Chapter 1 Introduction

1.1 Introduction

Dock station works with Digital Evidence Management System (hereinafter referred to as software). It provides you a simplified way to access, back up, store data, and play audio and video files in body camera. You can associate user accounts and body cameras with client, search collection records, and upload data in the client. You can also access Digital Evidence Management System via web browser.

1.2 Key Feature

- Support one click installation.
- Support searching and previewing files with user permission.
- Support collecting, uploading, and managing data in connected body camera.
- Support local operation and accessing via web.
- Support video recording GPS pattern display with map file of GPS trace.
- Support playing audio and video file.
- Support user and device management through user permission.

NOTE

- Appearance may differ in models. Please refer to the actual devices.
- You can access external display screen, keyboard and mouse to dock station, to operate in client.

Chapter 2 Installation

2.1 Packing List

You are recommended to check the objects in the package. Please contact us or suppliers if anything is damaged or lost.

2.2 Install Driver Software

Digital evidence management system is installed in dock station in default. Double select "Digital Evidence Management System.exe" to run it.

Device driver needs to be installed separately.

Step 1 Go to "drive→HK→driver-win64" or "drive→HK→driver-win32" of the directory of software installation package.

Step 2 Double select "install.bat" to run the driver software.

Installation may differ in models. Please refer to the actual devices.

2.3 Software Expiration

You should plug the watchdog into USB interface of dock station when you run the software in the device with screen.

The software can only be freely used for 3 months. If you want to continue to use, you can extend the trial period through connecting our technical staff to get the trial password.

Chapter 3 Activation

For the first access, you need to activate the device by setting an admin password. No operation is allowed before activation.

Step 1 Double select Digital Evidence Management System shortcut.

Step 2 Select Start Configuration.

Step 3 Select language. (Chinese and English are available.)

You need to select **Next** according to interface prompt after each configuration.

Step 4 Set admin password.

STRONG PASSWORD RECOMMENDED—We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

Step 5 Set HDD space.

Step 6 (Optional) Enable encryption, and set encryption level and key, to encrypt data from body camera, enhancing data security. You need to use dedicated player and enter encryption key to play the video after encrypting.

Step 7 (Optional) Set platform parameters.

Step 8 Select Save to finish the activation.
