Regulatory Information

FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see:

www.recyclethis.info

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

Applicable Models

This manual is applicable to DS-MH4172I.

Symbol Conventions

The symbols that may be found in this document are defined as follows.

Symbol	Description
 NOTE	Provides additional information to emphasize or supplement important points of the main text.
 WARNING	Indicates a potentially hazardous situation, which if not avoided, could result in equipment damage, data loss, performance degradation, or unexpected results.
 DANGER	Indicates a hazard with a high level of risk, which if not avoided, will result in death or serious injury.

Safety Instructions

- Proper configuration of all passwords and other security settings is the responsibility of the installer and/or end-user.
- In the use of the product, you must be in strict compliance with the electrical safety regulations of the nation and region. Please refer to technical specifications for detailed information.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 100 to 240 VAC according to the IEC60950-1 standard. Please refer to technical specifications for detailed information.
- Please make sure that the plug is firmly connected to the power socket.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.

Preventive and Cautionary Tips

Before connecting and operating your device, please be advised of the following tips:

- Ensure unit is installed in a well-ventilated, dust-free environment.
- Unit is designed for indoor use only.
- Keep all liquids away from the device.
- Ensure environmental conditions meet factory specifications.
- Ensure unit is properly secured to a rack or shelf. Major shocks or jolts to the unit as a result of dropping it may cause damage to the sensitive electronics within the unit.
- Use the device in conjunction with an UPS if possible.
- Power down the unit before connecting and disconnecting accessories and peripherals.

Chapter 1 Introduction

1.1 Introduction

Desktop body camera dock station (hereinafter referred to as the dock station) provides you a simplified way to access and back up law-enforcement data in Hikvision body camera.

1.2 Key Features

- Automatically copy data in connected body camera.
- Charge connected body camera.
- Simultaneously collect data for up to 8 body cameras. Collection priority is configurable.
- Save collected data in dock station HDD.
- Accessible via web browser.

1.3 Packing List

You are recommended to check the objects in the package. Please contact us if anything is damaged or lost.

Table 1-1 Packing List

7	Network interface	10M/100M/1000M Ethernet interface.
8	USB interfaces	2 × USB 3.0 interface.
9	USB interface	2 × USB 2.0 interface.
10	Power switch	Power on/off device.

Chapter 3 Basic Operation

3.1 Start Up Dock Station

Step 1 Connect a VGA/HDMI display.

Step 2 Plug in power supply into a power socket.

Step 3 Turn on power switch.

Step 4 Enter dock station power-on user name and password and press Enter.

- Default user name: Administrator
- Default password: 12345

NOTE

The default password (12345) for the Admin account is for first-time log-in purposes only. You must change this default password to better protect against security risks, such as the unauthorized access by others to the product that may prevent the product from functioning properly and/or lead to other undesirable consequences.

For your privacy, we strongly recommend changing the password to something of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product.

Proper configuration of all passwords and other security settings is the responsibility of the installer and/or end-user.

3.2 Activate Dock Station Software

Purpose:

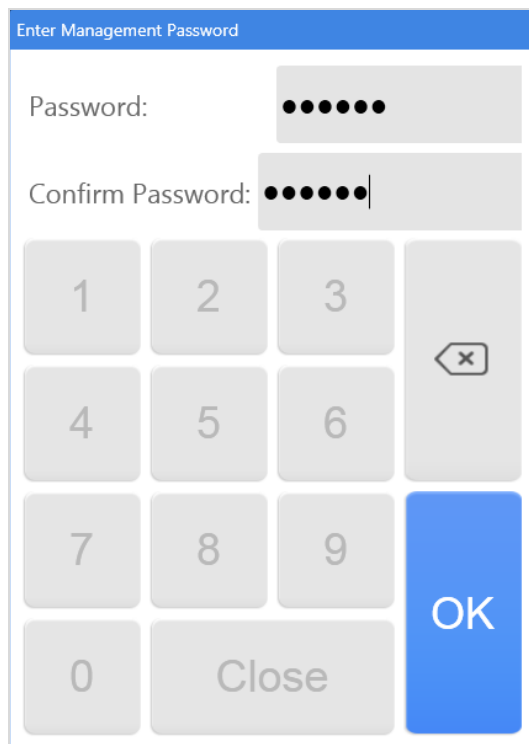

For the first-time access, you need to activate the dock station software by setting a password.

