Heat Pro

Hikvision HeatPro Series Thermal Cameras Professional protection made simple

Designed for any amount of light

Sees the unseen

Radically reduces false alarms

Dedicated to bringing professional protection solutions to the mass market, Hikvision's HeatPro Series Thermal Cameras provide perimeter protection with unparalleled accuracy, and fire detection with superlative sensitivity. The cameras hit the target for cost and performance in a variety of residential, commercial and industrial applications.

Advantages of Thermal Cameras for Fire Prevention

Intelligent Fire Safety Alerts

Leaving a burning or smoldering fire unattended can be really dangerous, in residential, commercial, or industrial environments. Such occasions include indoor waste facilities, E-chargers in parking lots, warehouses, factories, and more. Bi-spectrum HeatPro Series Thermal Cameras automatically identify risks on these occasions. If the temperature exception is detected by the thermal lens, the camera will trigger the alarm. Temperature information is visualized to help double-check problems and improve problem solving efficiency.

Better Target Identification

Human and vehicle targets are accurately distinguished and classified.

Separation of Humans and Vehicles

Conventional cameras may fail to detect the overlapping of human and vehicle targets. But Hikvision's HeatPro Series Thermal Cameras support human and vehicle classification, always distinguishing human and vehicle targets so that users respond only to those of real concern.

Detection of Grouping

When people gather into groups, HeatPro Series Thermal Cameras can still accurately identify each individual and classify them accurately.

Higher Agility and Adaptability

Targets are detected quickly, even in very challenging conditions.

Challenging Temperature Conditions

When exposed to high temperatures, background infrared radiation can be similar for both human and vehicles. HeatPro thermal cameras accurately distinguish targets from their background even with limited temperature-data differences.

Challenging Viewing Angles

HeatPro Series Thermal Cameras detect targets moving straight towards the camera with comparatively small perceivable displacements.

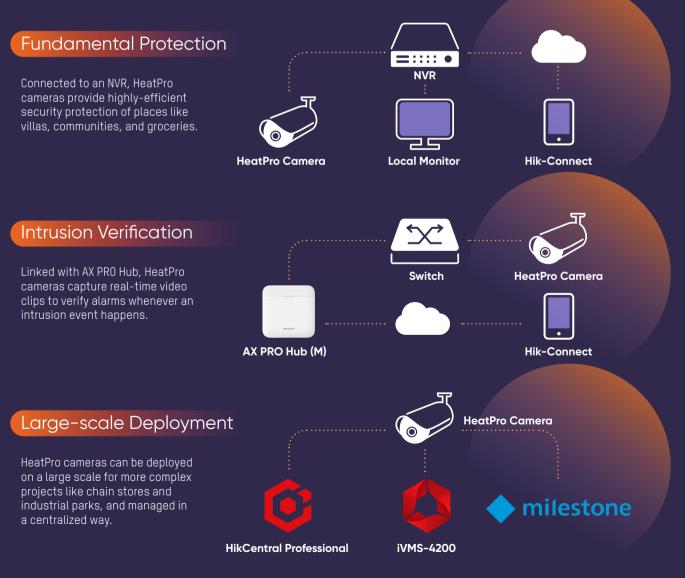

3-Step VCA Configuration

Simpler and faster deployment for SMB users with only a 30 sec setup time

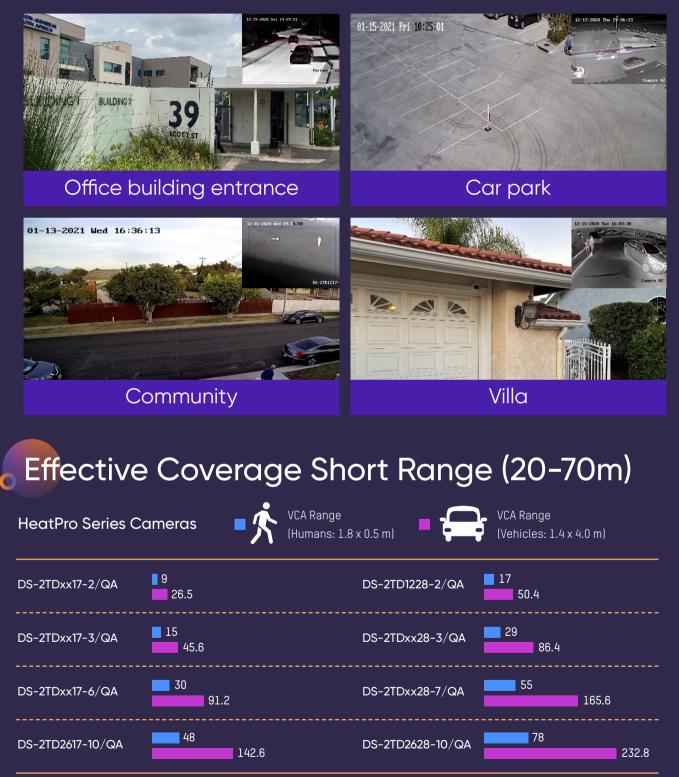

Demand-based Product Applications

HeatPro Series Thermal Cameras combine with Hikvision's other products to meet diverse needs of users.

Field Demonstrations

HeatPro Series Thermal Cameras have been tested at a number of demonstration sites, giving field-proven results of favorable, minimized false alarm rates.

Application Scenarios

Villas/Communities

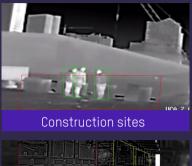

Car parks

Grocery stores

Warehouses

Product Showcase

- Resolution: 256 x 192 for thermal; 4 MP for visible light
- VCA: Line crossing, intrusion
- Temperature accuracy: ±8°C; ±2°C or 2% (-T)
- Temperature measurement range: -20 to 150° C; -20 to 550° C (-T)
- Built-in strobe light and audio alarm

Bi-spectrum

Turret DS-2TD1228-2/3/7 QA DS-2TD1228T-2/3 QA

Bullet DS-2TD2628-3/7/10 QA DS-2TD2628T-3/7 QA

- Resolution: 160 x 120 for thermal; 4 MP for visible light
- VCA: Line crossing, intrusion
- Temperature accuracy: ±8°C;
- Temperature measurement range: -20 to 150° C;
- Built-in strobe light and audio alarm

Bi-spectrum

Turret DS-2TD1217-2/3/6 QA

Bullet DS-2TD2617-3/6/10 QA

High quality detector with 10 years guarantee
