REGARDING TO THE PRODUCT WITH INTERNET ACCESS, THE USE OF PRODUCT SHALL BE WHOLLY AT YOUR OWN RISKS. HIKVISION SHALL NOT TAKE ANY RESPONSIBILITIES FOR ABNORMAL OPERATION, PRIVACY LEAKAGE OR OTHER DAMAGES RESULTING FROM CYBER ATTACK, HACKER ATTACK, VIRUS INSPECTION, OR OTHER INTERNET SECURITY RISKS; HOWEVER, HIKVISION WILL PROVIDE TIMELY TECHNICAL SUPPORT IF REQUIRED.
SURVEILLANCE LAWS VARY BY JURISDICTION. PLEASE CHECK ALL RELEVANT LAWS IN YOUR JURISDICTION BEFORE USING THIS PRODUCT IN ORDER TO ENSURE THAT YOUR USE CONFORMS THE APPLICABLE LAW. HIKVISION SHALL NOT BE LIABLE IN THE EVENT THAT THIS PRODUCT IS USED WITH ILLEGITIMATE PURPOSES.
IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATER PREVAILS.
Regulatory Information

FCC Information
FCC compliance: Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This equipment complies with FCC/IC RSS-102 radiation exposure limits set forth for an uncontrolled environment.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

FCC Conditions
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement
This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the Radio Equipment Directive 2014/53/EU, the EMC Directive 2014/30/EU, the LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may
include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: [www.recyclethis.info](http://www.recyclethis.info)

**Industry Canada ICES-003 Compliance**

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radioexempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.
Cet équipement doit être installé et utilisé à une distance minimale de 20 cm entre le radiateur et votre corps.

Chapter 8 Troubleshooting ................................................................. 50
Chapter 1 Introduction

Body camera, a video recording system, is typically used by law enforcement officers to record their interactions with the public and gather video evidences at crime scenes.

1.1 Main Features

- H.264 and H.265 encoding technology.
- Up to 1080p/30 fps recording resolution.
- Wide-range lens with 129° horizontal FOV.
- Dismountable battery design.
- Built-in GPS module.
- 3G/4G network transmission.
- 2.4 inch TFT LCD.
- Light weight (190 g without should clip).
- Small size (95 × 60 × 29 mm)
- IP67.

1.2 Package List

Following objects are included in package. If something loses, contact us or our supplier for it.

- 1 * Body camera.
- 1 * USB data cable.
- 1 * Charger.
- 1 * Demountable and angle adjustable clip
- 1 * CD which contains user manual and Body Camera Assistant.
- 1 * Printed quick start guide.
1.3 Buttons and Interfaces

Refer to Figure 1-1 for the overall view of the body camera.

1.4 Charge Body Camera

1.4.1 Charger Specifications

- Input: 200 to 240 V AC, 50/60 Hz, 0.2 A.
- Output: 5 V/2.0 A

1.4.2 Charge

Purpose

Follow the steps below to charge the body camera.

Step 1 Open the cover of USB interface on one side of the body camera.

Step 2 Connect the body camera to the charger with the USB data cable. The LCD will show the charging status.

![Charging Status](Figure 1-2 Charging Status)
When the body camera is being charged, LED 1 is solid red. When it is fully charged, LED 1 is solid green.

You can enable quick charging mode in system settings. In quick charging mode, the body camera cannot be operated. If quick charging mode is disabled, you can operate the body camera normally when the body camera is being charged. Refer to Chapter 6.9 Set Quick Charging Mode for details.

1.4.3 How to Protect Charger

Once charging completed, disconnect the connection between charger and body camera, and the connection between charger and power supply.

Handle with care. In case the charger or USB data cable is physically damaged or is affected with damp, do not keep using it. You can contact us to change charger.

To protect device and your security, do not touch the body camera, charger, and USB cable with wet hand.

