This manual may contain technical incorrect places or printing errors, and the content is subject to change without notice. The updates will be added to the new version of this manual. We will readily improve or update the products or procedures described in the manual.
Regulatory Information

FCC Information
Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Conditions
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement
This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the Low Voltage Directive 2014/35/EU, the EMC Directive 2014/30/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info.

Industry Canada ICES-003 Compliance
This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

Warning
This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.
Safety Instruction
These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss.
The precaution measure is divided into “Warnings” and “Cautions”.
**Warnings**: Serious injury or death may occur if any of the warnings are neglected.
**Cautions**: Injury or equipment damage may occur if any of the cautions are neglected.

<table>
<thead>
<tr>
<th>Warnings Follow these safeguards to prevent serious injury or death.</th>
<th>Cautions Follow these precautions to prevent potential injury or material damage.</th>
</tr>
</thead>
</table>

**Warnings**
- In the use of the device, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard. Refer to technical specifications for detailed information.
- Do not connect multiple devices to one power adapter to avoid over-heating or a fire hazard caused by overload.
- Make sure that the plug is firmly connected to the power socket.
- Make sure that the device is firmly fixed if wall mounting or ceiling mounting is adopted.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cord, and then contact the service center.
- Never attempt to disassemble the camera by unprofessional personal.

**Cautions**
- Do not drop the camera or subject it to physical shock.
- Do not place the camera in extremely hot, cold (the operating temperature shall be -40°C to 60°C), dusty or damp locations, and do not expose it to high electromagnetic radiation.
- Do not touch sensor modules with fingers.
- If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently.
- Do not aim the camera at the sun or extra bright places.
- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.
- Do not expose the device to high electromagnetic radiation or extremely hot, cold, dusty or damp environment.
- To avoid heat accumulation, good ventilation is required for the operating environment.
• Keep the camera away from liquid while in use for non-water-proof device.
• While in delivery, the camera shall be packed in its original packing, or packing of the same texture.

1 Introduction

1.1 Product Features
The main features are as follows:
- High performance CMOS sensor
- Low illumination, 0.01 Lux@F1.2, AGC ON), 0 Lux with IR
- IR cut filter with auto switch
- OSD menu with configurable parameters
- Auto white balance
- Internal synchronization
- SMART IR mode
- PoC (with -E)
- 3-axis adjustment

Note:
- Type II camera is applicable to indoor only.
- For the models have PoC function, you can connect the video cable of the camera to the PoC device to get the power supply.

1.2 Overview

Before you start:
- The device cables vary according to different models. The cables of each type are shown in the figures below, refer to the actual device.
- You can debug the camera by connecting an auxiliary HD TVI cable to the auxiliary video output.

1.2.1 Overview of Type I Camera

![Figure 1-1 Overview of Type I Camera](image)

1.2.2 Overview of Type II Camera

![Figure 1-2 Overview of Type II Camera](image)
1.2.3 Overview of Type III Camera

![Diagram of Type III Camera](image)

Figure 1-3 Overview of Type III Camera

2 Installation

**Before you start:**
- Make sure that the device in the package is in good condition and all the assembly parts are included.
- Make sure that all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
- Check whether the power supply is matched with your power output to avoid the damage.
- Make sure the wall is strong enough to withstand three times the weight of the camera and the bracket.
- If the wall is cement, you need to insert expansion bolts before you install the camera. If the wall is wooden, you can use self-tapping screws to secure the camera.
- If the product does not function properly, contact your dealer or the nearest service center. Do NOT disassemble the camera for repair or maintenance by yourself.

2.1 Installation of Type I and Type II Camera

2.1.1 Ceiling Mounting

**Before you start:** Both wall mounting and ceiling mounting are suitable for the dome camera. Ceiling mounting will be taken as an example in this section. You can take steps of ceiling mounting as a reference for wall mounting.

**Steps:**
1. Paste the drill template to the ceiling.
2. Drill screw holes and the cable hole (optional) on the ceiling according to the supplied drill template.

![Drill Template for Type I Camera](image)

**Note:** Drill the cable hole, when adopting the ceiling outlet to route the cable.
3. Loosen the screws on the bubble of the dome camera to remove the bubble and the black liner.

4. Attach the back box of type I camera/base plate of type II camera to the ceiling and secure them with supplied screws.

![Type I Camera](image1.png)  ![Type II Camera](image2.png)

Figure 2-2 Attach the Back Box/Base Plate

**Note:**
- In the supplied screw package, both self-tapping screws and expansion bolts are contained.
- For cement ceiling, expansion bolts are required to fix the camera. For wooden ceiling, self-tapping screws are required.

5. Route the cables through the cable hole, or the side opening.

6. Align the camera with the back box/base plate, and tighten the screws to secure the camera with the back box/base plate.

