

### DS-3E1518P-EI/UHK(0-STD)V2 16-Port Gigabit Smart PoE Switch

Smart managed switches are developed by Hikvision, featuring easy management and maintenance. You can easily deploy, monitor, and expand your video security system anytime and anywhere with our software platforms. You can view the network topology, monitor the health of the network, and receive device alarms in real time, which greatly reduces the cost of network operation and maintenance.

- 16 x gigabit PoE RJ45 ports, 1 × gigabit RJ45 port, 1 x gigabit fiber optical port
- Total PoE power budget 240 W
- Unified cloud management for security systems
- Network topology at your fingertips
- Remote troubleshooting
- Visualized topology management
- Up to 300 m long-range PoE transmission
- 6 kV surge protection

# Specification

| General                   | General  |  |  |
|---------------------------|--|--|--|
| Shell                     | Metal material   |  |  |
| Net Weight                | 2.85 kg (6.28 lb)  |  |  |
| Gross Weight              | 3.05 kg (6.72 lb)  |  |  |
| Dimensions (W × H × D)    | 440.0 mm × 220.8 mm × 44.0 mm (17.32" × 8.69" × 1.73")   |  |  |
| Operating Temperature     | 0 °C to 45 °C (32 °F to 113 °F)  |  |  |
| Storage Temperature       | -40 °C to 85 °C (-40 °F to 185 °F)   |  |  |
| Operating Humidity        | 5% to 95% (no condensation)  |  |  |
| Relative Humidity         | 5% to 95% (no condensation)  |  |  |
| Power Supply              | 100~240 V AC, 50/60 Hz, Max. 4 A   |  |  |
| Installation Mode         | Rack (equipped with mounting ears)   |  |  |
| Max. Power Consumption    | 250 W  |  |  |
| Power Consumption in Idle | 20 W   |  |  |
| Surge Protection          | 6 kV   |  |  |
| Network Parameters        |  |  |  |
| Ports                     | 16 × Gigabit PoE port,1 × Gigabit RJ45 port,1 × Gigabit fiber optical port                             |  |  |
| MAC Address Table         | 8 K  |  |  |
| Switching Capacity        | 56 Gbps  |  |  |
| Packet Forwarding Rate    | 48 Mpps  |  |  |
| Internal Cache            | 4.1 Mbits  |  |  |
| PoE Power Supply          |  |  |  |
| PoE Standard              | IEEE 802.3af,IEEE 802.3at  |  |  |
| PoE Power Pin             | 8-pin power: 1/2(-), 3/6(+), 4/5(+), 7/8(-)  |  |  |
| PoE Port                  | PoE: Ports 1 to 16   |  |  |
| Max. Port Power           | 30 W   |  |  |
| PoE Power Budget          | 240 W  |  |  |
| Software Function         |  |  |  |
| Long Range                | Ports 1 to 16: up to 300 m. Long range performance may vary depend on camera model or cable condition. |  |  |
|                           | Ports 1 to 16: port isolation mode to improve network security.  |  |  |
| Port Isolation            | Ports in an isolation group cannot communicate with each other, but they can                           |  |  |
| r of Cisolation           | communicate with ports outside the isolation group.  |  |  |
| PoE Watchdog              | Ports 1 to 16: auto detect and restart the cameras that do not respond.                                |  |  |
| 1 OE Waterladg            | Link aggregation is used to aggregate multiple physical ports to form a logical port for               |  |  |
|                           | load balancing, bandwidth expansion, and port protection.  |  |  |
| Link Aggregation          | Support static link aggregation.   |  |  |
|                           | Support 8 aggregation groups.  |  |  |
|                           | Loop prevention is used to prevent the switching network from forming loops, which                     |  |  |
|                           | will seriously affect network communication. Disabled by default.                                      |  |  |
| Loop Prevention           | Support 802.1D STP.  |  |  |
|                           | Support 802.1w RSTP.   |  |  |
|                           |  |  |  |