Step 1 Run dock station software (body camera station).

Step 2 Enter the same password in **Password** and **Confirm Password** text fields.

The password can only contain the digit and digit number cannot exceeds 20.

Step 3 Click **OK**.

Enter Management Password

Figure 3-1 Set Password

3.3 Access Dock Station via Web Browser

Purpose:

You can manage dock station after accessing via web browser installed in dock station or in personal computer that in the same network segment with your dock station.

Step 1 Open web browser, enter the IP address of the dock station and press Enter.

NOTE

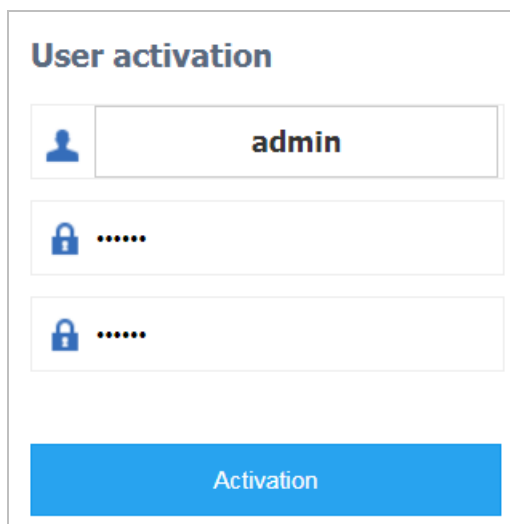

- To visit dock station via web browser installed in dock station, use IP address 127.0.0.1.
- To visit dock station via web browser installed in personal computer in the same network segment with your dock station, use dock station IP address.
- Supported web browser: Internet Explorer 8 to 11 and Chrome.

Step 2 Log into the dock station.

- If the dock station has not been activated, activate it before login.

NOTE

You can only activate dock station after log into it via web browser installed in dock station.

A screenshot of a web form titled "User activation". The form contains three input fields: the first is for a username, with the text "admin" entered; the second and third are for passwords, both masked with six dots. Below the input fields is a blue button labeled "Activation".

User activation

Activation

Figure 3-2 Set Admin Password

- 1) Set the password for the admin user account.
 - 2) Click **Activation**.
- If the dock station is already activated, enter the user name and password in the login interface, and click **Login**.

Chapter 4 Department and Officer Management

Purpose:

After adding officer information, you can view officer information when collecting body camera data. Add department information first and then add police officer information.

4.1 Add Department

Step 1 Go to **Department Management** page in web browser.

Step 2 Click **Add**.

Step 3 Enter **Department Name**, **Department No.**, and **Remark**.

Step 4 Optionally, select **Parent Department** if necessary.

Step 5 Click **OK**.

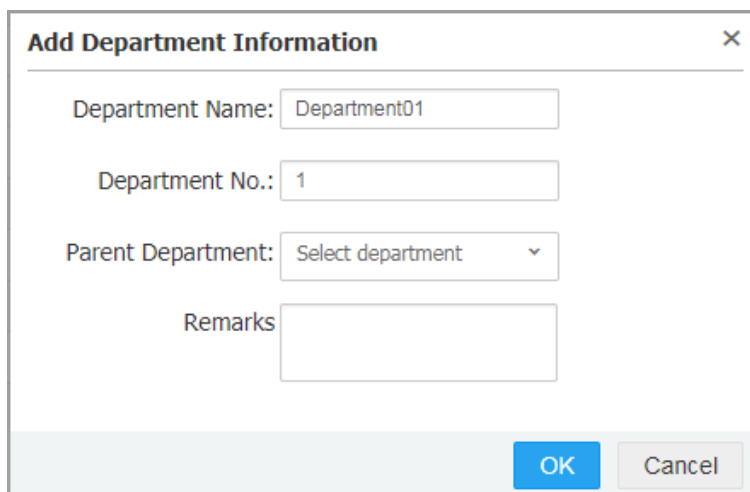

Figure 4-1 Add Department

4.2 Police Officer Management

Step 1 Go to **Police Officer Management** page in web browser.