Do not pull out charger from power supply by pulling the USB data cable.
Chapter 2  Startup and Shutdown

2.1 Start up

Before you start
Ensure the power is sufficient. If not, charge the body camera. Refer to Chapter 1.3 Charge Body Camera for details.

Step
Hold the On/Off button for 3 seconds. Then LED 2 turns green, and after 10 seconds, the HIKVISION logo pops up. You will hear an audible notification. All of these indicate the body camera starts successfully. Then it automatically enters the live view interface.

NOTE
You can also hold the Recording button for 3 seconds to start up the body camera and start recording at the same time.

2.2 Turn on/off LCD
The LCD goes to sleep automatically when there is no operation in the predefined auto-lock time. Press any button, except PTT, to manually activate LCD. Press the On/Off button again to inactivate LCD.

2.3 Shut down
Hold the On/Off button for 3 seconds. When you hear an audible notification, and the HIKVISION logo pops up on the LCD, the body camera is shut down successfully.
Chapter 3 Basic Functions

3.1 Live View Interface Introduction

Once the body camera starts up completely, it automatically enters the live view interface.

</tbody>
</table>

3.3 Take Pictures

**Purpose**
You can take pictures of the crime scenes or other situations.

**Step**
Press \( \text{Photo} \) to take a picture for current live view image.

**NOTE**
- The operation is invalid in playback, quick charging, and USB communication interface. Exit the interfaces before operation.
- The picture is saved in memory in .jpg format and named by taking picture date and time.

3.4 Record and Capture

**Purpose**
You can record the videos in crime scenes or other situations. And during the recording, you can capture images.

Step 1 In live view, press \( \text{Record} \) to start recording. Or in power-off mode, hold \( \text{Record} \) for 3 seconds to start up the body camera and start recording. Then \( \text{Record} \) in live view turns to \( \text{Record} \) and the LED 1 starts flashing in red.

Step 2 (Optional) During the recording process, press \( \text{Photo} \) to capture the current live view image.
Step 3 Press again to stop recording. Then turns to.

**NOTE**

- The operation is invalid in playback, quick charging, and USB communication interface. Exit the interfaces before operation.
- The video is saved in memory in .mp4 format and named by the start time of recording.
- The captured image is saved in memory in .jpg format and is named by capturing date and time.
- The resolution of the captured image is the same as the video resolution.

### 3.5 Tape Audio

**Purpose**
You can tape audios in crime scenes or other situations.

Step 1 Enter live view mode.

Step 2 Press to start taping. Then pops up in live view interface.

Step 3 Press again to stop taping. Then disappears.

**NOTE**

- The operation is invalid in playback, quick charging, and USB communication interface. Exit the interfaces before operation.
- The audio file is saved in memory in .WAV format and is named by the start time of taping.

### 3.6 Playback

**Purpose**
You can play back the recorded videos, pictures, and audios.

Step 1 Go to Main Menu > Playback.

Step 2 If Verify function is on, you need to input password to get permission.
The default password is 123456.

You can go to Main Menu > System > Verify to disable password verification.

Step 3 Tap △/▽ to select the playback file type as Video, Picture, or Audio. And tap ▀ to enter the corresponding menu.

Step 4 Tap △/▽ to select the date.
Step 5 In file list, tap \( \Delta / \nabla \) to select the file to play back.

Step 6 Tap \( \square \) to start playback.

**NOTE**

In video playback, you can tap \( \square \) again to stop playback, and tap \( \Delta / \nabla \) to speed up/slow down playback speed.

Step 7 Tap \( \text{Exit} \) to exit playback.

### 3.7 Set Tag

**Purpose**

You can set tags for the important data of videos, audios, and pictures to search them conveniently.

**NOTE**

You can set video tags during recording or after the recording is finished. For audio and picture tags, you can only set them after audio is taped or picture is taken.

#### 3.7.1 Set Video Tag During Recording

Step 1 During recording, hold \( \square \) for 3 seconds to set a tag for the video. When \( \text{on LCD turns to } \) it means the tag is set successfully.

