About this Manual

The Manual includes instructions for using and managing the Product. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. Please find the latest version of this Manual at the Hikvision website (https://www.hikvision.com/).

Please use this Manual with the guidance and assistance of professionals trained in supporting the Product.

Trademarks

HIKVISION and other Hikvision's trademarks and logos are the properties of Hikvision in various jurisdictions.

Other trademarks and logos mentioned are the properties of their respective owners.

Disclaimer

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THIS MANUAL AND THE PRODUCT DESCRIBED, WITH ITS HARDWARE, SOFTWARE AND FIRMWARE, ARE PROVIDED “AS IS” AND “WITH ALL FAULTS AND ERRORS”. HIKVISION MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY, SATISFACTORY QUALITY, OR FITNESS FOR A PARTICULAR PURPOSE. THE USE OF THE PRODUCT BY YOU IS AT YOUR OWN RISK. IN NO EVENT WILL HIKVISION BE LIABLE TO YOU FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, OR INDIRECT DAMAGES, INCLUDING, AMONG OTHERS, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, OR LOSS OF DATA, CORRUPTION OF SYSTEMS, OR LOSS OF DOCUMENTATION, WHETHER BASED ON BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY, OR OTHERWISE, IN
CONNECTION WITH THE USE OF THE PRODUCT, EVEN IF HIKVISION HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSS.

YOU ACKNOWLEDGE THAT THE NATURE OF INTERNET PROVIDES FOR INHERENT SECURITY RISKS, AND HIKVISION SHALL NOT TAKE ANY RESPONSIBILITIES FOR ABNORMAL OPERATION, PRIVACY LEAKAGE OR OTHER DAMAGES RESULTING FROM CYBER-ATTACK, HACKER ATTACK, VIRUS INSPECTION, OR OTHER INTERNET SECURITY RISKS; HOWEVER, HIKVISION WILL PROVIDE TIMELY TECHNICAL SUPPORT IF REQUIRED.

YOU AGREE TO USE THIS PRODUCT IN COMPLIANCE WITH ALL APPLICABLE LAWS, AND YOU ARE SOLELY RESPONSIBLE FOR ENSURING THAT YOUR USE CONFORMS TO THE APPLICABLE LAW. ESPECIALLY, YOU ARE RESPONSIBLE, FOR USING THIS PRODUCT IN A MANNER THAT DOES NOT INFRINGE ON THE RIGHTS OF THIRD PARTIES, INCLUDING WITHOUT LIMITATION, RIGHTS OF PUBLICITY, INTELLECTUAL PROPERTY RIGHTS, OR DATA PROTECTION AND OTHER PRIVACY RIGHTS. YOU SHALL NOT USE THIS PRODUCT FOR ANY PROHIBITED END-USES, INCLUDING THE DEVELOPMENT OR PRODUCTION OF WEAPONS OF MASS DESTRUCTION, THE DEVELOPMENT OR PRODUCTION OF CHEMICAL OR BIOLOGICAL WEAPONS, ANY ACTIVITIES IN THE CONTEXT RELATED TO ANY NUCLEAR EXPLOSIVE OR UNSAFE NUCLEAR FUEL-CYCLE, OR IN SUPPORT OF HUMAN RIGHTS ABUSES.

IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATER PREVAILS.

Data Protection

During the use of device, personal data will be collected, stored and processed. To protect data, the development of Hikvision devices incorporates privacy by design principles. For example, for device with facial recognition features, biometrics data is stored in your device with encryption method; for fingerprint device, only fingerprint template will be saved, which is impossible to reconstruct a fingerprint image.

As data controller, you are advised to collect, store, process and transfer data in accordance with the applicable data protection laws and regulations, including without limitation, conducting security controls to safeguard personal data, such as, implementing reasonable administrative and physical security controls, conduct periodic reviews and assessments of the effectiveness of your security controls.
Symbol Conventions

The symbols that may be found in this document are defined as follows.

<table>

Safety Instruction

⚠️ Warning

- All the electronic operation should be strictly compliance with the electrical safety regulations, fire prevention regulations and other related regulations in your local region.
- Please use the power adapter, which is provided by normal company. The power consumption cannot be less than the required value.
- Do not connect several devices to one power adapter as adapter overload may cause over-heat or fire hazard.
- Please make sure that the power has been disconnected before you wire, install or dismantle the device.
- When the product is installed on wall or ceiling, the device shall be firmly fixed.
- If smoke, odors or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.
- If the product does not work properly, please contact your dealer or the nearest service center. Never attempt to disassemble the device yourself. (We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.)

⚠️ Caution

- Do not drop the device or subject it to physical shock, and do not expose it to high electromagnetism radiation. Avoid the equipment installation on vibrations surface or places subject to shock (ignorance can cause equipment damage).
- Do not place the device in extremely hot (refer to the specification of the device for the detailed operating temperature), cold, dusty or damp locations, and do not expose it to high electromagnetic radiation.
- The device cover for indoor use shall be kept from rain and moisture.
- Exposing the equipment to direct sun light, low ventilation or heat source such as heater or radiator is forbidden (ignorance can cause fire danger).
- Do not aim the device at the sun or extra bright places. A blooming or smear may occur otherwise (which is not a malfunction however), and affecting the endurance of sensor at the same time.
• Please use the provided glove when open up the device cover, avoid direct contact with the device cover, because the acidic sweat of the fingers may erode the surface coating of the device cover.

