Chapter 1  Introduction

1.1  Overview

iVMS-4200 is versatile video management software for the DVRs, NVRs, IP cameras, encoders, access control devices, security control panels, video intercom devices, VCA devices, etc. It provides multiple functionalities, including real-time live view, video recording, remote search and playback, file backup, alarm receiving, etc., for the connected devices to meet the needs of small and medium-sized projects.

1.2  Product Version

<table>
<thead>
<tr>
<th>Product Name</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>iVMS-4200 V3.2.0</td>
<td>2019-12</td>
</tr>
</tbody>
</table>

1.3  Related Component Versions

<table>
<thead>
<tr>
<th>Related Component</th>
<th>Version</th>
<th>Date</th>
<th>Latest Version or Not</th>
</tr>
</thead>
<tbody>
<tr>
<td>Player</td>
<td>V7.3.7.45</td>
<td>2019-10-23</td>
<td>Yes</td>
</tr>
<tr>
<td>EHome SDK</td>
<td>V6.1.3.15</td>
<td>2019-11-7</td>
<td>Yes</td>
</tr>
<tr>

</tbody>
</table>
Chapter 2  What’s New

2.1  Added

2.1.1  Main View & Remote Playback

<table>
<thead>
<tr>
<th>Live View</th>
<th>Supports locking the client in full-screen mode and exiting full-screen mode.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Added Cylinder mode for fisheye expansion.</td>
</tr>
<tr>
<td>Playback</td>
<td>Supports downloading recorded video footage in AVI format.</td>
</tr>
<tr>
<td></td>
<td>Supports displaying thumbnail of playback.</td>
</tr>
</tbody>
</table>

1. Supports locking the client in full-screen mode and exiting full-screen mode.
2. Added Cylinder mode for fisheye expansion.
3. Supports downloading recorded video footage in AVI format.
4. Supports displaying thumbnail on playback timeline.

2.1.2  Data Retrieval

<table>
<thead>
<tr>
<th>Search Rarely Appeared Person</th>
<th>Added Rarely Appeared Person Search function, and supports searching and viewing history Rarely Appeared Person alarms.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Facial Recognition Check-in</td>
<td>Search check-in records performed by facial recognition to view detailed check-in information.</td>
</tr>
</tbody>
</table>

1. Supports searching alarms triggered by rarely appeared persons in devices, and the searching results can be displayed on the Client showing detailed report and picture of each alarm. You can view the detailed appearing frequency of each person and save the reports in the current computer.
2. You can search for the attendance records of the persons who checked in by facial recognition during specified period and save the searching results in the current computer. Moreover, you can view a person’s attendance times, late attendance times, early leave times, etc.
2.1.3 AI Dashboard

Added Multi-Target-Type Detection that refers to a function that recognizing and capturing multiple types of detected targets including faces, human bodies, motor vehicles, and non-motor vehicles. When the device detects targets, you can view live view, captured pictures, and target features. Alarms can be triggered for high similarity between captured face/human body picture and the one in picture library, or high/low appearing frequency of a person/vehicle, or an appearance of a vehicle in the black list, etc.

2.1.4 E-Map

With the help of facial recognition devices, you can view the target person's moving pattern on the map, which is generated by several cameras' locations. E-map allows you to search and view the moving pattern of an individual (such as a suspect, a missing child, etc.) on the map to help finding her/him.

2.1.5 Access Control

<table>
<thead>
<tr>
<th>Application</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access Control</td>
<td>Supports synchronizing events saved in access control devices to Event Center module.</td>
</tr>
<tr>
<td>Video Intercom</td>
<td>When the door station works as outer door station, supports calling residents of different buildings via the door station.</td>
</tr>
</tbody>
</table>

1. Supports applying face pictures to facial recognition terminals (only DS-K1T671 series and DS-K1T331 series) by ISUP4.0 protocol.
2. Supports synchronizing events saved in access control devices to Event Center module.
3. When the door station works as outer door station, supports calling residents of different buildings via the door station.

