2.1 Device Management	2
2.2 Person	2
2.2.1 Added Feature	2
2.2.2 Updated Feature	2
2.3 System Configuration	2
Chapter 3 Resolved Issues	3
Chapter 4 Known Issues	4

Chapter 1 Introduction

1.1 Overview

iVMS-4200 Client software is designed to configure and manage Hikvision devices in a unified and intuitive manner, including DVRs, NVRs, IP cameras, encoders, decoders, security control panels, video intercom devices, access control devices, etc.

The software provides multiple functionalities including live view, video recording, remote search and playback, file backup, alarm receiving, person management, access control, video intercom, security control, time & attendance, etc.

1.2 Version

Version	Date
iVMS-4200 V3.6.1	2021-07

1.3 Components

Component	Version	Date of Release	Latest Version or Not
Player	V7.3.9.56	2021-05-18	No
Network SDK	V6.1.7.40	2021-07-20	Yes
ISUP SDK	V2.4.0.10	2020-10-10	No

Chapter 2 What's New

2.1 Device Management

Supports adding devices of which the port No. is 80.

2.2 Person

2.2.1 Added Feature

1. When exporting person information, the user name and password of the super user will be required for verification.
2. When exporting persons' face pictures, the user will be required to set an encryption key for security.

2.2.2 Updated Feature

On the Person Management page, the Export button is hidden by default. To display and use this function, go to System Configuration->General to enable the Export Person Information.

2.3 System Configuration

The General page supports enabling or disabling the Export person information button. If you enable this, a message noting information security will prompt and the Export button will be displayed on the Person Management page.

Chapter 3 Resolved Issues

The following are issues resolved in this version.

No.	Issue Description
1	Loading the Remote Configuration page of KD8003 door station failed.
2	After importing the configuration files of V3.5.0 to V3.6.0, the person information on the client is lost.
3	On the client of other languages (excluding English), after applying person room No. to devices, the failure of getting person information occurs. The person information cannot be displayed.
4	When multiple card readers (of which some does not support authenticating via fingerprints) are managed by a 26-series access controller, applying person information to the card readers fails.

Chapter 4 Known Issues

Issue:

For client in other languages, the Export Person Information button will be displayed in English.

Solution:

The packages in other languages will be published later.