Step 2 Click **Add**.

Step 3 Enter **Name**, **Officer No.**, and **Device No.**

Device No.: The serial No. of body camera.

Step 4 Select **Gender** and **Department**.

Step 5 Optionally, enter **Mobile Phone** and **Remark** if necessary.

Step 6 Click **OK**.

The screenshot shows a dialog box titled "Add Police Officer Information" with a close button (X) in the top right corner. The dialog contains the following fields and controls:

- Name:
- Gender: Male Female
- Department: (dropdown menu)
- Officer No.:
- Device No.:
- Mobile Phone:
- Remark:

At the bottom right of the dialog, there are two buttons: "OK" (highlighted in blue) and "Cancel".

Figure 4-2 Add Police Officer Information

Chapter 5 Data Collection

5.1 Set Data Saving Path

5.1.1 For Dock Station Software User

Purpose:

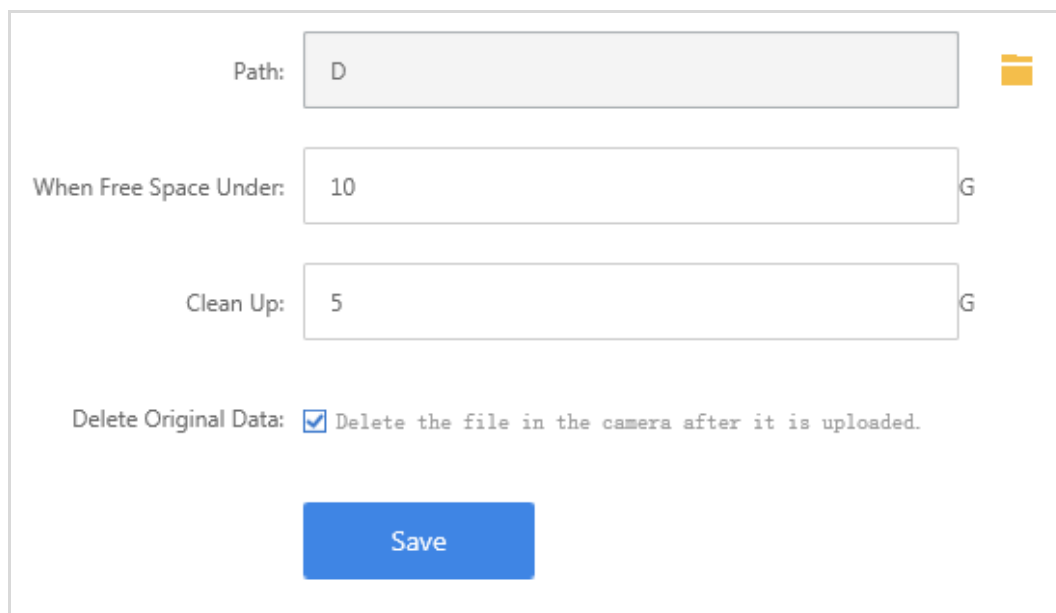

Set the saving path for collected data and data clear strategy.

Step 1 Go to **Settings > Disk** in dock station software.

Step 2 Configure following parameters.

- **Path:** Select local disks for collected data.
- **When Free Space Under** and **Clean Up:** When the free space of selected local disks is smaller than the value of **When Free Space Under**, dock station will clear the earliest files to release a space which is specified in **Clean Up**.
- **Delete Original Data:** Delete the data in body camera after it has been collected by dock station.

Step 3 Click **Save**.

Path: D

When Free Space Under: 10 G

Clean Up: 5 G

Delete Original Data: Delete the file in the camera after it is uploaded.