![Figure 3-4 Set Tag During Recording](image)

Step 2 (Optional) Hold \( \square \) for 3 seconds again to cancel the tag.
3.7.2 Set Video Tag After Recording

Step 1 Go to Main Menu > Playback > Video.

Step 2 Enter the file list.

Step 3 Select the file and hold 📑 for 3 seconds to set tag for it. The file with tag is named in red.

![Figure 3-5 Set Tag After Recording]

Step 4 (Optional) Hold 📑 for 3 seconds again to cancel the tag.

NOTE

Setting tags for audios and pictures are similar with that of settings video tags after recording. You can refer to the steps above.

3.8 Alarm

3.8.1 Auto Alarm

- If memory is full, when you start recording, taping, capturing, or other functions consuming storage, the message “Memory is full.” pops up on LCD, and the body camera sends out an alarm audio. To save new files, you need to backup device first and clear memory.

- If the body camera is in low power, the message “Low power.” pops up on LCD, the body camera sends out an alarm audio, and LED 1 starts flashing.

3.8.2 Manual Alarm

Before you start

Connect the body camera to the platform.
Step

In emergency, hold **SOS** button for more than 1 second to alarm manually and send the alarm to the platform.
Chapter 4 Network Configuration

4.1 Connect to Wi-Fi

**Purpose**
You can access Internet by connecting to a Wi-Fi.

**Before you start**
Configure Wi-Fi parameters, including SSID and key, in Body Camera Assistant. Refer to Chapter 7.6.1 Connect to Dynamic Wi-Fi for details.

Step 1 Go to Main Menu > Network.
Step 2 Tap ▲▼ to position the cursor on Wi-Fi item. And press ▶ to enter the menu.

![Wi-Fi: On](image)

Step 3 Tap ▲▼ to select On.
Step 4 Tap ▼ to save the settings.
Step 5 Reboot the body camera according to the prompt “Reboot device to take effect.”.

Step 6 (Optional) Go to Main Menu > Network > Wi-Fi Information to view the Wi-Fi Status, SSID, and IP.
4.2 Dial via 3G/4G MicroSIM Card

*Purpose*

You can connect to the Internet via 3G/4G public network.

*Before you start*

Install 3G/4G microSIM card. Refer to *Quick Start Guide* for details.

Step 1 Go to **Main Menu > Network**.

Step 2 Tap Δ/∇ to position the cursor on **Dial** item. And press → to enter the menu.

Step 3 Tap Δ/∇ to select **On**.

Step 4 Tap → to save the settings.

Step 5 Reboot the body camera according to the prompt “Reboot device to take effect.”.

Step 6 (Optional) Go to **Main Menu > Network > Dial Information** to view the dialing information.
If you enable 3G/4G and Wi-Fi at the same time, Wi-Fi is in priority. If you want to use 3G/4G, disable Wi-Fi first.

- Dialing via 3G/4G microSIM card is only applicable to DS-MH2311/32G/GLE.

4.3 Connect to Platform

**Purpose**

You can connect the body camera to platform.

**Before you start**

Configure the platform parameters in Body Camera Assistant. Refer to Chapter 7.6.4 Set Platform for details.

Step 1 Go to **Main Menu > Network**.

Step 2 Tap ▲/▼ to position the cursor on **Platform Connection** item. And press ▪ to enter the menu.

Step 3 Tap ▲/▼ to select **On**.

Step 4 Tap ▪ to save the settings.

Step 5 Reboot the body camera according to the prompt “Reboot device to take effect.”.

Step 6 (Optional) Go to **Main Menu > Network > Platform Information** to view the details.
4.4 Set Network Transmission Parameters

**Purpose**
To determine the resolution, frame rate, and bitrate used by iVMS platform when it views body camera image, configure the network transmission parameters.