![Type I Camera](image3.png)  ![Type II Camera](image4.png)

Figure 2-3 Fix the camera to the Ceiling

7. Connect the corresponding cables, such as power cable and video cable.

8. Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

![Type I Camera](image5.png)  ![Type II Camera](image6.png)

Figure 2-4 3-Axis Adjustment

9. Fit the black liner back to the camera and tighten the screws on the bubble of the dome camera to finish the installation.
2.1.2 Wall Mounting

**Before you start:**
You need to purchase a wall mounting bracket separately.

**Steps:**
1. Drill 4 screw holes in the wall according to the holes of the bracket.
2. Attach the bracket to the wall by aligning the 4 screw holes of the bracket with expansion screws on the wall.
3. Secure the bracket with 4 hex nuts and washers.

4. Refer to step 3 of 2.1 Installation of Type I and Type II Camera
5. Ceiling Mounting to remove dome camera’s bubble and the black liner.
6. Attach the back box/base plate of the dome camera to the wall mounting bracket and secure them with supplied screws.

7. Route the cables through the bracket.
8. Repeat steps 6 to 9 of the 2.1 Installation of Type I and Type II Camera
9. Ceiling Mounting to complete the installation.

2.1.3 In-Ceiling Mounting

**Before you start:**
You need to purchase an in-ceiling mounting bracket separately.

**Steps:**
1. Attach the drill template on the ceiling.
2. Drill the screw holes and cable holes (optional) in the ceiling according to the supplied drill template.

**Note:**
Drill the cable hole when adopting the ceiling outlet to route the cable.
3. Screw the bolts through the mounting bracket by aligning with the 2 bolt holes. Fit the toggles onto the bolts.
4. Push the two bolts through the two screw holes in the ceiling. Rotate the bolt till the toggle holds the ceiling tightly.

Figure 2-7 Install the In-Ceiling Mounting Bracket

5. Route the cables through the cable hole.
6. Fix the camera to the in-ceiling mounting bracket with the supplied screws.

Figure 2-8 Fix the Camera to the Mount

7. Connect the corresponding cables, such as power cord, and video cable.
8. Repeat steps 8 to 9 of the 2.1 Installation of Type I and Type II Camera
9. Ceiling Mounting to complete the installation.

2.2 Mounting with Inclined Ceiling Mount of Type I Camera

Before you start:
You need to purchase an inclined ceiling mount separately.

Steps:
1. Drill 4 screw holes and the cable hole in the ceiling according to the holes of the inclined ceiling mount.
2. Install the inclined ceiling mount to the ceiling with supplied screws, as shown in Figure 2-9.

Figure 2-9 Fix the Inclined Ceiling Mount

3. Route the cables through the cable hole, or the side opening of the inclined ceiling mount.
4. Fix the camera to the inclined ceiling mount with the supplied screws.
5. Repeat the steps 7 to 9 of the 2.1 Ceiling Mounting section to complete the installation.

2.3 Ceiling Mounting of Type III Camera

**Before you start:**
Both wall mounting and ceiling mounting are suitable for the dome camera. Ceiling mounting will be taken as an example in this section. And you can take steps of ceiling mounting as a reference for wall mounting.

**Steps:**
1. Paste the drill template to the ceiling.
2. Drill screw holes and the cable hole (optional) on the ceiling according to the supplied drill template.
3. Loosen the screws on the bubble of the dome camera to remove the bubble.
4. Attach the back box of camera to the ceiling and secure them with supplied screws.

**Note:**
- Drill the cable hole (hole A) when adopting the ceiling outlet to route the cable.
- The supplied screw package contains self-tapping screws, and expansion bolts.
For cement ceiling, expansion bolts are required to fix the camera. For wooden ceiling, self-tapping screws are required.

5. Route the cables through the cable hole, or the side opening.

6. Connect the corresponding cables, such as power cord, and video cable.

7. Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

8. Fit the bubble back to the camera.

9. Tighten the screws on the bubble of the dome camera to finish the installation.
3 Menu Description

**Purpose:**
Call the menu by clicking the button on the PTZ Control interface, or call preset No.95.

**Steps:**
1. Connect the camera with the TVI DVR, and the monitor, shown as the figure 3-1.

![Figure 3-1 Connection](image)

2. Power on the analog camera, TVI DVR, and the monitor to view the image on the monitor.

3. Click PTZ Control to enter the PTZ Control interface.

4. Call the camera menu by clicking button, or call preset No. 95.

![Figure 3-2 Main Menu Overview](image)

5. Click the direction arrow to control the camera.
   1. Click up/down direction button to select the item.
   2. Click Iris + to confirm the selection.
3). Click left/right direction button to adjust the value of the selected item.