Save

Figure 5-1 Disk

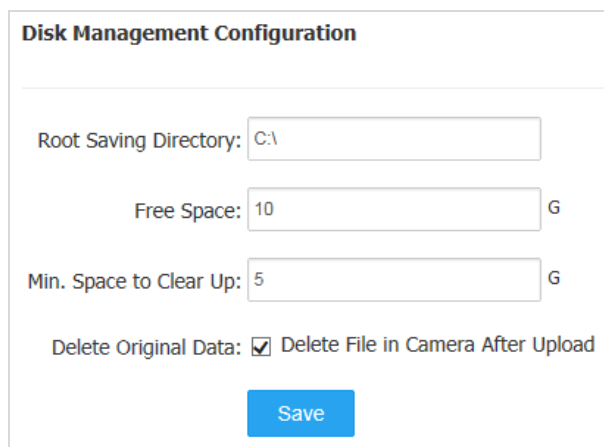

5.1.2 For User Accesses Dock Station via Web Browser

Step 1 Go to **System Configuration > Disk Management** in dock station webpage.

- **Root Saving Directory:** Select local disks for collected data.

- **Free Space and Min. Space to Clean Up:** When the free space of selected local disks is smaller than the value of **Free Space**, dock station will clear the earliest files to release a space which is specified in **Min. Space to Clean Up**.
- **Delete Original Data:** Delete the data in body camera after it has been collected by dock station.

Step 2 Click **Save**.

The screenshot shows a dialog box titled "Disk Management Configuration". It contains three input fields: "Root Saving Directory" with the value "C:\", "Free Space" with the value "10" and a unit "G" to its right, and "Min. Space to Clean Up" with the value "5" and a unit "G" to its right. Below these fields is a checkbox labeled "Delete Original Data:" which is checked, followed by the text "Delete File in Camera After Upload". At the bottom center of the dialog is a blue button labeled "Save".

Figure 5-2 Disk

5.2 Configure Collection Format

5.2.1 For Dock Station Software User

Purpose:

Dock station will only collect the files of specified format. Follow the steps to view, modify, or delete format.

Step 1 Go to **Settings > Basic > Collection Format**.

Step 2 Add or delete format for video, audio, and picture.

Step 3 Click **Save**.

Figure 5-3 Collection Format

5.2.2 For User Accesses Dock Station via Web Browser

Step 1 Go to **System Configuration > Dock Station Parameter**.

Step 2 Add or delete format for video, audio, and picture.

Step 3 Click **Save**.

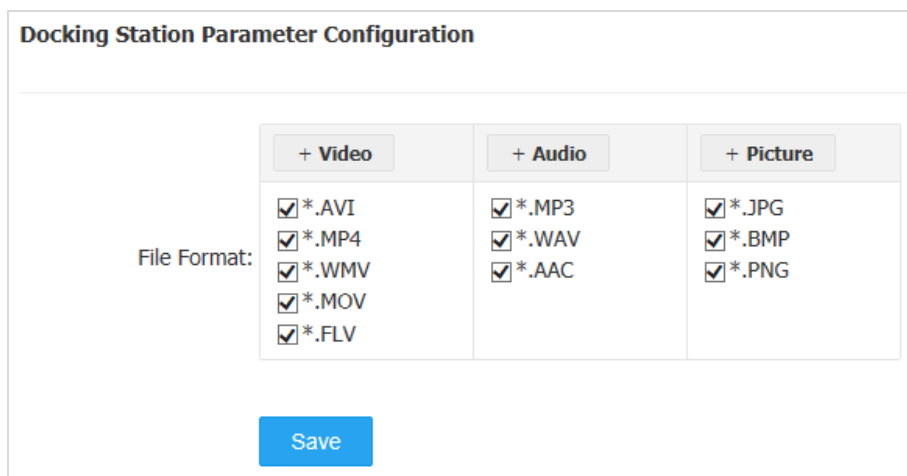

Figure 5-4 Dock Station Parameter Configuration

5.3 Collect Data

Purpose:

After body camera is connected, dock station will automatically copy data from body camera and save them in specified HDD.

Step 1 Run dock station software and go to **Home** page to view data collection formation.

Step 2 Turn on body camera.

Step 3 Connect the body camera USB interface to a USB cable of dock station or a cradle. And then dock station will automatically collect data in the body camera.