Step 1 Go to **Main Menu > Network**.

```
Network Settings

Net Resolution: D1
Net Bitrate: 512K
Net Frame Rate: 30fps
Platform Connection: On
Platform Information
Wi-Fi: On
Wi-Fi Information
```

Figure 4-4 Network Settings

Step 2 Tap ▲▼ to position the cursor on **Net Resolution**, **Net Bitrate**, or **Net Frame Rate**. And tap ▼ to enter corresponding menu.

Step 3 Tap ▲▼ to select target parameters.

Step 4 Tap ▼ to save the settings.
Chapter 5 Camera Configuration

Purpose
You can set the video parameters, including resolution, frame rate, bitrate, and so on.

Step 1 Go to Main Menu > Camera.

Step 2 Tap △/▽ to position the cursor on Resolution, Bitrate, Frame Rate, Pre-Record, Post-Record, or other items. And tap □□ to enter corresponding menu.

- **Pre-Record**: The time you set to record before the start recording time. For example, when you start recording at 10:00, if you set the pre-record time as 5 seconds, the camera records it at 9:59:55.

- **Post-Record**: The time you set to record after the stop recording time. For example, when you stop recording ends at 11:00, if you set the post-record time as 5 seconds, it records till 11:00:05.

- **Video Clip**: Maximum size for every video. Video will be automatically recorded into a new clip once reaches the size.

Step 3 Tap △/▽ to select target parameters.

Step 4 Tap □□ to save the settings.

Step 5 Reboot the body camera to take the new settings into effect.
Chapter 6 System Configuration

Go to Main Menu > System to configure parameters such as system volume, voice prompt, LED, auto-lock, IR light, etc.

6.1 Set System Sound

**Purpose**
Turn on and turn off system sound. If it is on, when you press a button or alarm occurs, body camera will send out a sound. It is on by default.

**Step 1** Go to Main Menu > System.

**Step 2** Tap △/▽ to position the cursor on System Volume. And tap △/▽ to enter the menu.

**Step 3** Tap △/▽ to select On or Off.

**Step 4** Tap △/▽ to save the settings.

6.2 Set Voice Prompt

**Purpose**
You can enable or disable voide prompt when you record or tape.

**Step 1** Go to Main Menu > System.

**Step 2** Tap △/▽ to position the cursor on Voice Prompt. And tap △/▽ to enter the menu.

**Step 3** Tap △/▽ to select On or Off.

**Step 4** Tap △/▽ to save the settings.

6.3 Turn on/off LED

**Purpose**
You can turn on or turn off the LEDs. If LEDs are on, they will be automatically turned on or off according to the device status.

**Step 1** Go to Main Menu > System.

**Step 2** Tap △/▽ to position the cursor on LED. And tap △/▽ to enter the menu.

**Step 3** Tap △/▽ to select LED as On or Off.

**Step 4** Tap △/▽ to save the settings.
6.4 Set Auto-Lock Time

*Purpose*
You can set the auto-lock time. The LCD will sleep if there is no operation during the configured time.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Auto-Lock**. And tap ▼ to enter the menu.
Step 3 Tap △/▽ to select the time.
Step 4 Tap ▼ to save the settings.

6.5 Set Language

*Purpose*
Two languages are provided: Chinese and English.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Language**. And tap ▼ to enter Language settings menu.
Step 3 Tap △/▽ to select language as **Chinese** or **English**.
Step 4 Tap ▼ to save the settings.

6.6 Set IR Lights

*Purpose*
The body camera provides IR (Infrared Radiation) lights. At night or dark environment, the IR light helps to get a visible image.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Infrared** item.
Step 3 Tap ▼ to enter **Infrared** menu.
Step 4 Tap △/▽ to select the mode.

- **OFF**: By default, IR light is off.
- **ON**: In night period or dark environment, it is recommended to turn on IR light.
- **AUTO**: Body camera automatically turns on/off IR light according to the brightness of the environment.

