Regulatory Information

FCC Information

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info.

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.
Safety Instruction
These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss. The precaution measure is divided into “Warnings” and “Cautions”.

Warnings: Serious injury or death may occur if any of the warnings are neglected.
Cautions: Injury or equipment damage may occur if any of the cautions are neglected.

<td>Follow these safeguards to prevent serious injury or death.</td>
<td>Follow these precautions to prevent potential injury or material damage.</td>
</tr>
</tbody>
</table>

**Warnings**
- In the use of the device, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard. Refer to technical specifications for detailed information.
- Do not connect multiple devices to one power adapter to avoid over-heating or a fire hazard caused by overload.
- Make sure that the plug is firmly connected to the power socket.
- Make sure that the device is firmly fixed if wall mounting or ceiling mounting is adopted.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cord, and then contact the service center.
- Never attempt to disassemble the camera by unprofessional personal.

**Cautions**
- Do not drop the camera or subject it to physical shock.
- Do not touch sensor modules with fingers.
- Do not place the camera in extremely hot, cold (the operating temperature shall be -40°C to 60°C), dusty or damp locations, and do not expose it to high electromagnetic radiation.
- If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently.
- Do not aim the camera at the sun or extra bright places.
- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.
- Do not expose the device to high electromagnetic radiation or extremely hot, cold, dusty or damp environment.
- To avoid heat accumulation, good ventilation is required for the operating environment.
- Keep the camera away from liquid while in use for non-water-proof device.
While in delivery, the camera shall be packed in its original packing, or packing of the same texture.

1 Introduction

1.1 Product Features

The camera is applicable for both indoor and outdoor conditions, and the application scenarios include road, warehouse, parking lot, office, campus, etc.

The main features are as follows:

- High performance CMOS sensor
- 1080p resolution
- Auto white balance
- Auto electronic shutter
- Auto gain control (AGC)
- IR cut filter
- 4 in 1 video output (switchable TVI/AHD/CI/CVBS)
- 3-axis adjustment

1.2 Overview

![Figure 1-1 Overview of Type I Camera](image)

| Note: Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS. |

2 Installation

**Before you start:**

- Make sure that the device in the package is in good condition and all the assembly parts are included.
- Make sure that all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
- Check whether the power supply is matched with your power output to avoid the damage.
- Make sure the wall is strong enough to withstand three times the weight of the camera and the mount.
If the wall is cement, insert expansion bolts before installing the camera. If the wall is wooden, use self-tapping screws to secure the camera.

If the product does not function properly, contact your dealer or the nearest service center. Do NOT disassemble the camera for repair or maintenance by yourself.

2.1 Ceiling Mounting

**Before you start:**
Both wall mounting and ceiling mounting are suitable for the dome camera. Ceiling mounting will be taken as an example in this section. And you can take steps of ceiling mounting as a reference for wall mounting.

**Steps:**
1. Paste the drill template to the ceiling.
2. Drill screw holes and the cable hole (optional) on the ceiling according to the supplied drill template.

![The Drill Template](image)

**Note:**
Drill the cable hole (hole A) when adopting the ceiling outlet to route the cable.
3. Loosen the screws on the bubble of the dome camera to remove the bubble, and the black liner.

![Remove the Bubble and the Black Liner](image)

4. Attach the back box of camera to the ceiling and secure them with supplied screws.

![Attach the Back Box/Base Plate](image)
Note:
- The supplied screw package contains self-tapping screws, and expansion bolts.
- For cement ceiling, expansion bolts are required to fix the camera. For wooden ceiling, self-tapping screws are required.

5. Route the cables through the cable hole, or the side opening.

6. Connect the corresponding cables, such as power cord, and video cable.

7. Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

8. Fit the black liner back to the camera.

9. Tighten the screws on the bubble of the dome camera to finish the installation.

2.2 Wall Mounting

Before you start:
You need to purchase a wall mount first.

Steps:
1. Drill four screw holes in the wall according to the holes of the mount.
2. Attach the mount to the wall by aligning the four screw holes of the mount with expansion screws on the wall.
3. Secure the mount with four hex nuts, and washers.

![Figure 2-7 Install Wall Mount](image)

4. Refer to step 3 of 2.1 Ceiling Mounting to remove dome camera's bubble and the black liner.
5. Attach the back box of the dome camera to the wall mount, and secure them with supplied screws.

![Figure 2-8 Attach the Back Box to the Mount](image)

6. Route the cables through the mount.
7. Repeat steps 6 to 9 of the 2.1 Ceiling Mounting to complete the installation.

### 2.3 Inclined Ceiling Mounting

**Before you start:**
You need to purchase an inclined ceiling mount first.

**Steps:**
1. Paste the drill template to the ceiling.
2. Drill screw holes and the cable hole (optional) on the ceiling according to the supplied drill template.