• Please use a soft and dry cloth when clean inside and outside surfaces of the device cover, do not use alkaline detergents.

• Please keep all wrappers after unpack them for future use. In case of any failure occurred, you need to return the device to the factory with the original wrapper. Transportation without the original wrapper may result in damage on the device and lead to additional costs.

• Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery manufacturer.

• Improper replacement of the battery with an incorrect type may defeat a safeguard (for example, in case of some lithium battery types).

• Do not dispose of the battery into fire or a hot oven, or mechanically crush or cut the battery, which may result in an explosion.

• Do not leave the battery in an extremely high temperature surrounding environment, which may result in an explosion or leakage of flammable liquid or gas.

• Do not subject the battery to extremely low air pressure, which may result in an explosion or the leakage of flammable liquid or gas.

• CAUTION: Risk of explosion if the battery is replaced by an incorrect type.
Regulatory Information

FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC/IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
ce matériel est conforme aux limites de dose d'exposition aux rayonnements, FCC / CNR-102 énoncée dans un autre environnement. Cette équipement devrait être installé et exploité avec distance minimale de 20 entre le radiateur et votre corps.

**EU Conformity Statement**

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info

**Industry Canada ICES-003 Compliance**

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. this device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.
Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radioexempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
1. L'appareil ne doit pas produire de brouillage, et
2. L'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.

Cet équipement doit être installé et utilisé à une distance minimale de 20 cm entre le radiateur et votre corps.

**Note**

- Alarm input interface cannot be edited. Refers to the actual model.
- You can only wire the SEN1/SEN2 terminal with the door contact. And wire the BTN1/BTN2 terminal with the exit button.

### 2.2 Wiring Description

#### 2.2.1 Door Lock Wiring
Note

- Terminal NC1/COM1 is set as default for accessing electric bolt. Terminal NO1/COM1 is set as default for accessing electric strike.
- To connect electric lock in terminal NO2/COM2/NC2, it is required to set the output of terminal NO2/COM2/NC2 to be electric lock with iVMS-4200 Client Software.

2.2.2 Exit Button Wiring

Wire the BTN1/BTN2 terminal with the door contact.

Here takes BTN1 for example.
2.2.3 Door Contact Wiring

Wire the SEN1/SEN2 terminal with door contact.

Here takes SEN1 for example.

![Door Contact Wiring Diagram]

Figure 2-4 Door Contact Wiring
3 Installation

**Note**

- Make sure the device in the package is in good condition and all the assembly parts are included.
- The power supply the door station supports is 12 VDC. Please make sure your power supply matches your door station.
- Make sure all the related equipment is power-off during the installation.
- Check the product specification for the installation environment.

3.1 Gang Box

![Figure 3-1 Dimension of the Gang Box](image-url)
3.2 Flush Mounting with Gang Box

Steps
1. Cave an installation hole in the wall. Pull the cable out from the wall.

   Note
   • The suggested dimension of the installation hole is 364.3 mm (W) × 118.6 mm (H) × 40.2 mm (D).
   • The suggested length of the cables left outside is 250 mm.

2. Install the gang box into the wall.
   1) Remove the plastic sheet of the gang box with the tool.
   2) Insert the gang box into the installation hole. Mark the gang box screw holes' position with a marker, and take out the gang box.
   3) Drill 4 holes according to the marks on the wall, and insert the expansion sleeves into the screw holes.
   4) Fix the gang box with 4 expansion bolts.

3. Fix the gap between the gang box and wall with concrete. Remove the mounting ears with tool after concrete is dry. Connect the cables according to the Wiring Description.

4. Insert the door station into the gang box. Slide the door station down and fix it with 2 set screws. Apply Silicone sealant among the joints between the device and the wall (except the lower side) to keep the raindrop from entering.
Figure 3-2 Flush Mounting with Gang Box
4 Activation

4.1 Activate Device Locally

You are required to activate the device first by setting a strong password for it before you can use the device.

Steps
1. Power on the device to enter the activation page automatically.
2. Create a password and confirm it.

</tbody>
</table>
Note

- The password required 8 to 16 characters.
- The way to enter the password, take button 2 as an example: Press 2 to enter the number ‘2’ or hold 2 for 1.5 s and press 2 again to enter the character ‘a’.
- When you have entered the password, press # to switch to confirm the password.
- Press * to delete the wrong character.

3. Press # to activate.

4.2 Activate Device via Client Software

You can only configure and operate the door station after creating a password for the device activation.

Default parameters of door station are as follows:

- Default IP Address: 192.0.0.65.
- Default Port No.: 8000.
- Default User Name: admin.

Steps

1. Run the client software, click Maintenance and Management → Device Management → Device to enter the page.
2. Click Online Device.
3. Select an inactivated device and click Activate.
4. Create a password, and confirm the password.

Note

We highly recommend you to create a strong password of your own choosing (using a minimum of 8 characters, including at least three kinds of following categories: upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you change your password regularly, especially in the high security system, changing the password monthly or weekly can better protect your product.

5. Click OK to activate the device.
Note

- When the device is not activated, the basic operation and remote operation of device cannot be performed.
- You can hold the Ctrl or Shift key to select multiple devices in the online devices, and click the Activate button to activate devices in batch.

4.3 Activate Device via Web

You are required to activate the device first by setting a strong password for it before you can use the device.

