol
**Note:**

1. Only the IP camera firmware version is V5.5.0 or above support it.
2. ONVIF protocol of IP camera firmware version below V5.5.0 is default enabled, ONVIF username and password are same as camera's username and password