3.1 VIDEO FORMAT
You can set the video format as 5MP@20fps, 4MP@25fps, 4MP@30fps, 2MP@25fps, and 2MP@30fps.

3.2 EXPOSURE
Exposure describes the brightness-related parameters, which can be adjusted by EXPOSURE MODE, and AGC.

You can set the EXPOSURE MODE as GLOBAL, BLC, and DWDR.

- **GLOBAL**
  GLOBAL refers to the normal exposure mode which performs exposure according to the whole image brightness.

- **BLC (Backlight Compensation)**
  BLC (Backlight Compensation) compensates light for the front object to make it clear, but this may cause the over-exposure of the background, where the light is strong.

- **DWDR (Digital Wide Dynamic Range)**
  The DWDR helps the camera provide clear images even under backlight circumstances. When both very bright and very dark areas simultaneously exist in the image, DWDR balances the brightness level of the whole image to provide clear images with details.

**AGC (Automatic Gain Control)**
It optimizes the clarity of the image in poor light conditions. The AGC level can be set as HIGH, MEDIUM, or LOW. Select OFF to disable the AGC function.

**Note:**
The noise will be amplified, when the AGC is ON.

3.3 DAY/NIGHT
COLOR, BW (Black White), and AUTO are selectable for DAY/NIGHT switch.

**COLOR**
The image is colored in day mode all the time.

**B & W (Black and White)**
The image is black and white all the time, and the IR LIGHT turns on in the poor light conditions.
You can turn on/off the IR LIGHT and set the value of SMART IR in this menu.
IR LIGHT
You can turn on/off the IR LIGHT to meet the requirements of different circumstances.

SMART IR
The Smart IR function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. The SMART IR value can be adjusted from 1 to 3. The higher the value is, the more obvious effects are.

AUTO
Automatically switch Color, or BW (Black and White) according to actual scene brightness.
You can turn on/off the IR LIGHT, and set the value of SMART IR in this menu.

DàN THRESHOLD
Day to Night Threshold is used to control the sensitivity of switching the day mode to the night mode. You can set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

NàD THRESHOLD
Night to Day Threshold is used to control the sensitivity of switching the night mode to the day mode. You can set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

3.4 VIDEO SETTING
Move the cursor to VIDEO SETTING and click Iris+ to enter the submenu. WHITE BALANCE, BRIGHTNESS,
CONTRAST, SHARPNESS, SATURATION, DNR, and MIRROR are adjustable.

**VIDEO SETTINGS**

| WHITE BALANCE |  
| BRIGHTNESS | 5 |  
| CONTRAST | 5 |  
| SHARPNESS | 5 |  
| SATURATION | 5 |  
| DNR | OFF |  
| MIRROR |  
| BACK |  
| EXIT |  
| SAVE & EXIT |  

**Figure 3-6 VIDEO SETTINGS**

**WHITE BALANCE**

White balance, the white rendition function of the camera, is to adjust the color temperature according to the environment. It can remove unrealistic color casts in the image. You can set the mode as AUTO, or MANUAL.

- **AUTO**
  
  Under AUTO mode, white balance is being adjusted automatically according to the color temperature of the scene illumination.

- **MANUAL**

  You can set the R GAIN/B GAIN value from 1 to 255 to adjust the shades of red/blue color of the image.

**Figure 3-7 MANUAL MODE**

**BRIGHTNESS**

Brightness refers to the brightness of the image. You can set the brightness value from 1 to 9 to darken or brighten the image. The higher the value is, the brighter the image is.

**CONTRAST**

This feature enhances the difference in color and light between parts of an image. You can set the CONTRAST value from 1 to 9.

**SHARPNESS**

Sharpness determines the amount of detail an imaging system can reproduce. You can set the SHARPNESS value from 1 to 9.

**SATURATION**

Adjust this feature to change the saturation of the color. The value ranges from 1 to 9.
DNR (Digital Noise Reduction)
The DNR function can decrease the noise effect, especially when capturing moving images in poor light conditions and delivering more accurate and sharp image. You can set the DNR value from 1 to 9.

MIRROR
OFF, H, V, and HV are selectable for mirror.
OFF: The mirror function is disabled.
H: The image flips 180° horizontally.
V: The image flips 180° vertically.
HV: The image flips 180° both horizontally and vertically.

3.5 FACTORY DEFAULT
Move the cursor to FACTORY DEFAULT and click Iris+ to reset all the settings to the factory default.

3.6 EXIT
Move the cursor to EXIT and click Iris+ to exit the menu without saving.

3.7 SAVE & EXIT
Move the cursor to SAVE & EXIT and click Iris+ to save the settings, and exit the menu.