Default parameters of the door station are as follows:
- Default IP Address: 192.0.0.65.
- Default Port No.: 8000.
- Default User Name: admin

Steps
1. Power on the device, and connect the device to the network.
2. Enter the IP address into the address bar of the web browser, and click Enter to enter the activation page.

Note

The computer and the device should belong to the same subnet.

3. Create and enter a password into the password field.
4. Confirm the password.
5. Click OK to activate the device.
5 Local Operation

5.1 Local Configuration

5.1.1 Edit Network Parameters

After activating, you should edit the network parameters.

Steps
1. Hold * and # at the same time to enter the authentication page.
2. Authenticate via administrator.
   - Authenticate face/card/fingerprint to login.
   - Press # to enter the password to login.
3. Switch to Network settings according to the tips on the page. Press # to enter the settings page.
4. Edit the parameters according to your needs.
5. Press * to save and exit.

5.1.2 Local Settings

Configure the local parameters (including but not limited to, edit numbers and edit recognition parameters).

Before You Start
Enter the prerequisites here (optional).
Enter the context of your task here (optional).

Steps
1. Hold * and # at the same time to enter the authentication page.
2. Authenticate via administrator.
   - Authenticate face/card/fingerprint to login.
   - Press # to enter the password to login.
3. Switch to Local Settings according to the tips on the page.
4. Press # to enter the settings page.

Door Station Settings
Edit the parameters of the door station (including but not limited to, community No., building No., floor No., room No. and device mode).

Steps

1. Configure the parameters according to the actual needs.

   Note
   - Outer door station can only edit the Community No., Project No. and No.
   - The No. of the main door station is 0.
   - The No. of sub door stations should be larger than 0 and ranges from 1 to 99.
   - Each unit should add 1 main door station. Up to 8 sub door stations can be added to the main door station.

2. Optional: Adjust the brightness of the screen.

3. Optional: Enable the Channel Mode according to your needs.

4. Optional: Select the language.

5. After configuration, press * to save and exit.

Recognition with Mask

Steps

1. Enable Face with Mask Detection.

2. Select the Passing Level of Face Mask Recognition.

3. Edit the Face with Mask & Face 1:N Matching Threshold and Face with Mask & Face 1:N Matching Threshold (ECO Mode).

5.1.3 Add Residents

User Management

You can add, edit and delete the informations of the users.

Steps

1. Hold * and # at the same time to enter the authentication page.

2. Authenticate via administrator.
   - Authenticate face/card/fingerprint to login.
   - Press # to enter the password to login.
3. Switch to User Management according to the tips on the page.
4. Press # to enter the settings page.

**Add Users**

You can add cards, face pictures, fingerprints, permissions and room No. for the users.

**Steps**

1. Select +Add, and press # to enter the adding page.
2. Edit the room No.
3. Add cards.
   1) Switch to the card and press #.
   2) Enter the card No. manually or present the card on the card reading area to get the card No. automatically.
   3) Press # to add.
4. Add face pictures.
   1) Switch to the face and press #.
   2) Press # to capture. Press # again to save.

**Note**
- Press * to capture again.
- Up to 5000 face pictures can be added to the device. Refers to the actual model.
- Each user can add one face picture only.

5. Add fingerprints.
   1) Switch to the fingerprint and press #.
   2) Select +Add Fingerprint and press # to add.
   3) Put your finger on the fingerprint recognition area.
   4) Press * to save and exit.

**Note**
Up to 10 fingerprints can be added to the same user.

6. Switch to the permission and press # to set.
7. Press * to save and exit.
5.1.4 About

You can view the device model, system version and QR Code of the device.

Steps
1. Hold * and # at the same time to enter the authentication page.
2. Authenticate via administrator.
   - Authenticate face/card/fingerprint to login.
   - Press # to enter the password to login.
3. Switchen to About according to the tips on the page.
4. Press # to enter the page.

5.2 Video Intercom Operation

5.2.1 Call Resident

The door station can work as main/sub door station, and outer door station, which correspond to different calling resident modes respectively.

Call Resident from Main/Sub Door Station

Press call button to enter the calling page.
Enter the room No. and press call button.

Call Resident from Outer Door Station

Press call button to enter the calling page.
Enter 【Building No. + # + Unit No. + # + Room No.】 and press call button to call resident.

5.2.2 Call Center

Press call button to enter the calling page.
Press center button to call. Press * to cancel during calling management center.

5.3 Unlock Door
5.3.1 Unlock by Password

Unlock by Common Password

Press any digit button on the main/sub door station page to enter the calling page.
Enter 【# + Common Password + #】 to unlock the door.

Unlock by Public Password

Note

Make sure you have created the public password via iVMS-4200 Client Software remotely.

Press any digit button on the main/sub door station page to enter the calling page.
Enter 【# + Public Password + #】 to unlock the door.

5.3.2 Unlock by Presenting Card

Note

Make sure you have issued the card to the device. Refers to User Management for details.

Present the card on the card reading area to unlock.

5.3.3 Unlock by Fingerprint

Note

• Make sure you have added the fingerprint to the device.
• Fingerprint function may vary with different modules. Please refer to the actual devices.

Put your finger on the finger recognition module to unlock.

5.3.4 Unlock by Face
Note

Make sure you have added your face picture to the device. Refers to the User Management for details.

Face forward at the camera to unlock.
6 Remote Configuration via Web

6.1 Live View

In the browser address bar, enter the IP address of the device, and press the Enter key to enter the login page.