2.1.6 Time and Attendance

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supports Multiple Timetables in One Shift</td>
<td>Up to 8 timetables can be added in one day of the shift settings.</td>
</tr>
<tr>
<td>Add Display Format in Calculation Accuracy</td>
<td>Added display format settings. The client will display the attendance results according to the display format.</td>
</tr>
<tr>
<td>Third-Party Database</td>
<td>Supports MySQL database.</td>
</tr>
<tr>
<td>Attendance Record</td>
<td>Added custom export. Supports searching attendance handling records.</td>
</tr>
<tr>
<td>Attendance Calculation</td>
<td>Supports customizing columns to be displayed.</td>
</tr>
</tbody>
</table>
1. Supports adding multiple timetables in one shift. Up to 8 timetables can be added in one day of the shift settings. The client will calculate the attendance records and generate attendance reports according to these timetables.
2. Added Display Format in Attendance Settings > General Rule > Calculation Accuracy settings. The client will display the attendance results according to the display format.
3. In Attendance Settings > Third-Party Database, newly supports database type: MySQL.
4. In Attendance Statistics > Attendance Records, supports customizing the contents to be exported.
5. In Attendance Statistics > Attendance Records, supports searching the attendance handling records (including check-in/out correction records and applying for leave or business trip) by setting the data source.
6. In Attendance Statistics > Calculation, supports customizing the columns to be displayed in the table as well the columns in the exported reports.

2.1.7 Person

<table>
<thead>
<tr>
<th>Supports Enrollment Station</th>
<th>Enroll card numbers, fingerprints and faces by Enrollment Station.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Get person information from Enrollment Station.</td>
</tr>
<tr>
<td>Add Person</td>
<td>Select Villa Door Station to issue cards to persons.</td>
</tr>
<tr>
<td>Import/Export Persons</td>
<td>Supports importing/exporting room No. and floor No. when importing/exporting person information.</td>
</tr>
</tbody>
</table>

1. Supports adding Enrollment Station to the client. When adding a person, supports enrolling card numbers, fingerprints, and faces by the added Enrollment Station.
2. In Person > Get from Device, supports getting person information from certain Enrollment Station.
3. When issuing a card to one person, supports selecting a Villa Door Station to read the card number and issue to the person.
4. Supports importing/exporting room No. and floor No. when importing/exporting person information.

2.1.8 Monitoring

Supports getting and displaying pictures captured by devices accessed by ISUP4.0 protocol. Picture details will also be displayed.
2.1.9 Remote Configuration

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intercom</td>
<td>Ring duration configuration for indoor station</td>
</tr>
<tr>
<td>Day and Night Switch</td>
<td>Supports door station’s day and night switch.</td>
</tr>
<tr>
<td>System Maintenance</td>
<td>Supports upgrading sub-modules of module door station remotely.</td>
</tr>
<tr>
<td>Video Monitoring</td>
<td>Supports viewing live view of an indoor station’s linked network camera.</td>
</tr>
</tbody>
</table>

1. Ring duration configuration for indoor station.
2. Supports door station’s day and night switch, including scheduled mode, auto mode, and day/night mode.
3. Supports upgrading module door station’s sub-modules on the remote configuration page.
4. IPC Supports viewing live view of a camera linked to an indoor station.

2.1.10 General

1. Allowing exiting the Service when exiting the client.
2. Added ISUP port number configuration so that you can configure the IP address and port for ISUP.
3. Supports Indonesian.
2.2 Updated

2.2.1 Report Customization

Supports customizing people counting report and heat analysis report, and you can select a time period to generate a report. Optimized people counting chart.

2.2.2 Access Control

Faster speed of applying access groups to the device.

2.2.3 Hik-Connect

Optimized management of devices on Hik-Connect, which means the devices on Hik-Connect will be added to the client automatically in a group named by Hik-Connect account.

2.2.4 General

Faster client starting speed and module-entering speed.