Step 5 Tap ▼ to save the settings.
6.7 Set Positioning

*Purpose*
Body camera has a built-in positioning module. By turning on positioning function, the device can obtain the latitude, longitude, and speed information.

*Before you start*
Ensure the body camera locates in a place where the positioning signal exists.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Positioning** item. And tap   to enter the menu.
Step 3 Tap △/▽ to select positioning type as **Off**, **GPS**, **BeiDou**, or **GPS and BeiDou**.
Step 4 Tap   to save the settings.
Step 5 Reboot the body camera to take the new settings into effect.

After device restarted, if positioning succeeded, the positioning icon in live view will turn from ☺ to ☽.

6.8 Set Satellite Time Synchronization

*Purpose*
When the time of body camera is not precise, you can enable satellite time synchronization.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Satellite Time Sync**. item. And tap   to enter the menu.
Step 3 Tap △/▽ to select **On** or **Off**.
Step 4 Tap   to save the settings.

6.9 Set Quick Charging Mode

*Purpose*
You can enable or disable quick charging mode to charge the body camera fully in short time.

Step 1 Go to **Main Menu > System**.
Step 2 Tap △/▽ to position the cursor on **Quick Charging Mode** item. And tap   to enter the menu.
Step 3 Tap △/▽ to select **On** or **Off**.

**On**: When the body camera is being charged, you cannot record or tape, and the body camera cannot be operated.

**Off**: When the body camera is being charged, you can operate the body camera normally.
Step 4 Tap ▼ to save the settings.
Step 5 Reboot the body camera to take the settings into effect.

### 6.10 Set Overwriting

**Purpose**
You can enable overwriting if you want to overwrite the former videos when the memory is full.

**NOTE**
If you enable overwriting, backup the important data in time, or they will be overwritten.

Step 1 Go to **Main Menu > System**.
Step 2 Tap ▲/▼ to position the cursor on **Overwrite** item. And tap ▼ to enter the menu.
Step 3 Tap ▲/▼ to select On or Off.
Step 4 Tap ▼ to save the settings.
Step 5 Reboot the body camera to take the settings into effect.

### 6.11 Set Password Verification

**Purpose**
You can enable or disable password verification. If you enable the function, when you want to play back, you need to input the password first.

Step 1 Go to **Main Menu > System**.
Step 2 Tap ▲/▼ to position the cursor on **Verify** item. And tap ▼ to enter the menu.
Step 3 Input the current password.
Step 4 Tap ▲/▼ to select On or Off.
Step 5 Tap ▼ to save the settings.

### 6.12 View Battery Information

**Purpose**
Battery information menu shows the remaining battery, time to fully charged, and charging status.

Step 1 Go to **Main Menu > System**.
Step 2 Tap ▲/▼ to position the cursor on **Battery Information** item.
Step 3 Tap ▼ to view the battery information.
6.13 View System Information

*Purpose*
System information menu shows the device model, serial number, and version.

**Step 1** Go to *Main Menu > System*.

**Step 2** Tap ▲/▼ to position the cursor on *System Information* item.

**Step 3** Tap ▼ to view the system information.
Chapter 7 Body Camera Assistant

Purpose
You can log in to the body camera via Body Camera Assistant to view logs, videos, audios, and pictures, and configure parameters remotely.

- Get Body Camera Assistant from the attached CD in the package.
- Assistant mentioned below refers to Body Camera Assistant.

7.1 Install Assistant

Purpose
Install Body Camera Assistant according to the operating system of your computer.

- Install BodyCameraAssistant-win32.exe if your computer is in 32-bit operating system.
- Install BodyCameraAssistant-win64.exe if your computer is in 64-bit operating system.

Step 1 Double-click the application to start installing.

![Figure 7-1 Setup](image)

Step 2 Click **Next** to enter Select Destination Location window. Click **Browser** to select the path where to install the assistant.
Step 3 Click **Next** to enter Select Start Menu Folder window. You can edit the shortcut name and click **Browser** to select the folder where to create shortcut.

