

# HiLook Series 2MP ColorVu Audio Fixed Turret & Bullet Camera

## User Manual

### User Manual

Thank you for purchasing our product. If there are any questions, or requests, do not hesitate to contact the dealer.

This manual applies to the models below:

Type	Model
Type I	THC-T129-PS
Type II	THC-T129-MS
Type III	THC-T229-MS
Type IV	THC-B129-PS
	THC-B129-MS
Type V	THC-B229-MS

This manual may contain several technical mistakes or printing errors, and the content is subject to change without notice. The updates will be added to the new version of this manual. We will readily improve or update the products or procedures described in the manual.

## **Initiatives on the Use of Video Products**

Thank you for choosing Hikvision products.

Technology affects every aspect of our life. As a high-tech company, we are increasingly aware of the role technology plays in improving business efficiency and quality of life, but at the same time, the potential harm of its improper usage. For example, video products are capable of recording real, complete and clear images. This provides a high value in retrospect and preserving real-time facts. However, it may also result in the infringement of a third party's legitimate rights and interests if improper distribution, use and/or processing of video data takes place. With the philosophy of "Technology for the Good", Hikvision requests that every end user of video technology and video products shall comply with all the applicable laws and regulations, as well as ethical customs, aiming to jointly create a better community.

### **Please read the following initiatives carefully:**

1. Everyone has a reasonable expectation of privacy, and the installation of video products should not be in conflict with this reasonable expectation. Therefore, a warning notice shall be given in a reasonable and effective manner and clarify the monitoring range, when installing video products in public areas. For non-public areas, a third party's rights and interests shall be evaluated when installing video products, including but not limited to, installing video products only after obtaining the consent of the stakeholders, and not installing highly-invisible video products.
2. The purpose of video products is to record real activities within a specific time and space and under specific conditions. Therefore, every user shall first reasonably define his/her own rights in such specific scope, in order to avoid infringing on a third party's portraits, privacy or other legitimate rights.
3. During the use of video products, video image data derived from real scenes will continue to be generated, including a large amount of biological data (such as facial images), and the data could be further applied or reprocessed. Video products themselves could not distinguish good from bad regarding how to use the data based solely on the images captured by the video products. The result of data usage depends on the method and purpose of use of the data controllers. Therefore, data controllers shall not only comply with all the applicable laws and regulations and other normative requirements, but also respect international norms, social morality, good morals, common practices and other non-mandatory requirements, and respect individual privacy, portrait and other rights and interests.
4. The rights, values and other demands of various stakeholders should always be considered when processing video data that is continuously generated by video products. In this regard, product security and data security are extremely crucial. Therefore, every end user and data controller, shall undertake all reasonable and necessary measures to ensure data security and avoid data leakage, improper disclosure and improper use, including but not limited to, setting up access control, selecting a suitable network environment (the Internet or Intranet) where video products are connected,

establishing and constantly optimizing network security.

Video products have made great contributions to the improvement of social security around the world, and we believe that these products will also play an active role in more aspects of social life. Any abuse of video products in violation of human rights or leading to criminal activities are contrary to the original intent of technological innovation and product development. Therefore, each user shall establish an evaluation and tracking mechanism of their product application to ensure that every product is used in a proper and reasonable manner and with good faith.

## Regulatory Information

### FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**FCC compliance:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

### FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

### EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the *Directive 2014/30/EU (EMCD)*, *Directive 2014/35/EU (LVD)* and *Directive 2011/65/EU (RoHS)*.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: [www.recyclethis.info](http://www.recyclethis.info).

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information, see: [www.recyclethis.info](http://www.recyclethis.info).

### Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

### Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

## Safety Instruction

These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss.

The precaution measure is divided into “Warnings” and “Cautions”.

**Warnings:** Serious injury or death may occur if any of the warnings are neglected.

**Cautions:** Injury or equipment damage may occur if any of the cautions are neglected.

	
<b>Warnings</b> Follow these safeguards to prevent serious injury or death.	<b>Cautions</b> Follow these precautions to prevent potential injury or material damage.

### Warnings

- In the use of the device, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard and IEC62368-1 standard. Refer to technical specifications for detailed information.
- Do not connect multiple devices to one power adapter to avoid over-heating or a fire hazard caused by overload.
- Make sure that the plug is firmly connected to the power socket.
- Make sure that the device is firmly fixed if wall mounting or ceiling mounting is adopted.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cord, and then contact the service center.
- Never attempt to disassemble the camera by unprofessional personal.