Enter the user name and password and click Login to enter the Live View page. Or you can click Live View to enter the page.

![Figure 6-1 Live View](image)

- You can start/stop live view, capture, record, audio on/off, two-way audio, etc.
- The stream type can be set as main stream or sub stream.
- For IE (Internet Explorer) or Google users, the device support two-way audio communication.

**Note**

Live View function may vary with different models. Please refer to the actual product.

6.2 User Management

You can add, delete or search the information of the user.

Click User to enter the settings page.

- Click Add and enter the username, floor No. and room No. to add.
- Click Edit to modify the informations of the user.
- Check the box of the user and click **Delete** to delete the selected user.
- Enter the keyword and click **Search**. The information will display in the list.

### 6.3 Device Management

You can manage the linked device on the page. Click **Device List** to enter the settings page.

#### Add Device

- Click **Add** to add the indoor station or sub door station. Enter the parameters and click **OK** to add.
- Click **Import**. Enter the information of the device in the template to import devices in batch.

#### Export

Click **Export** to export the information to the PC.

#### Synchronize

Click **Synchronize** to synchronize the information.

### 6.4 Parameters Settings

Click **Configuration** to set the parameters of the device.

Remote configuration in iVMS-4200 and Batch Configuration Tool is the same as that in Web. Here takes the configuration in web for example.

**Note**

Run the browser, click **Internet Options** → **Security** to disable the Protected Mode.

### 6.4.1 Local Parameters Settings

You can configure the parameters of the live view, record files and captured pictures. The record files and captured pictures are the ones you record and capture by using
the web browser. You can also set and view the saving paths of the captured pictures and recorded videos on the PC that running the web browser.

Click **Local** to enter the settings page.

**Live View Parameters**

**Stream Type**

Set the stream type as **Main Stream** or **Sub-stream**.

**Image Format**

Select the image format for picture capture.

Click **Save** to enable the settings.

**Record File Parameters**

**Save record files to**

Set the saving path for the manually recorded video files.

Click **Save** to enable the settings.

**Picture and Clip Settings**

**Save snapshots in live view to**

Set the saving path of the manually captured pictures in live view mode.

**Note**

You can click **Browse** to change the directory for saving the clips and pictures, and click **Open** to open the set folder of clips and picture saving.

Click **Save** to enable the settings.

**6.4.2 System Settings**

Follow the instructions below to configure the system settings, include System Settings, Maintenance, Security, and User Management, etc.

Click **System** to enter the settings page.
Basic Information

Click **System Settings → Basic Information** to enter the settings page. On the page, you can edit **Device Name** and **Device No.** Set the **Language** and **System Type** according to your needs.

Click **Save** to enable the settings.

Time Settings

Click **System Settings → Time Settings** to enter the settings page. Select the **Time Zone** of your location from the drop-down list.

- Enable **NTP**, set the **Server Address**, **NTP Port** and **Interval**.
- Enable **Manual Time Sync.**, set the time manually or check the **Sync. with computer time**.

Click **Save** to enable the settings.

Maintenance

Click **Maintenance → Upgrade & Maintenance** to enter the settings page.

![Figure 6-2 Maintenance](image)

- **Reboot**: Click **Reboot** to reboot the device.
- **Restore**
  
  Click **Restore** to reset all the parameters, except the IP parameters and user information, to the default settings.

  **Default**
Click Default to restore all parameters to default settings.

- Export parameters:
  1. Click Device Parameters to pop up the dialog box.
  2. Set and confirm the encryption password.
  3. Click OK to export parameters.

- Import Config. File:
  1. Click Browse to select the configuration file.
  2. Click Import and enter the encryption password to import.

- Upgrade: Click Browse to select the upgrade file.

**Note**

The upgrading process will last 1 to 10 minutes, do not power off during the upgrading. The device reboots automatically after upgrading.

**User Management**

Click User Management to enter the settings page.

Administrator can edit the permission for the users.

**Note**

We highly recommend you to create a strong password of your own choosing (using a minimum of 8 characters, including at least three kinds of following categories: upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you change your password regularly, especially in the high security system, changing the password monthly or weekly can better protect your product.

**Online Users**

Click User Management → Online Users to enter the page.
Click **Refresh** to get the present information.

**Arming/Disarming Information**

Click **User Management → Arming/Disarming Information** to view the information. Click **Refresh** to get the present information.

### 6.4.3 Network Settings

**TCP/IP Settings**

TCP/IP settings must be properly configured before you operate the device over network. The device supports IPv4.

**Steps**

1. Click **Network → Basic Settings → TCP/IP** to enter the settings page.
2. Configure the network parameters.
   - Check DHCP, the device will get the parameters automatically.
   - Set the IPv4 Address, IPv4 Subnet Mask and IPv4 Default Gateway manually.
3. Configure the DNS server.
4. Edit Alarm Center IP and Alarm Host Port.
5. Click Save to enable the settings.

**Port Settings**

**Steps**
1. Click Network → Basic Settings → Port to enter the settings page.
2. Set the ports of the device.
HTTP Port

The default port number is 80, and it can be changed to any port No. which is not occupied.

HTTPS Port

The default port number is 443, and it can be changed to any port No. which is not occupied.

RTSP Port

The default port number is 554.

Server Port

The default server port number is 8000, and it can be changed to any port No. ranges from 2000 to 65535.

