   - b. Push the Cable Knock-Out away, and connect to the control panel and cables across the hole.
   - c. Wire the power cable. Push the switch as shown in the picture.

**Specication**

- **Input**: BATTERY POWER 12 VDC POWER
- **Output**: CONTROL PANEL SIREN INPUT
- **Features**
  - Power input: 12VDC (7.5Watt), 1A max
  - Standby power (in alarm status): 1Watt
  - Power consumption when the siren sounds: 1Watt
  - Power consumption when the siren is idle: 1Watt
  - Consumption: 1Watt (12V, 1A)
  - Max volume: 100dB
  - Operating temperature: -10°C to +60°C
  - Storage temperature: -40°C to +80°C
  - Battery: 2×AAA batteries according to the polarity mark.
  - Display signal strength: Attached mobile client or web client
  - Volume adjustment: Mobile client or web client
  - Control: Registration, disarming, arming, setting
  - Note: Do not reverse the polarity of the battery.

**Product Notice**