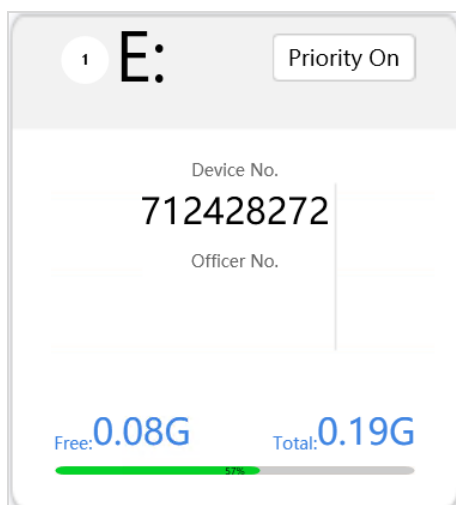

Figure 5-5 Body Camera Data Collection

- **Priority on:** Click it to set the data collection of the body camera as the first priority. Data collection of other body cameras will be stopped till the first priority data collection finished. The feature is only available for one body camera at a time. If no body camera has turned on the function, dock station will collect data from all body cameras simultaneously.
- **Free:** The capacity of uncollected data.
- **Total:** The total capacity of data to collect.
- Green bar: Show the collection progress.
- Collected data will be saved in folder: Data saving disk > **StationData** folder> device No. folder.

Chapter 6 Maintenance

6.1 Exception

When network is abnormal or HDD capacity is insufficient, alarm message will appear and audible warning will be triggered.

- Alarm message: Pop up alarm message in lower-right corner. Alarm message appears after HDD capacity or network recovers to normal.
- Audible warning: Device will send out audible warning. You can turn off audible warning.

Refer to **Logs** tab for detailed alarm information.

6.2 Log Search

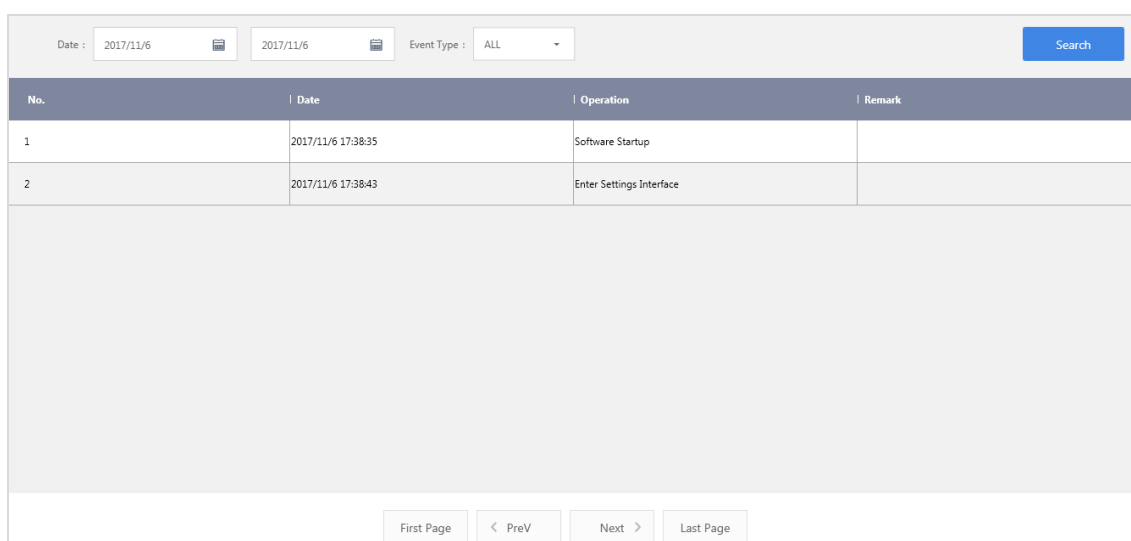

Purpose:

Operations of dock station software are recorded in the log. Search and view logs to get knowledge of dock station processes, information, etc.

Step 1 Go to **Logs** interface.

Step 2 Set search conditions, including **Date** and **Event Type**.

Step 3 Click **Search**.

