

**99% FALSE ALARM RATE LEADS TO UNHAPPY CUSTOMERS!**

**TRY HIKVISION'S INTEGRATED SOLUTION – SPECIALLY DESIGNED FOR ARCS**

### HIKVISION TECHNOLOGIES HELP TO IMPROVE ALARM ACCURACY

**Double Knock:** The zone will send alert to the alarm panel if it's triggered twice within set time.

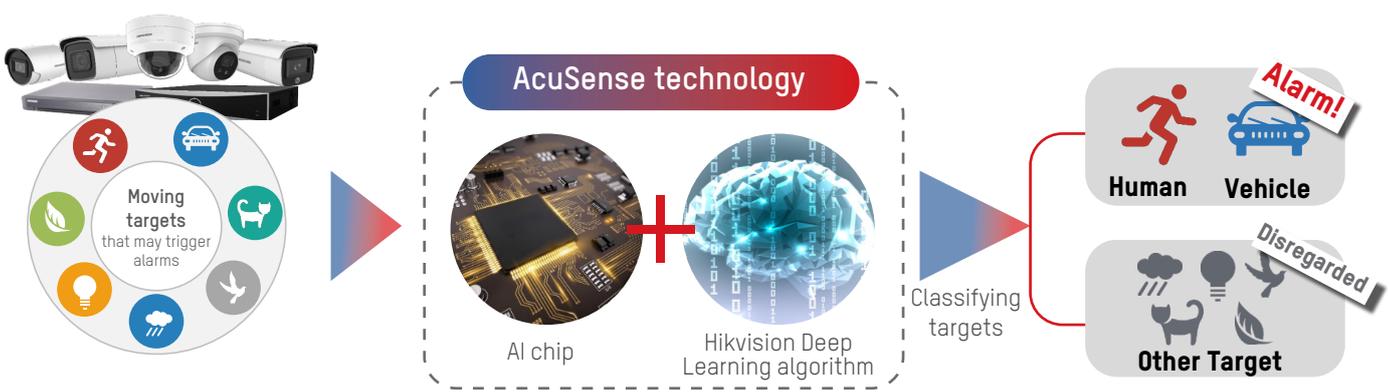

**Cross Zone:** Can link with another zone, and only when both zones are triggered simultaneously, an alert is sent to the alarm panel.

**Passive Infrared Sensor:** Detects the temperature difference between human body and background objects.

**Microwave Sensor:** Uses 24Ghz (K-band) Doppler effect to detect speed of movement, distance, and motion.

*Other technology also included, like Dual Tech Detector, Digital Temperature Compensation, IFT Technology etc.*

AcuSense technology: Filters false alarms

## ALARM VISUAL VERIFICATION

**PIRCAM (PIR detector with a image camera to verify alarms)**

1. View snapshots of activations to verify alarms with PIRCAM.
2. Alert triggered even before the intruders realize that they're exposed.
3. A series of images will be sent to the ARC.

Motion detected

Alarm triggered

Motion captured

### HD CCTV 7x24 Video Verification

4K High Definition

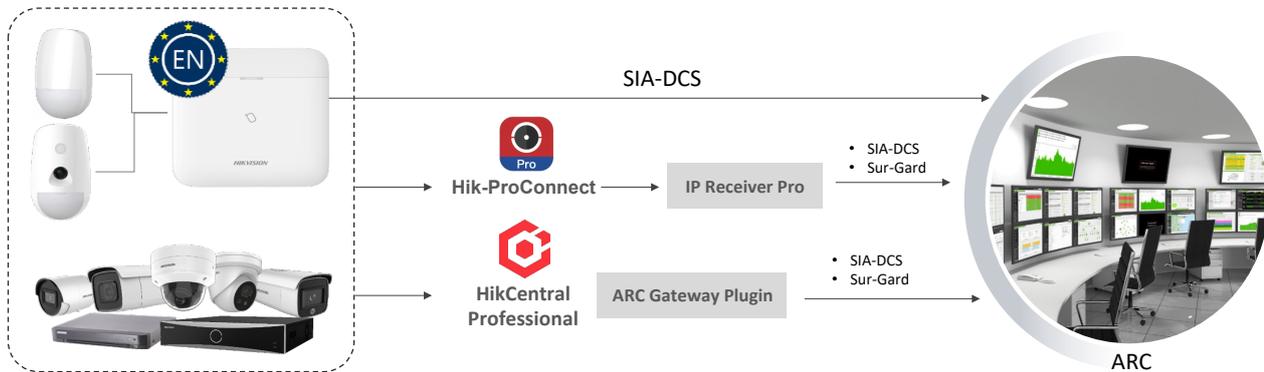

ColorVu technology

## HOW CAN ARCS GET THESE IMPRESSIVE TECHNOLOGIES?

Plug & Play integrates solutions for ARC