Step 4 Click **Next** to enter Select Additional Tasks window. You can check **Create a desktop icon**.

Step 5 Click **Next** to enter Ready to Install window. Click **Install** to start installing.
Step 6 During the installation process, the following window will pop up.

Step 7 Click **Next** to start installing device driver.
Step 8 Click **Finish** in Device Driver Installation Wizard and click **Finish** in Body Camera Assistant Wizard to finish the installation.

Step 9 Then the Body Camera Assistant window appears.
7.2 Log in

**Purpose**
Log in to the assistant to operate the body camera.

**Before you start**
Connect the body camera to your computer with the USB cable.

Step 1 Click ![Login button](image) to start the assistant.

Step 2 Click **Recognize device** to start recognizing. Then the recognized device will be listed.

![Recognized Device](image)

Step 3 Click the recognized device, input device password, and then click **Login** to log in. Then the configuration interface shows as below.
The default password is 123456.

If you forget the password, refer to Chapter 7.4 Recover Password for details.

### 7.3 Log out

Step 1 Click on the upper left corner of the interface.

Step 2 Click Exit to log out of the assistant.

### 7.4 Recover Password

**Purpose**

If you forget your device password, you can recover it to the default password.

Step 1 Enter device login window.
Step 2 Click **Forgot Password**.

Step 3 Click **File Export** to export file *DeviceKey.xml*.

Step 4 Send the file to your manufacturer. They will send you an encryption file.

Step 5 Click to import the encryption file received in step 4.

Step 6 Click **Verifying Encryption** to start verifying. If verifying succeeded, device password will be recovered to default.
7.5 Export File

**Purpose**
You can export videos, audios, and pictures to your computer via assistant or USB mode.

7.5.1 Export File via Assistant

**Purpose**
You can download or clear files via assistant.

Step 1 Log in to the body camera via assistant.

Step 2 Click Media Information tab.

Step 3 Click All, Video, Audio, or Picture tab to select the file type you want to download.

Step 4 Check the checkboxes of files you want to download.

Step 5 Click Download to enter File Download window.
Step 6 Click to select Local File Saving Path.

Step 7 Click **OK** to start downloading.

Step 8 (Optional) Click on the upper right corner to view downloading status.

### 7.5.2 Export File via USB Mode

**Purpose**
You can switch the body camera as a USB flash disk and export files to your computer.

Step 1 Log in to the body camera via assistant.

Step 2 Click **Switch USB Mode** on the upper right corner of assistant window.

Step 3 Click **OK** to confirm. Then the assistant will exit.
Step 4 Enter Computer window to view the body camera. It will be recognized like an USB flash disk.

Step 5 Double-click the disk to enter it and export files.

- **DCIM**: It contains the subfolders named with the date of taking pictures, capturing, taping audio, and recording. Double-click the subfolders to see the pictures, audios, and videos.
- **Log**: It contains the operation logs.

### 7.6 Configure Network

#### 7.6.1 Connect to Dynamic Wi-Fi

**Purpose**

You can access internet by connecting to a Wi-Fi. If you want to allocate IP address automatically, set the dynamic Wi-Fi.
Step 1 Click **Device Configuration** tab, and click **Network Settings** item in the left menu list.

![Figure 7-21 Set Dynamic Wi-Fi Parameters](image)

Step 2 Check **Enable** of Wi-Fi Parameters.

Step 3 Input **SSID** and **Key** of Wi-Fi signal you want to connect in text fields.

Step 4 Click **Save** to save the settings.

### 7.6.2 Connect to Static Wi-Fi

**Purpose**

You can access internet by connecting to a Wi-Fi. If you want to guarantee the network stability and remain the access address, set the static Wi-Fi.

Step 1 Click **Device Configuration** tab, and click **Static Wi-Fi Configuration** item in the left menu list.

![Figure 7-22 Set Static Wi-Fi Parameters](image)

Step 2 Check **Enable**.