3. Click Save to enable the settings.

SIP Setting

Steps

1. Click Network → Basic Settings → SIP to enter the settings page.

Figure 6-5 SIP Settings
2. Check **Enable VOIP Gateway**.
3. Configure the SIP parameters.
4. Click **Save** to enable the settings.

**SNMP Settings**

**Before You Start**
Before setting the SNMP, please download the SNMP software and manage to receive the camera information via SNMP port. By setting the Trap Address, the camera can send the alarm event and exception messages to the surveillance center.

**Steps**
1. Click **Network → Advanced → SNMP** to enter the settings page.
2. Check the checkbox of Enable SNMPv1, Enable SNMP v2c to enable the feature correspondingly.
   1) Edit **Read SNMP Community** and **Write SNMP Community**.
   2) Enter the **Trap Address**, **Trap Port** and **Trap Community**.

   **Note**
   To lower the risk of information leakage, you are suggested to enable SNMP v3 instead of SNMP v1 or v2.

3. Check the check box of Enable SNMPv3 to set the SNMPv3 parameters.
4. Click **Save** to enable the settings.

**FTP Settings**

**Steps**
1. Click **Network → Advanced → FTP** to enter the settings page.
2. Check **Enable FTP**.

3. Select **Server Type**.

4. Input the **Server IP Address** and **Port**.

5. Configure the FTP Settings, and the user name and password are required for the server login.

7. Set the picture naming rules.

8. Click **Save** to enable the settings.
6.4.4 Video & Audio Settings

Video Parameters

Steps

1. Click Video/Audio → Video to enter the settings page.

![Figure 6-7 Video Parameters](image)

2. Select the Stream Type.

3. Configure the video parameters.

**Stream Type**

Select the stream type to main stream or sub stream.

**Video Type**
Select the stream type to video stream, or video & audio composite stream. The audio signal will be recorded only when the Video Type is Video & Audio.

Resolution
Select the resolution of the video output.

Bitrate Type
Select the bitrate type to constant or variable.

Video Quality
When bitrate type is selected as Variable, 6 levels of video quality are selectable.

Frame Rate
Set the frame rate. The frame rate is to describe the frequency at which the video stream is updated and it is measured by frames per second (fps). A higher frame rate is advantageous when there is movement in the video stream, as it maintains image quality throughout.

Max. Bitrate
Set the max. bitrate from 32 to 16384 Kbps. The higher value corresponds to the higher video quality, but the better bandwidth is required.

Video Encoding
The device supports H.264.

I Frame Interval
Set I Frame Interval from 1 to 400.

Audio Encoding
The device support G.711ulaw.

4. Click Save to enable the settings.

Audio Parameters

Steps
1. Click Video/Audio → Audio to enter the settings page.
2. Adjust the Input Volume and Output Volume.

Note
Available range of volume: 0 to 10.
3. Click **Save** to enable the settings.

### 6.4.5 Display Settings

Configure the image adjustment, backlight settings and other parameters in display settings.

**Steps**

1. Click **Image → Display Settings** to enter the display settings page.

![Figure 6-8 Display Settings](image)

2. Select the **Format**.

3. Set the display parameters.

**WDR**

Wide Dynamic Range can be used when there is a high contrast of the bright area and the dark area of the scene.

**Brightness**

Brightness describes bright of the image, which ranges from 1 to 100.

**Contrast**

Contrast describes the contrast of the image, which ranges from 1 to 100.

**Saturation**

Saturation describes the colorfulness of the image color, which ranges from 1 to 100.

**Sharpness**

Sharpness describes the edge contrast of the image, which ranges from 1 to 100.
4. Set the **Day/Night Mode**.
   - Set **Day Mode** or **Night Mode** manually.
   - Set the mode as **Auto** and edit the sensitivity according to your needs.
   - Set the mode as **Scheduled-Switch**. Set the start time and end time.

**Note**

Daytime is from configured start time to configured time. The rest of the time is set as night by default.

5. Click **Save** to enable the settings.

### 6.4.6 Event Settings

**Motion Detection**

Motion detection detects the moving objects in the configured surveillance area, and a series of actions can be taken when the alarm is triggered.

**Steps**

1. Click **Event → Motion** to enter the settings page.
2. Check **Enable Motion Detection** to enable the function.

3. Click **Draw Area**. Click and drag the mouse on the live video to draw a motion detection area. Click **Stop Drawing** to finish drawing one area. Click **Save** to save the settings.

   - **Clear Area**
   - **Adjust Sensitivity**

4. Click **Arming Schedule** to edit the arming schedule.

5. Click on the time bar and drag the mouse to select the time period. Click **Save** to save the settings.

   - **Delete Schedule**

6. Click **Linkage Method** to enable the linkages.

**Figure 6-9 Motion Detection**
Send an exception or alarm signal to the remote management software when an event occurs.

7. Click **Save** to enable the settings.

**Access Control Events**

**Steps**

1. Click **Event → Basic Event → Access Control Event** to enter the settings page.

![Access Control Event settings page]

2. Select the **Major Type** as **Device Event** or **Door Event**.

![Figure 6-10 Access Control Event]
3. Select the type of the **Normal Linkage** for the event.

