Data Protection

During the use of device, personal data will be collected, stored and processed. To protect data, the development of Hikvision devices incorporates privacy by design principles. For example, for device with facial recognition features, biometrics data is stored in your device with encryption method; for fingerprint device, only fingerprint template will be saved, which is impossible to reconstruct a fingerprint image. As data controller, you are advised to collect, store, process and transfer data in accordance with the applicable data protection laws and regulations, including without limitation, conducting security controls to safeguard personal data, such as, implementing reasonable administrative and physical security controls, conduct periodic reviews and assessments of the effectiveness of your security controls.

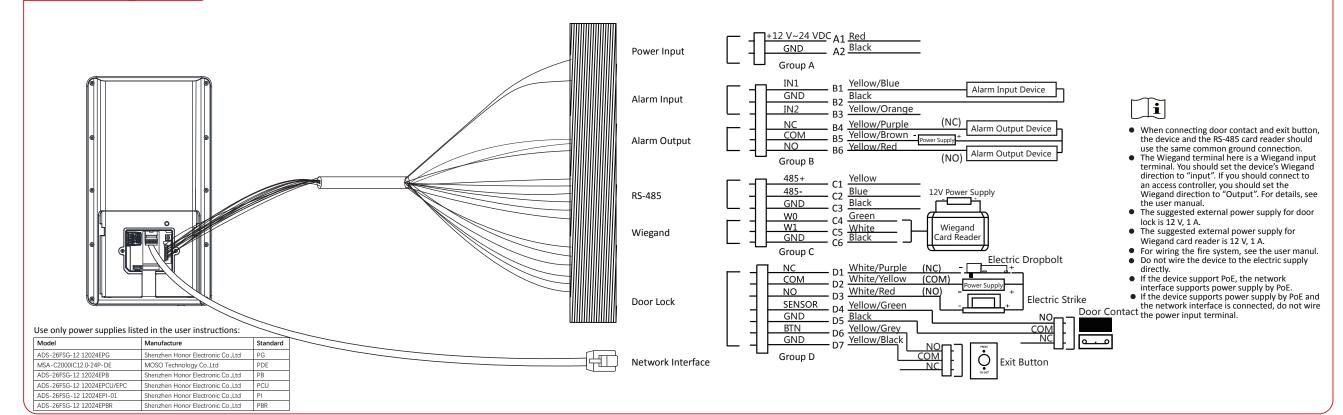

Scan the QR code to get the user manual for detailed information.

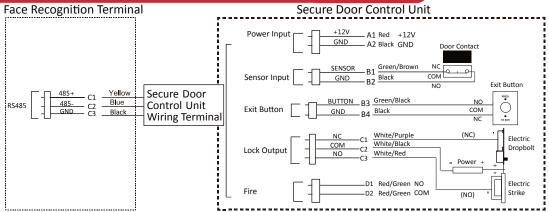

3.2 Device Wiring (With Secure Door Control Unit)

- The secure door control unit should connect to an external power supply separately. The suggested external power supply is 12 V, 0.5 A.
- For scenarios with high safety requirement, use the secure door control unit wiring first.
- You can ask the technical support to purchase for the secure door control unit separately.
- The picture here are parts of the wiring. For details, see the secure door control unit's user

4 Activation

Activation via Device

After powering on, you will enter the activation page.

- 1. Create a password and confirm the password.
- 2. Tap **Activate** to activate the device.
- Ti Characters containing admin and nimda are not supported to be set as activation password.

STRONG PASSWORD RECOMMENDED-

We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

Steps Afterwards

After activating, you can select language, set password change type, set reserved questions, set application mode, set network parameters, access to Hik-Connect, set privacy, and set administrator

5 Temperature Measurement Settings

- Hold the screen surface for 3 s and slide to right/left and verify the identity to enter the
- 2. Tap "Temperature" to enter the Temperature Settings page. Configure the parameters.

• Enable Temperature Detection:

When enabling the function, the device will authenticate the permissions and at the same time take the tempearture. When disabling the device, the device will authenticate the permissions only

Over-Temperature Alarm Threshold:

Edit the threshold according to actual situation. If the detected temperature is higher than the configured one, an alarm will be triggered. By default, the value is 37.3°.

• Temperature Compensation:

If the measured temperature is higher/lower than the actual object's temperature, you can set the compensation temperature here. Available range: -99 °C to 99 °C.

Door Not Open When Detecting Abnormal Termperature:

When Enabling the function, the door will not open when the detected temperature is higher than the configured temperature threshold. By default, the temperature is

Temperature Measurement Only:

When enabling the function, the device will not authenticate the permissions, but only take the temperature. When disabling the function, the device will authenticate the permsissions and at the same time take the temperature.