![Figure 2-9 The Drill Template](image)

**Note:**
Drill the cable hole when adopting the ceiling outlet to route the cable.

3. Install the inclined ceiling mount to the ceiling with supplied screws, as shown in Figure 2-10.
4. Route the cables through the cable hole, or the side opening of the inclined ceiling mount.
5. Fix the camera to the inclined ceiling mount with the supplied screws.

6. Repeat the steps 5 to 9 of the 2.1 Ceiling Mounting to complete the installation.

3 Menu Description

**Purpose:**
Call the menu by clicking button on the PTZ Control interface, or call the preset No.95.

**Steps:**
1. Connect the camera with the TVI DVR, and the monitor, shown as the figure 3-1.
2. Power on the analog camera, TVI DVR, and the monitor to view the image on the monitor.
3. Click PTZ Control to enter the PTZ Control interface.
4. Call the camera menu by clicking button, or call the preset No. 95.
5. Click the direction arrow to control the camera.
   1). Click up/down direction button to select the item.
   2). Click Iris + to confirm the selection.
   3). Click left/right direction button to adjust the value of the selected item.

3.1 VIDEO FORMAT
You can select the video format as 1080p@25fps, or 1080p@30fps.

3.2 LANGUAGE
Supports English, and Chinese.

3.3 MAIN MENU

3.3.1 EXPOSURE
You are allowed to set BRIGHTNESS, EXPOSURE MODE, AGC, and DWDR.
BRIGHTNESS
Brightness refers to the brightness of the image. You can set the brightness value from 1 to 10 to darken or brighten the image. The greater the value is, the brighter the image is.

EXPOSURE MODE
You can set the EXPOSURE MODE as GLOBAL, or BLC.
- **GLOBAL**
  GLOBAL refers to the normal exposure mode which adjusts lighting distribution, variations, and non-standard processing.
- **BLC (Backlight Compensation)**
  BLC (Backlight Compensation) compensates light to the object in the front to make it clear, but this may cause the over-exposure of the background where the light is strong.
  You can set the brightness value from 0 to 8 to darken or brighten the image. The greater the value is, the brighter the image is.

AGC (Auto Gain Control)
It optimizes the clarity of the image in poor light conditions. The AGC level can be set as HIGH, MIDDLE, or LOW. Select OFF to disable the AGC function.

**Note:**
The noise will be amplified when the AGC is on.

DWDR (Digital Wide Dynamic Range)
The digital wide dynamic range helps the camera provide clear images even under backlight circumstances. WDR balances the brightness level of the whole image and provides clear images with details.

3.3.2 WB (White Balance)
White balance, the white rendition function of the camera, is to adjust the color temperature according to the environment. It can remove unrealistic color casts in the image. You can set WB mode as ATW, or MBW.
- **ATW**
  Under the ATW mode, white balance is being adjusted automatically according to the color temperature of the scene illumination.
- **MBW**
  You can set the RGAIN/BGAIN value from 1 to 255 to adjust the shades of red/blue color of the image.
3.3.3 DAY/NIGHT
COLOR, B/W (Black White), and SMART are selectable for DAY and NIGHT switches.

COLOR
The image is colored in day mode all the time.

B/W
The image is black and white all the time.

SMART
You can turn on/off the INFRARED, and set the value of SMART IR in this menu.

3.3.4 VIDEO SETTINGS
Move the cursor to VIDEO SETTINGS and click Iris+ to enter the submenu. IMAGE MODE, CONTRAST, SHARPNESS, COLOR GAIN, DNR, and MIRROR are adjustable.

- IR LIGHT
You can turn on/off the infrared to meet the requirements of different circumstances.

- SMART IR
The Smart IR function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. The SMART IR value can be adjusted from 0 to 3. The greater the value is, the more obvious effects are.

IMAGE MODE is used to adjust the image saturation, and you can set it as STD (Standard) or HIGH-SAT (High Saturation).

CONTRAST
This feature enhances the difference in color and light between parts of an image. You can set the CONTRAST value from 1 to 10.
SHARPNESS
Sharpness determines the amount of detail an imaging system can reproduce. You can set the SHARPNESS value from 1 to 10.

COLOR GAIN
Adjust this feature to change the gain of the color. The value ranges from 1 to 10.

DNR (Digital Noise Reduction)
The DNR function can decrease the noise effect, especially when capturing moving images in poor light conditions, and delivering more accurate and sharper image. You can set the DNR value from 1 to 9.

MIRROR
OFF, H, V, and HV are selectable for mirror.
OFF: The mirror function is disabled.
H: The image flips 180° horizontally.
V: The image flips 180° vertically.
HV: The image flips 180° both horizontally and vertically.

3.3.5 RESET
Reset all the settings to the factory default.

3.3.6 SAVE & EXIT
Move the cursor to SAVE & EXIT, and click Iris+ to save the settings, and exit the menu.