The screenshot displays the Log Search interface. At the top, there are search filters: two date pickers both set to 2017/11/6, an Event Type dropdown menu set to ALL, and a blue Search button. Below the filters is a table with the following data:

No.	Date	Operation	Remark
1	2017/11/6 17:38:35	Software Startup	
2	2017/11/6 17:38:43	Enter Settings Interface	

At the bottom of the interface, there are navigation buttons: First Page, < PreV, Next >, and Last Page.

Figure 6-1 Log Search

Chapter 7 Collected Data Management

Purpose:

In **Local Files** tab, you can search and manage the successfully collected videos, audios, pictures, etc.

7.1 Search Data

Step 1 Go to **Local Files** interface.

Step 2 Set search conditions.

Step 3 Click **Search**.

7.2 Play Data

Step 1 Search data to play. For details, refer to 7.1 Search Data.

Step 2 Click  of a file to play it.

7.3 Lock Data

Purpose:

You can lock collected data to prevent it from being deleted or modified.

Step 1 Search the data to lock. For details, refer to 7.1 Search Data.

Step 2 Check the data to lock.

Step 3 Click . Data lock status is shown in **Unlock Status** column.

7.4 File Management

Purpose:

You can search files and lock files.

Step 1 Go to **File Management** page.

Step 2 Set search conditions.

Step 3 Click **Search**. The files meet the search conditions will be listed.

Step 4 Optionally, click  of a file to lock it to prevent it being modified or overwritten.

Chapter 8 Data Backup

Purpose:

When dock station software is abnormal or is re-installed, you can restore database.

8.1 Auto Backup

Step 1 Go to **Settings > Data**.

Step 2 Enable **Auto-back**.

Step 3 Set **Auto-back Interval**.

Step 4 Enter **Backup to Keep** value.

Backup to Keep: The upper limit of number of database backup file. Once exceeds the number, the earliest database backup file will be replaced by the new one.

Step 5 Click **Save**. Go to **installation root directory of dock station software > BodyCamaraStationBackup** folder to view the database backup file.

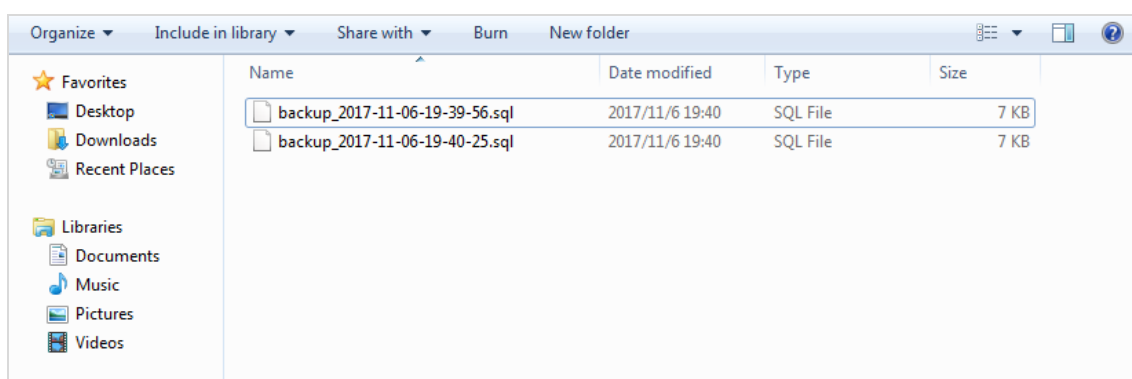

Figure 8-1 BodyCamaraStationBackup Folder

8.2 Manual Backup

Step 1 Go to **Settings > Data**.

Step 2 Click **Manual Backup**. Go to **upper level folder of dock station software installation path > BodyCamaraStationBackup** folder to view the database backup file.

8.3 Restore Database

Purpose:

When dock station database is damaged or lost, you can restore database.

Step 1 Go to **Settings > Data**.

Step 2 Click **Restore Backup** and select the database backup file to restore.

Figure 8-2 Restore Backup

Chapter 9 Other Settings

9.1 Basic Settings

Step 1 Go to **Settings > Basic**.