Step 3 Input the parameters listed.

Step 4 Click **Save** to save the settings.

### 7.6.3 Dial via 3G/4G MicroSIM Card

**Purpose**
You can connect to the Internet via 3G/4G public network.

**Before you start**

Install 3G/4G microSIM card. Refer to Quick Start Guide for details.

**Step 1** Click **Device Configuration** tab, and click **Network Settings** item in the left menu.

![Figure 7-23 Dial via 3G/4G MicroSIM Card](image)

**Step 2** Check **Enable Dialing**.

**Step 3** Input **APN Parameters** including **Name**, **Dial Number**, **User Name**, **Password**, and **MTU**. And select **Identification Type**.

**Step 4** Click **Save** to save the settings.

**NOTE**

- If you enable 3G/4G and Wi-Fi at the same time, Wi-Fi is in priority. If you want to use 3G/4G, disable Wi-Fi first.
- Dialing via 3G/4G microSIM card is only applicable to DS-MH2311/32G/GLE.

### 7.6.4 Set Platform

**Purpose**

You can log in to body camera via iVMS platform to monitor device, receive alarms, and so on.

**Step 1** Click **Device Configuration** tab, and click **Platform Settings** item in the left menu list.
Step 2 Check **Enable** to enable platform connection.

Step 3 Edit **IP**, **Port**, and **Device ID**.

- **IP**: The IP address of platform server you want to connect.
- **Port**: The port of platform. The default port of iVMS is 7660.
- **Device ID**: When adding body camera via platform, the ID is needed. It is the unique identification.

Step 4 Click **Save** to save the settings.

### 7.7 Configure Device

#### 7.7.1 Configure Encoding Parameters

**Purpose**
You can set the parameters for video, including resolution, frame rate, bitrate, and so on.

Step 1 Click **Device Configuration** tab, and click **Device Information** item in the left menu.

Step 2 Select **Video Res.@Frame Rate**, **Net Transfer Res.@Frame Rate**, **Bitrate**, and **Net Transfer Bitrate** from respective drop-down list.

Step 3 Click **Save** to save the settings.
7.7.2 Synchronize Time

**Purpose**
You can synchronize device time with your custom time or network time.

Step 1 Click **Device Configuration** tab, and click **Time Settings** item in the left menu list.

![Figure 7-26 Time Settings](image)

Step 2 Select time synchronization type as **Auto Time Synchrony** or **Manual Time Synchrony**.

- **Auto Time Synchrony**: If selected, **Device Time** and **Time Zone** are not configurable. Assistant will synchronize the device time with your computer time.

- **Manual Time Synchrony**: If selected, you can synchronize device time according to your custom time.

Step 3 (Optional) If **Manual Time Synchrony** is selected, select **Device Time** and **Time Zone** according to your needs.

Step 4 Click **Save** to save the settings.

7.7.3 Configure System Parameters

**Purpose**
You can configure parameters such as system volume, positioning, LED, auto-logout, IR light, etc.

Step 1 Click **Device Configuration** tab, and click **System Settings** item in the left menu list.

![Figure 7-27 System Settings](image)
Step 2 Select the parameters listed.
Step 3 Click **Save** to save the settings.

### 7.8 Maintenance

#### 7.8.1 Set User Information

**Purpose**
You can customize the police ID and device ID.

Step 1 Click **Device Configuration** tab, and click **Device Information** item in the left menu list.

![Figure 7-28 User Information](image)

Step 2 Edit **Police ID** and **Device ID**.

- Device ID cannot be longer than 32 characters.
- Police ID cannot be longer than 10 characters.

Step 3 Click **Save** to save the settings.

#### 7.8.2 Change Password

**Purpose**
You can change password of the body camera.

**WARNING**

**STRONG PASSWORD RECOMMENDED**–We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

Step 1 Click **Device Configuration** tab, and click **Security Settings** item in the left menu list.
Step 2 Input **Current Password**.