4. Click **Save** to enable the settings.

### 6.4.7 Intercom Settings

**Device ID Configuration**

**Steps**

1. Click **Device ID Configuration** to enter the page.

![Figure 6-11 Device ID Configuration](image)

2. Select the device type from the drop-down list, and set the corresponding information.

3. Click **Save** to enable the device number configuration.

---

**Note**

- For main door station (D series or V series), the serial No. is 0.
- For sub door station (D series or V series), the serial No. cannot be 0. Serial No. ranges from 1 to 99.
- For each villa or building, at least one main door station (D series or V series) should be configured, and one sub door stations (D series or V series) can be customized.
- For one main door station (D series or V series), up to 8 sub door stations can be configured.
Linked Network Settings

Steps
1. Click Intercom → Linked Network Settings to enter the settings page.
2. Set the main station IP address and main station SIP client Port.
3. Set the private SIP server IP address and private SIP Server Port.
4. Set the SIP Client Port.
5. Enter the password.
6. Click Save to enable the settings.

Time Parameters

Click Intercom → Time Parameters to enter the page.
Configure the time parameters and click Save.

⚠️ Note
- For door station, maximum speaking time and maximum message time should be configured.
- Maximum speaking time varies from 90s to 120s, and maximum message time varies from 30s to 60s.

Intercom Protocol

Slide to enable protocol 1.0.

6.4.8 Access Control Settings

Door Parameters

Steps
1. Click Access Control → Door Parameters to enter the settings page.
2. Select the door and edit the door name.
3. Set door contact status.
4. Set lock action time.
5. Click **Save** to enable the settings.

**Permission Password**

**Steps**

1. Click **Access Control → Permission Password** to enter the settings page.

2. Select the password type.
3. Change the password.
4. Set the number of doorphone.
5. Click **Save** to enable the settings.
Card Security

Click **Access Control → Card Security** to enter the settings page. Slide to enable card encryption parameters. Click **Save** to enable the settings.

Elevator Control

Before You Start

- Make sure your door station is in the mode of main door station. Only the main door station support elevator control function.
- Make sure your door station has been connected to the elevator controller via RS-485 wire if you want to use RS-485 interface.

Steps

1. Click **Access Control → Elevator Control** to enter the corresponding configuration page.
2. Check to enable elevator control function.
3. Select an Elevator No., and select an elevator controller type for the elevator.
4. Set the Negative Floor.
5. Select the Interface Type as RS-485 or Network Interface. And enable the elevator control.
   - If you select RS-485, make sure you have connected the door station to the elevator controller with RS-485 wire.
   - If you select Network interface, enter the elevator controller's IP address, port No., user name, and password.
6. Click **Save** to enable the settings.

**Note**

- Up to 4 elevator controllers can be connected to one door station.
- Up to 10 negative floors can be added.
- Make sure the interface types of elevator controllers, which are connected to the same door station are consistent.

RS-485 Settings

Set the working mode to linked device.
Steps
1. Click **Access Control → RS485 Settings** to enter the settings page.

![Figure 6-15 RS-485 Settings](image)

2. Select the No.
3. Select the working mode.
4. Click **Save** to enable the settings.

6.4.9 VCA Settings

**VCA Configuration**

Adjust the face recognition parameters according to your needs.

**Steps**

1. Click **VCA Configuration** to enter the settings page.
2. Enable face anti-spoofing.
   1) Set the live face detection security level and application mode according to your needs.
   2) Set continuous face recognition interval and face 1:N matching threshold.
3. Enable ECO mode.
   1) Set ECO mode threshold.
   2) Set ECO mode 1:N interval.
4. Enable force to night mode according to your environment.
5. Click **Save** to enable the settings.

**Area Configuration**

Click **VCA Configuration → Area Configuration** to enter the settings page.

Drag the frame to adjust the size of the recognition area.
7 Configuration via Client Software

7.1 Edit Network Parameters

To operate and configure the device via LAN (Local Area Network), you need connect the device in the same subnet with your PC. You can edit network parameters via iVMS-4200 client software.

Steps
1. Select an online activated device and click the Modify Netinfo.
2. Edit the device IP address and gateway address to the same subnet with your computer.
3. Enter the password and click OK to save the network parameters modification.

Note
- The default port No. is 8000.
- The default IP address of the door station is 192.0.0.65.
- After editing the network parameters of device, you should add the devices to the device list again.

7.2 Add Device

You should add device to the software so as to configure the device remotely.

7.2.1 Add Online Device

Before You Start
Make sure the device to be added is in the same subnet with your computer. Otherwise, please edit network parameters first.

Steps
1. Click Online Device to select an active online device.
2. Click Add.
3. Enter corresponding information, and click Add.
7.2.2 Add Device by IP Address

Steps
1. Click **Add** to pop up the adding devices dialog box.
2. Select **IP/Domain** as **Adding Mode**.
3. Enter corresponding information.
4. Click **Add**.

7.2.3 Add Device by IP Segment
You can add many devices at once whose IP addresses are among the IP segment.

Steps
1. Click +Add to pop up the dialog box.
2. Select IP Segment as Adding Mode.
3. Enter corresponding information, and click Add.

7.3 Remote Configuration

Select the device, click 🛠️ to configure the parameters remotely.

Remote configuration set the same as Web browser. Please refers to Remote Configuration via Web for the details.

7.4 Device Management

Device management includes device activation, adding device, editing device, and deleting device, and so on.

After running the iVMS-4200, video intercom devices should be added to the client software for remote configuration and management.

7.5 Organization Management

On the main page of the Client Software, click ⬅️ PersonalManagement to enter the configuration page.

