

# How to Connect External alarm output with PIR camera

Title:	How to Connect External alarm output with PIR camera	Version:	v1.0	Date:	21/12/2018
Product:	analog camera			Page:	1 of 4

## How to Connect External alarm output with PIR camera

## **Background:**

The PIR camera with O in the model name provides an alarm output interface (EXT ALARM

OUTPUT), and an external alarm equipment can be connected to the interface. When you turn on the

EXT ALARM OUTPUT and the PIR alarm is triggered, the external alarm device will also be

triggered.

We recommend that PIR camera and K series DVR be used together to provide more accurate alarm

information.

## How to Connect External alarm output with DVR:

## > The alarm output device is powered by DC

It is recommended to the alarm output device is powered by DC (30V/1A or less) Steps:

1. The alarm output interface of camera connects with negative pole of external alarm output

device

- 2. The positive pole of external alarm output device connects with the positive pole of the power
- 3. The negative pole of power connects with The alarm output interface of camera.
