# Keeping Students and Teachers Safe on Return
Back-to-Business Education Solutions

At schools and other education facilities, the safety of all students and staff is paramount - while giving them quick access to classrooms and offices. Using Hikvision's Temperature Screening Solutions, this process becomes much easier – and much safer.

Typical Scenarios

Classroom Entrances

Entrance Lobbies

Control Center

Pain Points

As students and staff get ready to return to classes, schools face several new challenges in keeping everyone safe and healthy. School administrators are asking questions such as:

- How can we create a process for students and staff to be screened for temperatures in a way that is convenient and accurate?
- How can we screen temperatures regularly, e.g., every four hours?
- How do we store the required detailed records of each person's or group's temperature history?

Our Solutions

Now with Hikvision Back-to-Business Education Solutions, the questions above have answers, and all the specific needs for a typical school scenario can be easily met.

Flexible Product Options

A variety of products and solutions will suit a host of specific needs for any scenario.

Touch-free Temperature Measurement

High-efficiency temperature measurement without close contact provides even more protection.

Centralized Management

Instant visualization of overall statistics enhances protection and facilitates exporting of data.

Entrance Lobbies
Temperature Screening & Mask Detection

On arrival, students and staff can be guided to entrance lobbies for preliminary temperature measurement before entering the campus. A variety of devices are available to meet temperature measurement, mask detection and attendance management needs.

Fast installation
with thermographic
cameras

Instant visualization
of temperature and mask detection
with DeepinMind NVRs

Screening can also be carried out at the entrance to classrooms. Hikvision recommends MinMoe Terminals for preliminary temperature screening, mask detection and access control.

Touch-free temperature measurement

✖ Control Room
Powerful Data management and Visualized Demonstration

At the control room, site managers and security staff can view statistics and temperature records of all connected sites in real time using HikCentral. HikCentral creates instant popups and other notifications upon detection of abnormal temperatures.