7.5.1 Add Organization

Steps
1. In the organization list on the left, click +Add.
2. Enter the Organization Name as desired.
3. Click OK to save the adding.
4. Optional: You can add multiple levels of organizations according to the actual needs.
   1) You can add multiple levels of organizations according to the actual needs.
2) Then the added organization will be the sub-organization of the upper-level organization.

**Note**

Up to 10 levels of organizations can be created.

### 7.5.2 Modify and Delete Organization

You can select the added organization and click to modify its name.

You can select an organization, and click X button to delete it.

**Note**

- The lower-level organizations will be deleted as well if you delete an organization.
- Make sure there is no person added under the organization, or the organization cannot be deleted.

### 7.6 Person Management

After adding the organization, you can add person to the organization and manage the added person such as issuing cards in batch, importing and exporting person's information in batch, etc.

**Note**

- Up to 2,000 persons can be added.
- Up to 5 cards can be added to each person.

### 7.6.1 Add Person

Person information is necessary for the video intercom system. And when you set linked device for the person, the intercom between intercom devices can be realized.

**Steps**

1. Select an organization in the organization list and click Add on the Person panel to pop up the adding person dialog.
2. Set basic person information.

1) Enter basic information: name, gender, tel, birthday details, effective period and email address.

**Note**
The length of person name should be less than 15 characters.

2) Click **Add** face to upload the photo.

**Note**
The picture should be in *.jpg format.

- **Click Upload** Select the person picture from the local PC to upload it to the client.
- **Click Take Phone** Take the person's photo with the PC camera.
- **Click Remote Collection** Take the person's photo with the collection device.

3. Issue the card for the person.

1) Click **Credential → Card**.
2) Click + to pop up the Add Card dialog.
3) Select **Normal Card** as **Card Type**.
4) Enter the **Card No.**
5) Click **Read** and the card(s) will be issued to the person.

4. Link the device to the person.

1) Set the linked devices.

**Linked Device**
You can bind the indoor station to the person.

**Note**
If you select **Analog Indoor Station** in the Linked Device, the **Door Station** field will display and you are required to select the door station to communicate with the analog indoor station.

**Room No.**
You can enter the room No. of the person.
2) Click **OK** to save the settings.

5. Click **Add** to save the settings.

### 7.6.2 Modify and Delete Person

Select the person and click **Edit** to open the editing person dialog.

To delete the person, select a person and click **Delete** to delete it.

---

**Note**

If a card is issued to the current person, the linkage will be invalid after the person is deleted.

---

### 7.6.3 Import and Export Person Information

The person information can be imported and exported in batch.

**Steps**

1. **Exporting Person**: You can export the added persons' information in Excel format to the local PC.
   
   1) After adding the person, you can click **Export Person** to pop up the following dialog.
   
   2) Click ... to select the path of saving the exported Excel file.
   
   3) Check the checkboxes to select the person information to export.
   
   4) Click **OK** to start exporting.

2. **Importing Person**: You can import the Excel file with persons information in batch from the local PC.
   
   1) Click **Import Person**.
   
   2) You can click **Download Template for Importing Person** to download the template first.
   
   3) Input the person information to the downloaded template.
   
   4) Click ... to select the Excel file with person information.
   
   5) Click **OK** to start importing.

### 7.6.4 Get Person Information from Device
If the added device has been configured with person information (including person details, fingerprint, issued card information), you can get the person information from the device and import to the client for further operation.

**Steps**

**Note**

This function is only supported by the device the connection method of which is TCP/IP when adding the device.

1. In the organization list on the left, click to select an organization to import the persons.
2. Click **Get from Device** to pop up the dialog box.
3. The added device will be displayed.
4. Click to select the device and then click **Get** to start getting the person information from the device.

**Note**

- The person information, including person details, person's fingerprint information (if configured), and the linked card (if configured), will be imported to the selected organization.
- If the person name stored in the device is empty, the person name will be filled with the issued card No. after importing to the client.
- The gender of the persons will be **Male** by default.

### 7.6.5 Change Person to Other Organization

You can move the person to another organization if needed.

**Steps**

1. Select the person in the list and click **Change Organization**.
2. Select the organization to move the person to.
3. Click **OK** to save the settings.

### 7.6.6 Add Person in Batch

Enter a short description of your task here (optional).

**Before You Start**

Enter the prerequisites here (optional).
Enter the context of your task here (optional).

**Steps**

1. Enter your first step here.
   Enter the result of your step here (optional).

**Example**

Enter an example that illustrates the current task (optional).

**What to do next**

Enter the tasks the user should do after finishing this task (optional).

### 7.6.7 Issue Card in Batch

You can issue multiple cards for the person with no card issued in batch.

**Steps**

1. Click **Batch Issue Cards** to enter the dialog page. All the added person with no card issued will display in the Person(s) with No Card Issued list.

![Figure 7-2 Issue Card in Batch](image-url)
2. Click **Settings**.

![Settings](image)

**Figure 7-3 Card Settings**

3. Select **Card Type** and **Card No. Type**.
4. Click **OK** to save the settings.

**Result**

After issuing the card to the person, the person and card information will display in the Person(s) with Card Issued list.

### 7.6.8 Permission Settings

**Add Permissions**

**Steps**

1. On the main page, click **AccessControlInfo → Access Group** to enter the page.
2. Click **+Add** to pop up the adding dialog box.
3. Configure the parameters.
1) Enter the **Name** of the permission.