• Unit: Select a temperature unit according to your preference.

6 Add Face Picture

- 1. Hold the screen surface for 3 s and slide to right/left and verify the identity to enter the main page.
- 2. Enter the User Management page, tap + to enter the Add User
- 3. Set the user parameters according to actual needs.
- 4. Tap Face add the face information according to the instruc-

You can view the captured picture on the screen Make sure the face picture is in good quality and size. For details about the tips and positions when collecting or comparing the

face picture, see the contents on the right.

- 5. If the picture is in good condition, tap Or tap to take another face picture.
- 6. Tap the save icon to save the settings. Go back to the initial page to start authentication. For other authentication methods, see the device user manual.
- Use other authentication methods if the device is affected by the light or other items.

Biometric recognition products are not completely applicable to anti-spoofing environments. If you require a higher security level, use multiple authentication modes

Tips When Collecting/Comparing Face Picture

- Do not wear hat, sunglasses, or other accessories that can affect the facial recognition function.
- Do not make your hair cover your eyes, ears, etc. and heavy makeup is not allowed.

Posture

In order to get a good quality and accurate face picture, position your face looking at the camera when collecting or comparing face picture

Size

Make sure your face is in the middle of the collecting window.

Regulatory Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

- Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 —Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: .. This device may not cause harmful interference.

2. This device must accept any interference received, including interference that may cause undesired operation.

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the RE Directive 2014/53/EU, the EMC Directive 2014/30/EU, the ROHS Directive 2011/65/EU. 2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium

designated collection point. For more information see: www.recvclethis.info 2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplies upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For

Marning

- In the use of the product, you must be in strict compliance with the electrical safety regulations of the nation and region.
- CAUTION: To reduce the risk of fire, replace only with the same type and rating of fuse.

nore information see: www.recvclethis.info

- CAUTION: This equipment is for use only with Hikvision's bracket. Use with other (carts, stands, or carriers) may result in instability causing injury.
- To prevent possible hearing damage, do not listen at high volume levels for long periods. Please use the power adapter, which is provided by normal company. The power consumption cannot be less
- than the required value.
- Do not connect several devices to one power adapter as adapter overload may cause over-heat or fire hazard.
- Please make sure that the power has been disconnected before you wire, install or dismantle the device.
- When the product is installed on wall or ceiling, the device shall be firmly fixed.
- If smoke, odors or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.
- If the product does not work properly, please contact your dealer or the nearest service center. Never attempt to disassemble the device yourself. (We shall not assume any responsibility for problems caused by unauthorized

- + identifies the positive terminal(s) of equipment which is used with, or generates direct current. + identifies the negative terminal(s) of equipment which is used with, or generates direct current.
- No naked flame sources, such as lighted candles, should be placed on the equipment.
- The USB port of the equipment is used for connecting to a USB flash drive only.
- The serial port of the equipment is used for debugging only.
- Burned fingers when handling the fingerprint sensor metal. Wait one-half hour after switching off before
- Install the equipment according to the instructions in this manual.
- To prevent injury, this equipment must be securely attached to the floor/wall in accordance with the installation
- Do not drop the device or subject it to physical shock, and do not expose it to high electromagnetism radiation. Avoid the equipment installation on vibrations surface or places subject to shock (ignorance can cause equipment damage).
- Do not place the device in extremely hot (refer to the specification of the device for the detailed operating temperature), cold, dusty or damp locations, and do not expose it to high electromagnetic radiation.
- The device cover for indoor use shall be kept from rain and moisture.
- Exposing the equipment to direct sun light, low ventilation or heat source such as heater or radiator is forbidden (ignorance can cause fire danger).
- Do not aim the device at the sun or extra bright places. A blooming or smear may occur otherwise (which is not a malfunction however), and affecting the endurance of sensor at the same time
- Please use the provided glove when open up the device cover, avoid direct contact with the device cover, because the acidic sweat of the fingers may erode the surface coating of the device cover
- Please use a soft and dry cloth when clean inside and outside surfaces of the device cover, do not use alkaline
- Please keep all wrappers after unpack them for future use. In case of any failure occurred, you need to return the
 device to the factory with the original wrapper. • Transportation without the original wrapper may result in damage on the device and lead to additional costs.
- Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery
- Biometric recognition products are not completely applicable to anti-spoofing environments. If you require a higher security level, use multiple authentication modes.
- Please make sure that the biometric recognition accuracy will be affected by the collected pictures' quality and the light in the environment, which cannot be completely correct.