### Cautions

- Do not drop the camera or subject it to physical shock.
- Do not touch sensor modules with fingers.
- Do not place the camera in extremely hot, cold (the operating temperature shall be -40°C to 60°C), dusty or damp locations, and do not expose it to high electromagnetic radiation.
- If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently.
- Do not aim the camera at the sun or extra bright places.
- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.
- Do not expose the device to high electromagnetic radiation or extremely hot, cold, dusty or damp environment.

- To avoid heat accumulation, good ventilation is required for the operating environment.
- Keep the camera away from liquid while in use for non-water-proof device.
- While in delivery, the camera shall be packed in its original packing, or packing of the same texture.
- The beam of the light at the distance of 200 mm is classified as Risk Group 1 (RG1). Possible hazardous optical radiation emitted from this product.
- DO NOT stare at operating light source. May be harmful to the eyes.
- Wear appropriate eye protection or turn on the supplement light only at a safe distance (0.3 m) or in the area that is not directly exposed to the light when installing or maintaining the device.

## Mark Description

Table 0-1 Mark Description

Mark	Description
---	DC Voltage

# 1 Introduction

## 1.1 Product Features

The main features are as follows:

- High performance CMOS sensor
- Smart light
- 4 in 1 video output

## 1.2 Overview

### 1.2.1 Overview of Type I Camera

Figure 1-1 Overview of Type I Camera

### Note:

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

### 1.2.2 Overview of Type II Camera

Figure 1-2 Overview of Type II Camera

**Note:**

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

### 1.2.3 Overview of Type III Camera

Figure 1-3 Overview of Type III Camera

**Note:**

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

### 1.2.4 Overview of Type IV Camera

Figure 1-4 Overview of Type IV Camera

**Note:**

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

### 1.2.5 Overview of Type V Camera

Figure 1-5 Overview of Type V Camera

**Note:**

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

## 2 Installation

### Before you start

- Make sure that the device in the package is in good condition and all the assembly parts are included.
- Make sure that all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
- Check whether the power supply is matched with your power output to avoid damage.
- Make sure the wall is strong enough to withstand three times the weight of the camera and the mount.
- If the product does not function properly, contact your dealer or the nearest service center. Do NOT disassemble the camera for repair or maintenance by yourself.

### 2.1 Installation of Type I Camera

#### 2.1.1 Ceiling Mounting Without Junction Box

##### Steps:

1. Rotate the camera to align one of the marks with the notch, and disassemble the camera.

Figure 2-1 Align the Mark and the Notch

2. Pry the enclosure open with a flat object, for example, a coin, to disassemble the camera.

Figure 2-2 Disassemble the Camera

3. Paste the drill template (supplied) to the place where you want to install the camera.
4. (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-3 Drill Template

5. (Optional) Drill the cable hole, when the cables are routed through the ceiling.

- Use two PA4 screws (supplied) to secure the mounting base to the ceiling.

Figure 2-4 Secure the Base to the Ceiling

- Install the camera back to the mounting base and secure it.

Figure 2-5 Install the Camera Back

- Connect the power cord and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below.

Figure 2-6 3-Axis Adjustment

- Rotate the enclosure to adjust the pan position [0° to 360°].
- Move the main body up and down to adjust the tilt position [0° to 75°].
- Rotate the main body to adjust the rotation position [0° to 360°].

### 2.1.2 Ceiling Mounting with Junction Box

#### **Before you start:**

You need to purchase a junction box in advance.

#### **Steps:**

- Loosen screws to take apart the junction box.
- Paste the drill template for junction box to the place where you want to install the camera.
- (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-7 Drill Template for Junction Box

- (Optional) Drill the cable hole, when the cables are routed through the ceiling.
- Secure the junction box body on the ceiling with three PA4 × 25 screws that come with the junction box.

Figure 2-8 Secure the Junction Box Body

- Fix the mounting base onto the junction box cover with two M4 × 10 screws.

Figure 2-9 Fix the Mounting Base

- Route the cables through the bottom cable hole or the side cable hole of the junction box.
- Combine the junction box cover with its body and secure it with three M3 screws.

Figure 2-10 Combine the Junction Box Cover and Body

- Connect the power cord and video cable and put the cables back into the junction box.
- Refer to step 9 of 2.1.1 *Ceiling Mounting Without Junction Box* to adjust the angle and finish the installation.