Step 2 Configure parameters as needed.

- **Station No.:** Number of the dock station.
- **Logo:** Modify the logo shown in the top-left corner. The logo format must be PNG and logo pixel must be 60 × 42.
- **Station Name:** Modify the name shown in the top-left corner.
- **Launch at Startup:** Run dock station software when dock station starts up.

Step 3 Click **Save**.

9.2 Edit Dock Station Software Password

Purpose:

Modify the password of docks station software.

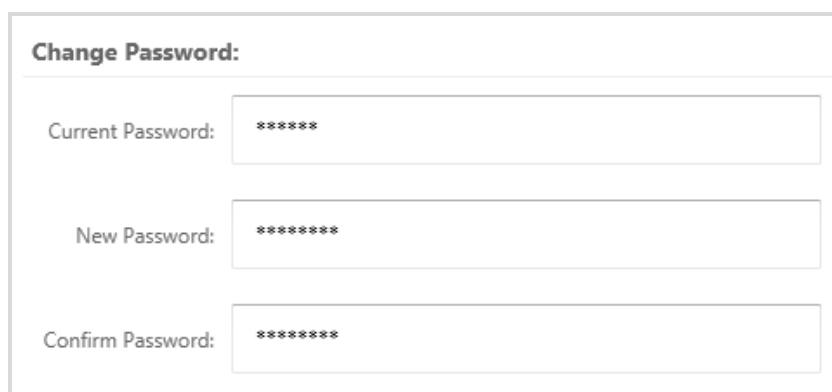

9.2.1 Edit via Dock Station Software

Step 1 Go to **Settings > Basic**.

Step 2 Enter **Current Password**.

Step 3 Enter the same password in **New Password** and **Confirm Password**.

Step 4 Click **Save**.

The screenshot shows a form titled "Change Password:" with three input fields. The first field is labeled "Current Password:" and contains six asterisks. The second field is labeled "New Password:" and contains seven asterisks. The third field is labeled "Confirm Password:" and contains seven asterisks.

Figure 9-1 Change Password

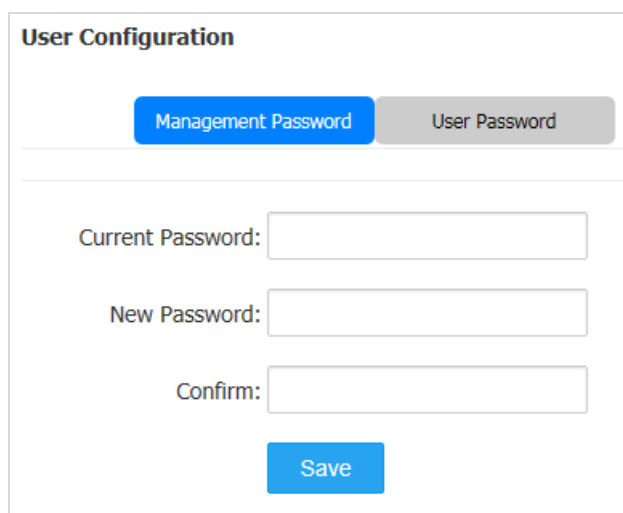

9.2.2 Edit via Web Browser

Step 1 Go to **System Configuration > User Management > Management Password**.

Step 2 Enter **Current Password**.

Step 3 Enter the same password in **New Password** and **Confirm**.

Step 4 Click **Save**.

The screenshot shows a web interface titled "User Configuration". At the top, there are two tabs: "Management Password" (highlighted in blue) and "User Password" (grey). Below the tabs, there are three input fields: "Current Password:", "New Password:", and "Confirm:". Each field is followed by a text input box. At the bottom of the form, there is a blue "Save" button.

Figure 9-2 Management Password

9.3 Edit Web Accessing Password via Web Browser

Purpose:

Modify the web accessing password of dock station.

Step 1 Go to **System Configuration > User Management > User Password**.

Step 2 Enter **Current Password**.

Step 3 Enter the same password in **New Password** and **Confirm**.

Step 4 Click **Save**.

See Far, Go Further