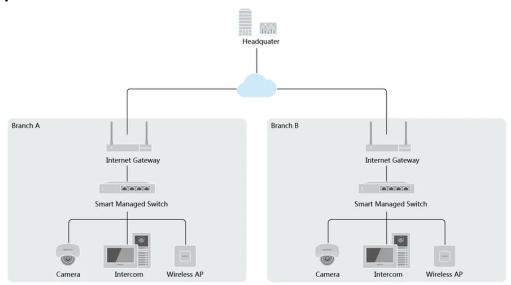

| VLAN is used for network scale planning and network health improvement.  Support 802.1Q. |           |
|--|-----------|
|  |           |
| VLAN Configurable VLAN ID from 1-4094.   |           |
| Support Trunk, Access port mode.   |           |
| Support Max. 32 VLAN.  |           |
| Support one-click activation and remote management via Hik-Partner Pro. Fu               | ınctions  |
| supported:   |           |
| 1. Display the port rate.  |           |
| 2. Display the port bandwidth utilization rate.  |           |
| 3. Display the PoE power usage.  |           |
| HPP 4. Display topology information.   |           |
| 5. Display the alarm status.   |           |
| 6. Restart ports and devices.  |           |
| 7. Enable port long-rage mode.   |           |
| 8. Remotely upgrade the device.  |           |
| Support device management via web.   |           |
| Support DHCP Client. Enabled by default for dynamic assignment of manager                | nent IP   |
| addresses.   |           |
| Support Super IP, which is a fixed IP address (10.180.190.200) for direct acce           | SS.       |
| System Maintenance Support remote management via Hik-Partner Pro.                        |           |
| Support cable detection. Abnormal open circuits and short circuits as well as            | network   |
| cable length can be detected.  |           |
| Support 802.1ab LLDP for peer device discovery.  |           |
| Support port mirroring for fault locating.   |           |
| Approval   |           |
| CE-EMC (EN 55032: 2015, EN IEC 61000-3-2: 2019, EN 61000-3-3: 2013+A1: 2                 | 019, EN   |
| EMC 50130-4: 2011 +A1: 2014, EN 55035: 2017)   |           |
| CB (IEC 60950-1:2005, AMD1:2009, AMD2:2013, IEC 62368-1: 2014 (Second                    | Edition); |
| CE-LVD (EN 60950-1: 2006 + A11: 2009 +A1: 2010+A12: 2011+A2: 2013, EN 6                  | 2368-1:   |
| Jaiety Ct-tvb (Liv 00330-1, 2000 + A11, 2003 +A1, 2010+A12, 2011+A2, 2013, EN C          |           |
| 2014+A11: 2017)  |           |

# Typical Application

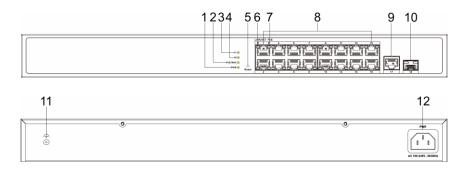

# Physical Interface

Front Panel

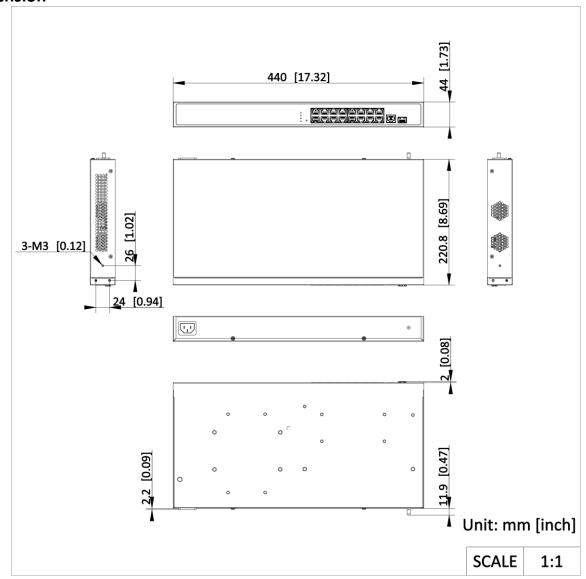

Rear Panel

| No. | Indicator/Port  | Description   |
|-----|---|---|
| 1   | PWR Indicator   | Solid on: The switch is powered on normally.  |
|     |   | <ul> <li>Unlit: No power supply is connected or power supply is abnormal.</li> </ul>              |
| 2   | PoE-MAX Indicator                                     | Solid on/Flashing: The output power of the switch is about to reach or has                        |
|     |   | reached the upper limit. The power supply may be abnormal if more devices are                     |
|     |   | connected.  |
|     |   | <ul> <li>Unlit: The switch does not supply power to a powered device (PD), or supplies</li> </ul> |
|     |   | power to a PD normally and its output power does not reach the upper limit.                       |
|     |   | (About 5 seconds after the output power of the switch returns to normal, the                      |
|     |   | PoE-MAX indicator will be unlit.)   |
| 3   | Gigabit RJ45 Port Indicator<br>(Port 17)              | Solid on: The port is connected.  |
|     |   | Flashing: The port is transmitting data.  |
|     |   | Unlit: The port is disconnected or connection is abnormal.  |
|     | Gigabit SFP Fiber Optical<br>Port Indicator (Port 18) | Solid on: The gigabit SFP fiber optical port is connected.  |
| 4   |   | Flashing: The gigabit SFP fiber optical port is transmitting data.                                |
|     |   | • Unlit: The gigabit SFP fiber optical port is disconnected or connection is abnormal.            |
| 5   | Reset Button  | Used for restoring all the configurations of the switch to the default settings.                  |
|     | LINK/ACT Indicator                                    | Solid on: The port is connected.  |
| 6   |   | Flashing: The port is transmitting data.  |
|     |   | Unlit: The port is disconnected or connection is abnormal.  |
| 7   | PoE Indicator   | Solid on: The switch supplies power to a PD normally.   |
| ,   |   | • Unlit: The switch is disconnected from a PD or power supply is abnormal.                        |
| 8   | Gigabit PoE RJ45 Port                                 | Used for connection to a PD via a network cable.  |
| 9   | Gigabit RJ45 Port (Port 17)                           | Used for connection to another device via a network cable.  |
| 10  | Gigabit SFP Fiber Optical                             | Used for connection to another device via an optical fiber when plugged into with an              |
| 10  | Port (Port 18)  | optical module.   |
| 11  | Grounding Terminal                                    | Used for connecting to the grounding cable to protect the switch from lightning.                  |
| 12  | Power Supply  | Use the attached power cord to connect the switch to a socket.                                    |