### 2.1.3 Wall Mounting

#### **Before you start:**

You need to purchase a wall mount in advance.

#### **Steps:**

- Drill  $\Phi$  10 mm screw holes in the wall where you want to install the wall mount.
- Use four M6 expansion bolts to fix the wall mount onto the wall.

Figure 2-11 Fix the Wall Mount

- Refer to steps 1 and 2 of 2.1.1 *Ceiling Mounting Without Junction Box* to disassemble the camera.
- Use two M4 screws to fix the mounting base onto the wall mount.

Figure 2-12 Fix the Mounting Base onto the Wall Mount

5. Refer to steps 7 to 9 of 2.1.1 *Ceiling Mounting Without Junction Box* to finish the installation.

Figure 2-13 Finish the Installation

## 2.2 Installation of Type II Camera

### 2.2.4 Ceiling Mounting Without Junction Box

#### Steps:

1. Paste the drill template (supplied) to the place where you want to install the camera.
2. (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-14 Drill Template

3. Loosen the screw and pull out the clip plate to disassemble the camera.

Figure 2-15 Disassemble the Camera

4. Secure the mounting base to the ceiling with three PA4 × 25 screws.

Figure 2-16 Attach the Gang Box to the Ceiling

- Pull out the clip plate and install the camera back to the mounting base. Push the clip plate back in to secure the camera.

Figure 2-17 Install the Camera

- Connect the power cord and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below.

Figure 2-18 3-Axis Adjustment

- Rotate the enclosure to adjust the pan position [0° to 360°].
- Move the main body up and down to adjust the tilt position [0° to 75°].
- Rotate the main body to adjust the rotation position [0° to 360°].
- Tighten the screw to finish the installation.

### 2.2.5 Ceiling Mounting with Junction Box

#### **Before you start:**

You need to purchase a junction box in advance.

#### **Steps:**

- Paste the drill template for junction box to the place where you want to install the camera.
- (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-19 Drill Template

- (Optional) Drill the cable hole, when the cables are routed through the ceiling.
- Take apart the junction box.
- Secure the junction box body on the ceiling with PA4 × 25 screws that come with the junction box.

Figure 2-20 Secure the Junction Box Body

6. Route the cables through the bottom cable hole or the side cable hole of the junction box.
7. Combine the junction box cover with its body and secure it with three PM3 screws.

Figure 2-21 Combine the Junction Box Cover and Body

8. Fix the mounting base onto the junction box with three M4 × 10 screws.
9. Connect the power cord and video cable and put the cables back into the junction box.
10. Refer to steps 5, 7, and 8 of 2.2.4 *Ceiling Mounting Without Junction Box* to finish the installation.

## 2.2.6 Wall Mounting

### **Before you start:**

You need to purchase a wall mount in advance.

### **Steps:**

1. Drill  $\Phi$  10 mm screw holes in the wall where you want to install the wall mount.
2. Use four M6 expansion bolts to fix the wall mount onto the wall.

Figure 2-22 Fix the Wall Mount

3. Loosen the screw and pull out the clip plate to disassemble the camera.

Figure 2-23 Disassemble the Camera

4. Use three M4 screws to fix the mounting base onto the wall mount.

Figure 2-24 Fix the Mounting Base onto the Wall Mount

5. Refer to steps 5 to 8 of 2.2.4 *Ceiling Mounting Without Junction Box* to finish the installation.

Figure 2-25 Finish the Installation

## 2.3 Installation of Type III Camera

### 2.3.1 Ceiling Mounting Without Junction Box

#### Steps:

1. Paste the drill template (supplied) to the place where you want to install the camera.
2. (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-26 Drill Template

3. (Optional) Drill the cable hole, when the cables are routed through the ceiling.
4. Turn the trim ring counterclockwise to remove it from the camera.

Figure 2-27 Remove the Trim Ring

5. Secure the camera to the ceiling with three PA4 × 25 screws (supplied).

Figure 2-28 Secure the Camera to the Ceiling

6. Connect the power cord and video cable.
7. Loosen the screw and the clip plate.

Figure 2-29 Loosen the Screw and Clip Plate

8. Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below.

Figure 2-30 3-Axis Adjustment

- 1). Rotate the enclosure to adjust the pan position [0° to 360°].
- 2). Move the main body up and down to adjust the tilt position [0° to 75°].
- 3). Rotate the main body to adjust the rotation position [0° to 360°].
9. Fasten the screw and the clip plate.
10. Install the trim ring back.

Figure 2-31 Install the Trim Ring Back

11. Turn the trim ring clockwise to secure the camera.

Figure 2-32 Secure the Camera

## 2.3.2 Installation with Junction Box/Inclined Ceiling Mount

### **Before you start:**

- You need to purchase a junction box or inclined ceiling mount in advance.
- Ceiling mounting with junction box and inclined ceiling mount are similar. Following steps take junction box as an example.

### **Steps:**

1. Paste the drill template for junction box to the place where you want to install the camera.
2. (Optional) For cement wall, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-33 Drill Template

3. (Optional) Drill the cable hole, when the cables are routed through the wall.
4. Turn the trim ring counterclockwise to remove it from the camera.

Figure 2-34 Remove the Trim Ring

5. Take apart the junction box.
6. Fix the camera onto the junction box cover with three PM4 × 10 screws.

Figure 2-35 Fix the Camera onto Junction Box Cover

7. Secure the junction box body on the wall with four PA4 × 25 screws.

Figure 2-36 Secure the Junction Box Body

8. Route the cables through the bottom cable hole or the side cable hole of the junction box and connect the cables.
9. Combine the junction box cover with its body with the four screws on the cover.

Figure 2-37 Combine Junction Box Cover with Body

10. Refer to steps 7 and 11 of 2.3.1 *Ceiling Mounting Without Junction Box* to adjust the angle and finish installation.

### 2.3.3 Wall Mounting

#### **Before you start:**

You need to purchase a wall mount in advance.

#### **Steps:**

1. Drill  $\Phi$  10 mm screw holes in the wall where you want to install the wall mount.
2. Use four M6 expansion bolts to fix the wall mount onto the wall.

Figure 2-38 Fix the Wall Mount

3. Turn the trim ring counterclockwise to remove it from the camera.

Figure 2-39 Remove the Trim Ring

4. Install the camera to the wall mount with three PA4 × 25 screws (supplied).

Figure 2-40 Install the Camera

5. Refer to steps 6 to 11 of 2.3.1 *Ceiling Mounting Without Junction Box* to finish installation.

## 2.4 Installation of Type IV Camera

### 2.4.1 Ceiling/Wall Mounting Without Junction Box

#### **Before you start:**

The ceiling mounting and wall mounting are similar. Following steps take ceiling mounting as an example.

#### **Steps:**

1. Paste the drill template (supplied) to the place where you want to install the camera.
2. (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-41 Drill Template

3. (Optional) Drill the cable hole, when the cables are routed through the ceiling.
4. Align the screw holes in the bracket to the ceiling, and secure the camera with three PA4 × 25 screws (supplied).

Figure 2-42 Secure the Camera to the Ceiling

5. Connect the power cord and video cable.
6. Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below.

Figure 2-43 3-Axis Adjustment

- 4). Loosen the trim ring to adjust the pan position [0° to 360°].
- 5). Loosen screw A to adjust the tilt position [0° to 180°].
- 6). Loosen screw B to adjust the rotation position [0° to 360°].
- 7). Tighten the trim ring and screws to finish the installation.

#### 2.4.2 Ceiling/Wall Mounting with Junction Box

##### **Before you start:**

- You need to purchase a junction box in advance.
  - Ceiling mounting and wall mounting are similar.
- Following steps take wall mounting as an example.

##### **Steps:**

1. Paste the drill template for junction box to the place where you want to install the camera.
2. (Optional) For cement wall, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-44 Drill Template for Junction Box

3. (Optional) Drill the cable hole, when the cables are routed through the wall.
4. Take apart the junction box.
5. Align the screw holes of the camera with those on the junction box cover. Attach the camera to the junction box cover with three PM4 × 10 screws.

Figure 2-45 Attach the Camera to the Junction Box Cover

6. Secure the junction box body on the wall with three PA4 × 25 screws (supplied).

Figure 2-46 Secure the Junction Box on the Wall

7. Route the cables through the bottom cable hole or side cable hole of the junction box and connect the cables.
8. Fix the junction box cover on its body with three PM3 × 16 L6 screws that come with the junction box.

Figure 2-47 Fix the Junction Box Cover on Its Body

9. Repeat steps 6 to 7 of 2.4.1 Ceiling/Wall Mounting Without Junction Box to finish the installation.

## 2.5 Installation of Type V Camera

### 2.5.1 Ceiling/Wall Mounting Without Junction Box

#### *Before you start:*

The ceiling mounting and wall mounting are similar. Following steps take ceiling mounting as an example.

#### *Steps:*

1. Paste the drill template (supplied) to the place where you want to install the camera.
2. (Optional) For cement ceiling, drill the screw holes with a 5.5 mm drill and insert the supplied wall plugs.

Figure 2-48 Drill Template

3. (Optional) Drill the cable hole, when the cables are routed through the ceiling.

- Align the screw holes in the bracket to the ceiling, and secure the camera with three PA4 × 25 screws (supplied).

Figure 2-49 Secure the Camera to the Ceiling

- Connect the power cord and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below.

Figure 2-50 3-Axis Adjustment

- Loosen the trim ring to adjust the pan position [0° to 360°].
  - Loosen screw A to adjust the tilt position [0° to 180°].
  - Loosen screw B to adjust the rotation position [0° to 360°].
- Tighten the trim ring and screws to finish the installation.

### 2.5.2 Ceiling/Wall Mounting with Junction Box

Installation of type II camera with junction box is similar with that of type I camera. Refer to 2.4.2 Ceiling/Wall Mounting with Junction Box for details.

## 3 Menu Description

Please follow the steps below to call the menu.

### Note:

The actual display may vary with your camera model.

### Steps:

- Connect the camera with the TVI DVR and the monitor, as shown in figure 3-1.

Figure 3-1 Connection

- Power on the camera, TVI DVR, and monitor to view the image on the monitor.
- Click PTZ Control to enter the PTZ Control interface.
- Call the camera menu by clicking  button or calling preset No. 95.

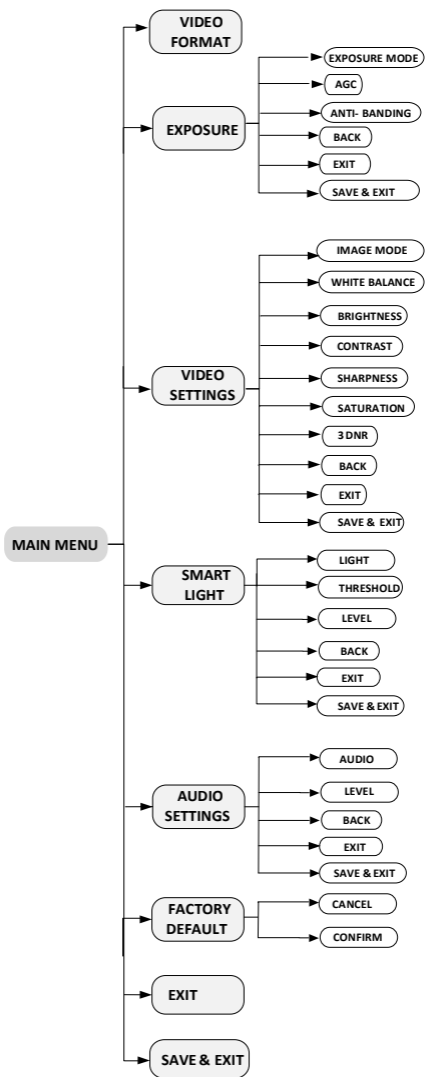

Figure 3-2 Main Menu Overview

5. Click the direction buttons to control the camera.
  - 1). Click up/down direction buttons to select menu options.
  - 2). Click Iris + to confirm the selection.
  - 3). Click left/right direction buttons to adjust the value of the selected option.

### 3.1 VIDEO FORMAT

You can set the video format to 2MP@25fps, 2MP@30fps, PAL, or NTSC.

### 3.2 EXPOSURE

#### EXPOSURE MODE

You can set the **EXPOSURE MODE** to **GLOBAL**, **BLC**, **HLC**, or **DWDR**.

- **GLOBAL**

GLOBAL refers to the normal exposure mode which adjusts lighting distribution, variations, and non-standard processing.

- **BLC (Backlight Compensation)**

BLC (Backlight Compensation) compensates light to the object in the front to make it clear, but this may cause over-exposure of the background where the light is strong.

- **HLC (Highlight Compensation)**

HLC stands for highlight compensation. The camera detects strong spots (over-exposure portion of image) and reduces the brightness of strong spots to improve the overall images.

- **DWDR (Digital Wide Dynamic Range)**

Digital wide dynamic range gives the camera the ability to view dark areas of given image as well as extremely lighted portions of the image or areas of high contrast.

