2 Installation

Before you start:
- The minimum bearing weight of the wall or other places should be three times heavier than the device weight.
- Dial-up before you install.

Steps:
1. Drill holes on the wall or other places according to the holes on the guide rail.
2. Insert the screw sockets of the set screws (supplied) in the drilled holes.
3. Secure the guide rail on the wall or other places with the screws (supplied).
4. Push the device to the guide rail and fix it.

Scan the QR code to get the user manual for detailed information.
3 Device Wiring

When the panic button is triggered, all relays keep connected. It is valid for all floors.
When the fire alarm button is triggered, all relays keep disconnected. It is invalid for all floors.
When the maintenance button is triggered, all relays keep disconnected. It is invalid for all floors.

When the panic button, the maintenance button, fire alarm button, and the event alarm are triggered, the main elevator controller will control the distributed controller via the linkage output to perform the linked actions.

4 Activation

Activating via the Web Client, the SADP tool, and the client software are supported.

Activating Device via Web Client
1. Input the device IP address in the address bar. For the first login, the web client will enter the activation interface. The device default IP address: 192.0.0.64
2. Input the user name and the password according to the tips in the interface.
3. Confirm the password.

Activating Device via Client Software
1. Click Device Management icon to enter the Device Management interface.
2. Select an inactive device from the device list. Create a password in the right side of the interface and confirm the password.
3. Confirm the password.
4. Click "Edit Network" to configure the device IP address, Port No., Subnet Mask, Gateway, etc.

Activating Device via SADP Tool
1. Download SADP Software.
2. Activate Device:
   - Check the inactive device from the device list. Create a password in the right side of the interface and confirm the password.
3. Edit Device IP Address:
   - Check the inactive device from the device list. Create a password in the right side of the interface and confirm the password.
4. Click OK to start activate.

Regulatory Information

FCC Information
Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance 10cm between the radiator and your body.

FCC Conditions
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement
This product and - if applicable - the supplied accessories too are marked with “CE” and comply therefore with the applicable harmonized European standards listed under the RE Directive 2014/53/EU, the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU, the 2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recylethis.info

Use only power supplies listed in the user instructions:
