

Solution Introduction

Benefit:

- A single platform allows the integration of all Hikvision devices.
- Assign devices to your ARC via Hik-ProConnect using P2P technology.

Proactive, Centralised Device Health Monitoring

Displays clear, centralised health status of system and devices.

Report Exporting

- Real time device exception notifications (portal, app, email).
- Quick and easy exception report exporting.

Benefit:

- Save time and solve problems by quickly locating abnormal devices.
- History exception records can be saved, viewed, and exported for further analysis.

Flexible Linkage Across Devices

Customize Linkage Rule	Add Linkage Rule	>
Intrusion Camera Alarm Cutput Hik-Connect Mobile Client	I 1, You cannot set linkage rules for: Devices with n configuration permission; Devices with health mo service disabled. 2. Make sure the notification of the device is enable the linkage nule will not be activated. *Unkage Rule Name	nitoring

Back to Home/Office O • Disarm Camera	* Set Triggering Event Select	~
Enable Privacy Mask	2 Linkage + Add Delete	
	Linked Resource Linkage Action	
Away Arm Camera Disable Privacy Mask	No data.	
And and a second se	3 Linkage Schedule	

- Linkage across different devices
 CCTV, control panel, video intercom, doorbell all supported.
- Flexible and easy configuration
 Set linkage rules as required.
- Self-defined verification video duration

 ARCs can view snapshots of activations from PIRCAMs to verify alarms.

Benefit:

- Increase security and safety and win end user trust.
- Save time: online configuration is easy and fast.

Co-branding Function

Your installation company logo can be displayed across different interfaces of the end user's Hik-Connect app.

Benefit:

- Promotes awareness of your brand.
- Adds value and differentiates your company from competitors.