Step 3 Input **New Password**.

Step 4 Click **Save** to save the settings.

---

**NOTE**

Password can only contain the number, instead of the letter and the symbol.

### 7.8.3 Log Operations

**Purpose**

By searching logs, you can review the history device status, device operation, and so on. You can also export and clear logs.

Step 1 Click **Log Information** tab.

Step 2 To search logs in a specified duration, do following steps:

1) Edit the log’s start time and end time.

   ![Figure 7-31 Search Condition](image)

2) Click **Search** to start searching. The matched logs will be listed.

Step 3 To export searched logs, do following steps:

1) Search the logs you want to export.
2) Click **Export** to export them.
The exported logs are saved in .txt format in the configured log saving path.

Step 4 To clear logs, do following steps:

1) Search the logs you want to clear.
2) Click Clear to clear them.

7.8.4 Set File Saving Path

**Purpose**
You can customize the local file and log file saving path.

Step 1 Click on the upper right corner of assistant window.
Step 2 Click to customize **Local File Saving Path** and **Log Saving Path**.
Step 3 Click **Save** to save the settings.

![Figure 7-32 Local Configuration](image)

7.8.5 Format Body Camera

**Purpose**
Formatting helps you to clear all data saved in the body camera.

**NOTE**
It’s not recommended to format the body camera like the way you format USB flash drive, or the body camera will fail to recognize the memory.

Step 1 Click **Device Configuration** tab, and click **System Settings** item in the left menu list.
Step 2 Click **Format**.

Step 3 Input password in the text field.

Step 4 Click **OK** to start formatting.

**7.8.6 Reset System**

*Purpose*

You can reset all parameters to default settings by resetting system.

Step 1 Click **Device Configuration** tab, and click **System Settings** item in the left menu.

Step 2 Click **Factory Defaults**.
Step 3 Input password in the text field.

Step 4 Click OK to start resetting.

7.8.7 Upgrade Body Camera

**Purpose**
You can upgrade body camera via the assistant.

![ NOTE ]

It is recommended to upgrade device with the help of professional technical support.

Step 1 Switch the body camera to USB mode. Refer to Chapter 7.5.2 Export File via USB Mode for details.

Step 2 Enter the removable disk of body camera through Computer.

Step 3 Copy the upgrade file into the removable disk.

Step 4 Reboot the body camera.

Step 5 Go to System Settings of the LCD menu.

Step 6 Tap  △ / ▽  to position the cursor on System Upgrade item.

Step 7 Tap  △△△  to start upgrading.
Chapter 8 Troubleshooting

● Unable to start up.
  a) **Possible Reason:** Device runs out of power.
     **Solution:** Get device be charged.
  b) **Possible Reason:** The battery is damaged or runs out of power.
     **Solution:** Change battery.

● Unable to start recording.
  a) **Possible Reason:** Memory is full.
     **Solution:** Back up device and clear device memory.
  b) **Possible Reason:** Formatting memory error.
     **Solution:** Format the memory via assistant. For detailed steps, refer to 7.5.7 Formatting in user manual.
  c) **Possible Reason:** Device is abnormal.
     **Solution:** Reboot device.

● Unable to dial.
  a) **Possible Reason:** Wi-Fi is enabled and connected.
     **Resolution:** Disable Wi-Fi.
  b) **Possible Reason:** 3G/4G microSIM card is not installed well.
     **Resolution:** Reinstall 3G/4G microSIM card.
  c) **Possible Reason:** 3G/4G microSIM card is fees owed.
     **Resolution:** Renew the card.
  d) **Possible Reason:** Device is abnormal.
     **Resolution:** Reboot device.

● Unable to log in.
  a) **Possible Reason:** Password error.
     **Resolution:** Reset your password. For detailed steps, refer to 7.5.8 System Resetting in user manual.
  b) **Possible Reason:** Device is abnormal.
     **Resolution:** Reboot device.