2) Select the **Template** of the schedule.

3) Check the person to **Selected** according to your needs.

4) Check the device to **Selected** according to your needs.

4. Click **Save**.

5. Check the permission and click **Apply All to Device**.

   The status of the permission displays as **Applied**.

6. **Optional:** Click **Applying Status** to check the details.

### Modify/Delete Permissions

On the page of the permission settings, click **[ ]** to edit the parameters of the permission.

Select one or more permissions, click **Delete** to remove the permissions.

### 7.7 Video Intercom Settings

The Video Intercom Management module provides the function of video intercom, checking call logs and managing notice via the iVMS-4200 Client Software.

---

**Note**

For the user with access control module permissions, the user can enter the Access Control module and manage video intercom and search information.

---

You should add the device to the software and configure the person to link the device in Access Control module before your configuration remotely.

On the main page, click **AccessControlInfo → Video Intercom → Video Intercom** on the left bar to enter the Video Intercom page.

### 7.7.1 Receive Call from Door Station

**Steps**

1. Select the client software in the device page to start calling the **iVMS-4200 Client Software** and an incoming call dialog will pop up in the client software.

2. Click **Answer** to answer the call. Or click **Hang Up** to decline the call.

3. After you answer the call, you will enter the In Call window.
• Click \( \text{音量} \) to adjust the volume of the loudspeaker.
• Click \( \text{音量} \) to adjust the volume of the microphone.
• Click **Hang Up** to hang up the dialog.
• Click \( \text{门禁} \) to open the door remotely.

**Note**

• One video intercom device can only connect with one client software.
• The maximum ring duration can be set from 15s to 60s via the Remote Configuration of the video intercom device.
• The maximum speaking duration between indoor station and iVMS-4200 can be set from 120s to 600s via the Remote Configuration of indoor station.
• The maximum speaking duration between door station and iVMS-4200 can be set from 90s to 120s via the Remote Configuration of door station.

### 7.7.2 Live View via Door Station

**Steps**

1. On the main page of the client software, click **Main View** to enter the Live View page.
2. In the left list of the window, double-click the device IP or click the play icon to live view.
3. **Optional:** On the Live View page, control-click and select **Capture** to get the picture of the live view.

### 7.7.3 Release Notice

You can create different types of notices and send them to the residents. Four notice types are available, including Advertising, Property, Alarm and Notice Information.

**Before You Start**

Make sure the person has been added to the client.

**Steps**

1. On the video intercom settings page, click **Notice** to enter the page.
2. Click **+Add** to pop up the adding dialog box.
3. Select the person according to your needs.
4. Edit the **Subject**, **Type** and **Information**.
5. Click **View** to select the picture.
6. Click **Send**.

**Note**
- Up to 63 characters are allowed in the Subject field.
- Up to 6 pictures in the JPEG format can be added to one notice. And the maximum size of one picture is 512KB.
- Up to 1023 characters are allowed in the Information field.

### 7.7.4 Search Video Intercom Information

#### Search Call Logs

**Steps**
1. On the Video Intercom page, click **Call Log** to enter the page.

![Figure 7-4 Search Call Logs](image)

**Figure 7-4 Search Call Logs**

2. Set the search conditions, including call status, device type, start time and end time.

**Call Status**

Click ✂ to unfold the drop-down list and select the call status as **Dialed**, **Received** or **Missed**. Or select **All** to search logs with all statuses.

**Device Type**
Click ▼ to unfold the drop-down list and select the device type as **Indoor Station, Door Station, Outer Door Station** or **Analog Indoor Station**. Or select **All Devices** to search logs with all device types.

**Start Time/End Time**
Click the time icon to specify the start time and end time of a time period to search the logs.

**Reset the Settings**
Click **Reset** to reset all the configured search conditions.

3. Click **Search** and all the matched call logs will display on this page.

4. **Optional**: Check the detailed information of searched call logs, such as call status, ring/speaking duration, device name, resident organization, etc.

5. **Optional**: Input keywords in the Search field to filter the desired log.

6. **Optional**: Click **Export** to export the call logs to your PC.

### Search Notice

**Steps**

   **Reset the Settings**
   Click **Reset** to reset all the configured search conditions.

3. Click **Search** and the matched notice will display on this page.

4. **Optional**: Click **Export** to export the notices to your PC.
A. Appendix

Tips When Collecting/Comparing Face Picture

• Keep your expression naturally when collecting or comparing face pictures.
• Do not wear hat, sunglasses, or other accessories that can affect the facial recognition function.
• Do not make your hair cover your eyes, ears, etc. and heavy makeup is not allowed.
• In order to get a good quality and accurate face picture, position your face looking at the camera when collecting or comparing face pictures.
• Make sure your face is in the middle of the collecting window.
• The recommended distance when collecting/comparing face pictures is between 400 mm and 500 mm.

Tips When Importing Face Picture

• The requirements of the face pictures are the same as the requirements for collecting.
• Picture format: JPG.
• The photo scale is 5:7. The pixel size is a minimum of 480 and the height is a minimum of 640.
• Picture size cannot exceed 200 KB.
• A pure background color is required. White is the best.
B. Communication Matrix and Device Command

Communication Matrix

Scan the following QR code to get the device communication matrix.
Note that the matrix contains all communication ports of Hikvision access control and video intercom devices.