**AGC (Auto Gain Control)**

It optimizes the clarity of the image in poor light conditions. The **AGC** level can be set to **HIGH**, **MEDIUM**, or **LOW**.

**Note:**

The noise will be amplified when setting the **AGC** level.

**ANTI-BANDING**

**ANTI-BANDING** is a camera setting that prevents the appearance of horizontal lines (banding) when photographing images in low frequency light and high brightness environments.

### 3.3 VIDEO SETTINGS

Move the cursor to **VIDEO SETTINGS** and click Iris+ to enter the submenu. **IMAGE MODE**, **WHITE BALANCE**, **BRIGHTNESS**, **CONTRAST**, **SHARPNESS**, **SATURATION**, **3DNR**, and **MIRROR** are adjustable.

VIDEO SETTINGS	
IMAGE MODE	◀ STD ▶
WHITE BALANCE	↵
BRIGHTNESS	◀ 5 ▶
CONTRAST	◀ 5 ▶
SHARPNESS	◀ 5 ▶
SATURATION	◀ 5 ▶
3DNR	◀ 5 ▶
MIRROR	◀ OFF ▶
BACK	↵
EXIT	↵
SAVE & EXIT	↵

Figure 3-3 VIDEO SETTINGS

#### IMAGE MODE

**IMAGE MODE** is used to adjust the image saturation, and you can set it to **STD** (Standard), **HIGH-SAT** (High Saturation), or **HIGHLIGHT** (better indoor facial details).

#### WHITE BALANCE

White balance, the white rendition function of the camera, is to adjust the color temperature according to the environment. It can remove unrealistic color casts in the image. You can set **WHITE BALANCE** mode to **AUTO** or **MANUAL**.

- **AUTO**

Under **AUTO** mode, white balance is being adjusted automatically according to the color temperature of the scene illumination.

- **MANUAL**

You can adjust the **R-GAIN** and **B-GAIN** value to correct colors manually.

WHITE BALANCE	
MODE	◀ MANUAL ▶
R-GAIN	◀ 5 ▶
B-GAIN	◀ 5 ▶
BACK	↵
EXIT	↵
SAVE&EXIT	↵

Figure 3-4 WHITE BALANCE

### **BRIGHTNESS**

Brightness refers to the brightness of the image. You can set the brightness value from 1 to 9 to darken or brighten the image. The greater the value is, the brighter the image is.

### **CONTRAST**

This feature enhances the difference in color and light between parts of an image.

### **SHARPNESS**

Sharpness determines the amount of detail an imaging system can reproduce.

### **SATURATION**

Saturation is the proportion of pure chromatic color in the total color sensation. Adjust this feature to change the saturation of the color.

### **3DNR (3D DNR)**

3DNR refers to 3D digital noise reduction. Comparing with the general 2D digital noise reduction, the 3D digital noise reduction function processes the noise between two frames besides processing the noise in one frame. The noise will be much less and the video will be clearer.

## **3.4 SMART LIGHT**

**SMART LIGHT** is used to control the integrated white light and avoid overexposure when the light is on. You can set the light as **AUTO** or **OFF**.

SMART LIGHT	
LIGHT	◀ AUTO ▶
THRESHOLD	◀ 2 ▶
LEVEL	◀ 5 ▶
BACK	↵
EXIT	↵
SAVE & EXIT	↵

Figure 3-5 SMART LIGHT

- **AUTO**

Under the **AUTO** mode, the white light turns on automatically as the environment becomes dark.

The **THRESHOLD** is the environmental light level at which the white light turns on. The greater the value is, the darker the environment is when the light is activated.

The value of **LEVEL** controls the brightness of the white light. The greater the value is, the brighter the light is.

- **OFF**

The white light is always off except when alarm is set and triggered.

### 3.5 AUDIO SETTINGS

Under the **AUTO SETTINGS** sub-menu, you can set the mode to **ON** or **OFF**. Adjust the **LEVEL** to a higher value to raise the volume.

Figure 3-6 AUTO SETTINGS

### 3.6 FACTORY DEFAULT

Click **CANCEL** to back to the main menu.

Click **CONFIRM** to reset all the settings to factory defaults.

### 3.7 EXIT

Move the cursor to **EXIT** and click Iris+ to exit the menu.

### 3.8 SAVE & EXIT

Move the cursor to **SAVE & EXIT** and click Iris+ to save the settings and exit the menu.
